*Strategic Stability in the Second Nuclear Age* Gregory D. Koblentz, 2014-11-01 The world has entered a second nuclear age shaped by rising nuclear states and military technologies. Gregory Koblentz argues that the United States should work with the other nuclear-armed states to manage threats to nuclear stability in the near term and establish processes for multilateral arms control efforts over the longer term.

**AU-18 Space Primer** Air Command Staff College, 2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Jointspacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar. *The Second Nuclear Age* Paul Bracken, 2012-11-13 A leading international security strategist offers a compelling new way to think about the unthinkable. The cold war ended more than two decades ago, and with its end came a reduction in the threat of nuclear weapons—a luxury that we can no longer indulge. It's not just the threat of Iran getting the bomb or North Korea doing something rash; the whole complexion of global power politics is changing because of the reemergence of nuclear weapons as a vital element of statecraft and power politics. In short, we have entered the second nuclear age. In this provocative and agenda-setting book, Paul Bracken of Yale University argues that we need to pay renewed attention to nuclear weapons and how their presence will transform the way crises develop and escalate. He draws on his years of experience analyzing defense strategy to make the case that the United States needs to start thinking seriously about these issues once again, especially as new countries acquire nuclear capabilities. He walks us through war-game scenarios that are all too realistic, to show how nuclear weapons are changing the calculus of power politics, and he offers an incisive tour of the Middle East, South Asia, and East Asia to underscore how the United States must not allow itself to be unprepared for managing such crises. Frank in its tone and farsighted in its analysis, *The Second Nuclear Age* is the essential guide to the new rules of international politics.

*Radiological and Nuclear Terrorism* P. Andrew Karam, 2021-03-10 This book discusses multiple aspects of radiological and nuclear terrorism. Do you know what to do if there is a radiological or nuclear emergency in your city? These accidents are not common, but they have happened – and even though we have not seen an attack using these weapons, governments around the world are making plans for how to prevent them – and for how to respond if necessary. Whether you are an emergency responder, a medical caregiver, a public health official – even a member of the public wanting to know how to keep yourself and your loved ones safe – there is a need to understand how these weapons work, how radiation affects our health, how to stop an attack from taking place, how to respond appropriately in the event of an emergency, and much more. Unfortunately, the knowledge that is needed to accomplish all of this is lacking at all levels of society and government. In this book, Dr. Andrew Karam, an internationally respected expert in radiation safety and multiple aspects of radiological and nuclear emergencies, discusses how these weapons work and what they can do, how they can affect our health, how to keep yourself safe, and how to react appropriately whether you are a police officer investigating a suspect radiological weapon, a firefighter responding to a radiological or nuclear attack, a nurse or physician caring for potentially contaminated patients, or a governmental official trying to keep the public safe. To do this, he draws upon his extensive experience in the military, the several years he worked directly with emergency responders, his service on a number of advisory committees, and multiple trips overseas in the aftermath of the Fukushima accident and on behalf of the International Atomic Energy Agency, Interpol, and the Health Physics Society.

**The Future of the U.S. Intercontinental Ballistic Missile Force** Lauren Caston, Robert S. Leonard, Christopher A. Mouton, Chad J. R. Ohlandt, S. Craig Moore, Raymond E. Conley, Glenn Buchan, 2014-02-04 The authors assess alternatives for a next-generation intercontinental ballistic missile (ICBM) across a broad set of potential characteristics and situations. They use the current Minuteman III as a baseline to develop a framework to characterize alternative classes of ICBMs, assess the survivability and effectiveness of possible alternatives, and weigh those alternatives against their cost.

**Kenneth Burke's Permanence and Change** Ann George, 2018-11-27 A guide to and analysis of a seminal book's key concepts and methodology Since its publication in 1935, Kenneth Burke's *Permanence and Change*, a text that can serve as an introduction to all his theories, has become a landmark of rhetorical theory. Using new archival sources and contextualizing Burke in the past and present, Ann George offers the first sustained exploration of this work and seeks to clarify the challenging book for both amateurs and scholars of rhetoric. This companion to *Permanence and Change* explains Burke's theories through analysis of key concepts and methodology, demonstrating how, for Burke, all language and therefore all culture is persuasive by nature. Positioning Burke's book as a pioneering volume of New Rhetoric, George presents it as an argument against systemic violence, positivism, and moral relativism. *Permanence and Change* has become the focus of much current rhetorical study, but George

introduces Burke's previously unavailable outlines and notes, as well as four drafts of the volume, to investigate his work more deeply than ever before. Through further illumination of the book's development, publication, and reception, George reveals Burke as a public intellectual and critical educator, rather than the eccentric, aloof genius earlier scholars imagined him to be. George argues that Burke was not ahead of his time, but rather deeply engaged with societal issues of the era. She redefines Burke's mission as one of civic engagement, to convey the ethics and rhetorical practices necessary to build communities interested in democracy and human welfare—lessons that George argues are as needed today as they were in the 1930s.

B-52 Stratofortress Units in Operation Desert Storm Jon Lake,2004-11-11 With the ending of the Cold War (1946-1991), the B-52's traditional combat role became redundant, and the USAF looked for new ways to use the machine. The invasion of Kuwait by Iraq in August 1990 gave the B-52 the chance to prove its worth in the new world order, and Stratofortress crews flying the B-52G seized the opportunity with both hands. This book explains how, flying from bases in the Indian Ocean, Britain, Spain and Saudi Arabia, the B-52G was at the forefront of the campaign to free Kuwait of Saddam's forces and dropped the first bombs of Operation Desert Storm (1990-1991).
