History of Construction Cultures Volume 1 João Mascarenhas-Mateus, Ana Paula Pires, 2023-01-11 History of Construction Cultures Volume 1 contains papers presented at the 7ICCH - Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques; - structural theory and analysis; - political, social and economic aspects; - knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

Cities on the Move Hanru Hou, Hans Ulrich Obrist, Wiener Secession, 1997 In today's world, the Asian megapolis is a reality that is reconfiguring both East and West, old world and new, and is as much a cultural phenomena as a demographic or architectural one. It is currently predicted that in the year 2000 there will be 15 cities in Asia with more than 15 million people each, and that more than 50 million will be living in the Tokyo-Osaka corridor. Cities on the Move is the first publication to confront this rapidly changing social, urban, and suburban landscape primarily from the point of view of those Asian artists, architects, and intellectuals who are currently already part of this emerging world. The result is a massive, kaleidoscopic volume which presents a multitude and variety of projects, plans, ideas, artworks, and observations which are not easily summarized. Like a documenta of the East, this book attempts nothing less than an expansive, inclusive forum and interchange -- an avant-garde symposium -- for those figures whose work by its very nature requires the contemplation of urban Asia.

A Place for All People Richard Rogers, 2017-09-07 Richard Rogers was born in Florence in 1933. He was educated in the UK and then at the Yale School of Architecture, where he met Norman Foster. Alongside his partners, he has been responsible for some of the most radical designs of the twentieth century, including the Pompidou Centre, the Millennium Dome, the Bordeaux Law Courts, Leadenhall Tower and Lloyd's of London. He chaired the Urban Task Force, which pioneered the return to urban living in the UK, was chief architectural advisor to the Mayor of London, and has also advised the mayors of Barcelona and Paris. He is married to Ruth Rogers, chef and owner of the River Café in London. He was knighted in 1991 by Queen Elizabeth II, and made a life peer in 1996. He has been awarded the Légion d'Honneur, the Royal Institute of British Architects' Royal Gold Medal, and the Pritzker Prize, architecture's highest honour. Richard Brown is Research Director at Centre for London, the independent think tank for London. He was previously Strategy Director at London Legacy Development Corporation, Manager of the Mayor of London's Architecture and Urbanism Unit, and an urban regeneration researcher at the Audit Commission.

Renzo Piano Lorenzo Ciccarelli,2023-10-24 Renzo Piano is one of the world's greatest living architects and creator of a host of iconic modern buildings, including the Pompidou in Paris, the Menil Collection in Texas, Kansai Airport in Japan, the Shard in London and the new Whitney Museum of American Art in New York. Written and created in collaboration with the Piano Foundation in Genoa, this richly illustrated volume covers the early work as well as the most recent designs, making a complete survey of his career to date. Starting with his beginnings with the Pompidou Centre in the 1970s (in collaboration with Richard Rogers) the story continues up to construction of one of his latest works, a spectacular new bridge in Genoa in 2020. The book explores all of the studio's main projects: the public spaces and museums, airports, theatres, and libraries. As well as giving unique insights into the creative process of Piano himself, the book includes numerous unpublished designs and photographs. In the process the book reveals Piano's unique way of handling light and space, as well as his particular attention to the social implications of the profession of architect and the relationship of buildings to their urban environment and landscape.

An Engineer Imagines Peter Rice,2024-03-14 The long-awaited reissue of the autobiography of Peter Rice, one of the main structural engineers behind the Sydney Opera House, the Pompidou Centre, the Menil Collection and Lloyd's of London. 'I am an engineer. Often people will call me an 'architect engineer' as a compliment. It is meant to signify a quality of engineer who is more imaginative and design-orientated than a normal engineer... To call an engineer an 'architect engineer' because he comes up with unusual or original solutions is essentially to misunderstand the role of the engineer in society.' *An Engineer Imagines* is a rare look into the professional creativity and philosophy of Peter Rice, who was widely acclaimed as the greatest structural engineer of his generation. He was a man who, in Renzo Piano's words, could design structures 'like a pianist who can play with his eyes shut'. Working with many of the world's greatest architects on buildings that became icons of contemporary architecture, he brought a uniquely poetic feeling to his work. Joining Ove Arup & Partners in 1956, Rice had heard that 'it was a place where an oddball could fit in.' Taking on Arup's theory of Total Design to heart, Rice writes about the role of the engineer in society, and how he himself applied his creativity to various projects. He admits he became an engineer by accident, tentatively feeling his way through a career without a natural instinct. But as he takes you through each of his projects, one-by-one, you can trace his development from graduate to veteran. Written in clear and poetic language, Rice's autobiography is perfect for those who want to better understand postwar buildings, our concrete environment, or are budding students of engineering and architecture.

Building a new New World Jean-Louis Cohen, 2021-01-12 An essential exploration of how Russian ideas about the United States shaped architecture and urban design from the czarist era to the fall of the U.S.S.R. Idealized representations of America, as both an aspiration and a menace, played an important role in shaping Russian architecture and urban design from the American Revolution until the fall of the Soviet Union. Jean-Louis Cohen traces the powerful concept of “Amerikanizm” and its impact on Russia’s built environment from early czarist interest in Revolutionary America, through the spectacular World’s Fairs of the 19th century, to department stores, skyscrapers, and factories built in Russia using American methods during the 20th century. Visions of America also captivated the Russian avant-garde, from El Lissitzky to Moisei Ginzburg, and Cohen explores the ongoing artistic dialogue maintained between the two countries at the mid-century and in the late Soviet era, following a period of strategic competition. This first major study of Amerikanizm in the architecture of Russia makes a timely contribution to our understanding of modern architecture and its broader geopolitics.

This gorgeous collection brings together more than 250 of the finest architectural drawings of all time, revealing each architect's process and personality as never before. Doshi to Zaha Hadid, and Grafton to Luis

Barragán, the book shows the incredible variety and beauty of architectural drawings. Drawing Architecture is ideal for art and architecture lovers alike, as well as anyone interested in the intersection of creativity and history. From the publisher of Exhibit A: Exhibitions that Transformed Architecture, 1948-2000.

Magritte Didier Ottinger, 2017 This major new book on René Magritte offers fresh interpretations of the artist's use of symbols and imagery to articulate his particular brand of surrealism. In this beautiful monograph, a collection of revelatory essays focuses on five common images in René Magritte's work--fire, shadows, curtains, words, and the fragmented body. Featuring vibrant reproductions of more than 100 works, this book helps readers understand how the artist employed these images in ways both deceptive and realistic. The book explores how he distorted accepted interpretations of classic symbols; why he so often used words as elements of his paintings; and how he applied aspects of the theater in his works. As Magritte's paintings have become subsumed by the very commercialism they sought to ridicule, this volume takes a fresh look at an artist whose familiarity masks an incredible gift for deception and rapier-like intellect.

Matisse Louise Rogers Lalaurie, 2020 This lavish book is the first full treatment of the stunning artist books created by Henri Matisse in the mid-20th century. Matisse would select a text (or texts) by an author he admired and create an entire production of visual art around it. Matisse created books around the work of French poets like Baudelaire, Mallarmé, and Ronsard. He made a fascinating edition of the French version of Elizabeth Barrett Browning's Sonnets from the Portuguese. And then there was his radically modern book--so popular in the US--that visualized the themes and patterns of American Jazz (Jazz, 1941-47).

Archipops: Bridges Corina Fletcher, 2017-09-07 Here is a beautifully presented set of notecards with a coolly modern twist. Presented in an attractive, souvenir box with paper-and-string closure, each notecard features a different pop-up design. They are ideal to send to friends or family, or to keep as a lasting reminder of some of the world's best-loved bridges, including Sydney Harbour Bridge, Brooklyn Bridge, Tower Bridge, the Rialto, the Chengyang Wind and Rain Bridge and Millau Viaduct.

Architecture of the Well-Tempered Environment Reyner Banham, 2022-07-26 Reyner Banham was a pioneer in arguing that technology, human needs, and environmental concerns must be considered an integral part of architecture. No historian before him had so systematically explored the impact of environmental engineering on the design of buildings and on the minds of architects. In this revision of his classic work, Banham has added considerable new material on the use of energy, particularly solar energy, in human environments. Included in the new material are discussions of Indian pueblos and solar architecture, the Centre Pompidou and other high-tech buildings, and the environmental wisdom of many current architectural vernaculars.

Mona Hatoum Christine van Assche, Clarrie Wallis, 2016-09-13 In Mona Hatoum's breathtaking works, conflict arises from the juxtaposition of opposites--beauty and horror, desire and revulsion. Born in Beirut in 1952 to a Palestinian family, Hatoum is concerned with confrontational themes such as violence, oppression, and voyeurism, often in reference to the human body. Published to accompany a major retrospective, Mona Hatoum features the artist's major works, including well-known pieces such as Corps tranger, 1994, an endoscopic journey through the artist's body; Hot Spot, a large, cage-like globe with world contours outlined in neon; and Present Tense, which deals with the idea of shifting territories. Beautifully designed, with 250 color images, this book will prove a must for all of those interested in contemporary art, especially video art and installation.

Content Rem Koolhaas,2004 In its mood and subject matter, Content reflects recent shifts in geo-politics, particularly since 9-11. The book's content follows Koolhaas's expanding interests, mixing architecture with politics, history, technology, and sociology. Topics are arranged according to geography.

A Day with Picasso Billy Kluver,1999-02-18 In 1978, while collecting documentary photographs of the artists' community in Montparnasse from the first decades of the century, Billy Klüber discovered that some previously unassociated photographs fell into significant groupings. One group in particular, showing Picasso, Max Jacob, Moïse Kisling, Modigliani, and others at the Café de la Rotonde and on Boulevard du Montparnasse, all seemed to have been taken on the same day. The people were wearing the same clothes in each shot and had the same accessories. Their ties were knotted the same way and their collars had the same wrinkles. A total of twenty-four photographs—four rolls of film with six photographs each—were eventually found. With the challenge of identifying the date, photographer, and circumstances, Klüber embarked on an inquiry that would illuminate the minute texture of that time and place. Biographical research into the subjects' lives led Klüber to focus on the summer of 1916 as the likely time the photos were taken. He then measured buildings and plotted angles and lengths of shadows in the photographs to narrow the time frame to a spread of three weeks. Further investigation eventually allowed Klüber to identify the photographer as Jean Cocteau and to determine the day that Cocteau had taken the photographs: August 12, 1916. A computer printout of the sun's positions on that date, obtained from the Bureau des Longitudes, together with the length of the shadows, enabled Klver to calculate the time of day of each photograph, and thus to put them in proper sequence. In a tour de force of art historical research, Klüber then reconstructed a scenario of the events of the four hours depicted in the photographs. With evocative attention to detail—noting when Picasso is no longer carrying an envelope or Max Jacob has acquired a decoration in his lapel—Klüber recreates a single afternoon in the lives of Picasso and friends, a group of remarkable people in early twentieth-century Paris. Besides the central portfolio of photographs by Cocteau, the book contains additional photographs and drawings, short biographies of all the subjects, and a historical section on the events and activities in the Paris art world at the time.

Poetics Project Tony Oursler,Mike Kelley,1999-10-01 In the late 1970s, while students at Cal Arts, Tony Oursler and Mike Kelley formed a band called first, polka Dot and the Spots, and finally, The Poetics. This little-known musical aggregation was proceeded perhaps only by The Weirdos (an early LA punk band with members from Cal Arts) as one of the first New Wave Art Rock bands of that period. Inspired by Laurie Anderson's class at Cal Arts, Kelley and Oursler's band was experimenting with ways to integrate visual arts with music. This limited edition package documents the brief life of The Poetics.
