The Death of Jane Lawrence Caitlin Starling, 2021-10-05 ***AN
INSTANT BESTSELLER!*** Best Books of 2021 · NPR ALA/The Reading List Best Horror 2021 Pick Longlisted for the Bram Stoker Awards for Superior Achievement in a Novel, 2021 From the Bram Stoker-nominated author of *The Luminous Dead* comes a gothic fantasy horror—*The Death of Jane Lawrence*. A jewel box of a Gothic novel. —New York Times Book Review “Delicious.... By the time the book reached that point of no return, I was so invested that I would have followed Jane into the very depths of hell.” —NPR.org “Intense and amazing! It’s like *Jonathan Strange and Mr. Norrell* meets *Mexican Gothic* meets *Crimson Peak*.” —BookRiot Practical, unassuming Jane Shoringfield has done the calculations, and decided that the most secure path forward is this: a husband, in a marriage of convenience, who will allow her to remain independent and occupied with meaningful work. Her first choice, the dashing but reclusive doctor Augustine Lawrence, agrees to her proposal with only one condition: that she must never visit Lindridge Hall, his crumbling family manor outside of town. Yet

on their wedding night, an accident strands her at his door in a pitch-black rainstorm, and she finds him changed. Gone is the bold, courageous surgeon, and in his place is a terrified, paranoid man—one who cannot tell reality from nightmare, and fears Jane is an apparition, come to haunt him. By morning, Augustine is himself again, but Jane knows something is deeply wrong at Lindridge Hall, and with the man she has so hastily bound her safety to. Set in a dark-mirror version of post-war England, Caitlin Starling crafts a new kind of gothic horror from the bones of the beloved canon. This *Crimson Peak*-inspired story assembles, then upends, every expectation set in place by Shirley Jackson and Rebecca, and will leave readers shaken, desperate to begin again as soon as they are finished.

This Is Happiness Niall Williams, 2019-12-03 NAMED A BEST BOOK OF THE YEAR BY THE WASHINGTON POST and REAL SIMPLE A profound and enchanting new novel from Booker Prize-

longlisted author Niall Williams about the loves of our lives and the joys of reminiscing. You don't see rain stop, but you sense it. You sense something has changed in the frequency you've been living and you hear the quietness you thought was silence get quieter still, and you raise your head so your eyes can make sense of what your ears have already told you, which at first is only: something has changed. The rain is stopping. Nobody in the small, forgotten village of Faha remembers when it started; rain on the western seaboard was a condition of living. Now--just as Father Coffey proclaims the coming of electricity--it is stopping. Seventeen-year-old Noel Crowe is standing outside his grandparents' house shortly after the rain has stopped when he encounters Christy for the first time. Though he can't explain it, Noel knows right then: something has changed. This is the story of all that was to follow: Christy's long-lost love and why he had come to Faha, Noel's own experiences falling in and out of love, and the endlessly postponed arrival of electricity--a development that, once complete, would leave behind a world that had not changed for centuries. Niall Williams' latest novel is an intricately observed portrait of a community, its idiosyncrasies and its traditions, its paradoxes and its inanities, its failures and its triumphs. Luminous

and otherworldly, and yet anchored with deep-running roots into the earthy and the everyday, *This Is Happiness* is about stories as the very stuff of life: the ways they make the texture and matter of our world, and the ways they write and rewrite us.

The Luminous Dead Caitlin Starling,2019-04-02 Bram Stoker Award nominee for Best First Novel! This claustrophobic, horror-leaning tour de force is highly recommended for fans of Jeff VanderMeer's *Annihilation* and Andy Weir's *The Martian*. -- Publishers Weekly (starred review) A thrilling, atmospheric debut with the intensive drive of *The Martian* and *Gravity* and the creeping dread of *Annihilation*, in which a caver on a foreign planet finds herself on a terrifying psychological and emotional journey for survival. When Gyre Price lied her way into this expedition, she

thought she'd be mapping mineral deposits, and that her biggest problems would be cave collapses and gear malfunctions. She also thought that the fat paycheck—enough to get her off-planet and on the trail of her mother—meant she'd get a skilled surface team, monitoring her suit and environment, keeping her safe. Keeping her sane. Instead, she got Em. Em sees nothing wrong with controlling Gyre's body with drugs or withholding critical information to “ensure the smooth operation” of her expedition. Em knows all about Gyre's falsified credentials, and has no qualms using them as a leash—and a lash. And Em has secrets, too . . . As Gyre descends, little inconsistencies—missing supplies, unexpected changes in the route, and, worst of all, shifts in Em's motivations—drive her out of her depths. Lost and disoriented, Gyre finds her sense of control giving way to paranoia and anger. On her own in this mysterious, deadly place, surrounded by darkness and the unknown, Gyre must overcome more than just the dangerous terrain and the Tunneler which calls underground its home if she wants to make it out alive—she must confront the ghosts in her own head. But how come she can't shake the feeling she's being followed?

The Longevity Code Kris Verburgh, 2019-12-24 Slow down the

aging process and live well for longer Do you know exactly how and why you age? And what you can do— whatever your current age—to slow that process and have a longer, healthier life? In *The Longevity Code*, medical doctor Kris Verburgh illuminates the biological mechanisms that make our bodies susceptible to heart attacks, dementia, diabetes, and other aging-related diseases. With the facts laid out, he provides the tools we need to slow down the aging process. His scientifically backed Longevity Staircase outlines a simple yet innovative step-by-step method offering better health and a longer life span— especially the crucial role of proper nutrition and exercise. But diet and exercise might not be the only way to crack the “longevity code”: With each passing day, advances in biotechnology that were once the stuff of science fiction are emerging. Dr. Verburgh discusses how new types of vaccines, mitochondrial DNA, CRISPR proteins, and stem cells may help us slow and even reverse aging—now and in the future—and when paired with the right lifestyle, lead to longer, healthier lives than we’ve ever imagined.
