Freedom's Forge Arthur Herman, 2013-07-02 NEW YORK TIMES BESTSELLER • SELECTED BY THE ECONOMIST AS ONE OF THE BEST BOOKS OF THE YEAR “A rambunctious book that is itself alive with the animal spirits of the marketplace.”—The Wall Street Journal Freedom’s Forge reveals how two extraordinary American businessmen—General Motors automobile magnate William “Big Bill” Knudsen and shipbuilder Henry J. Kaiser—helped corral, cajole, and inspire business leaders across the country to mobilize the “arsenal of democracy” that propelled the Allies to victory in World War II. Drafting top talent from companies like Chrysler, Republic Steel, Boeing, Lockheed, GE, and Frigidaire, Knudsen and Kaiser turned auto plants into aircraft factories and civilian assembly lines into fountains of munitions. In four short years they transformed America’s army from a hollow shell into a truly global force, laying the foundations for the country’s rise as an economic as well as military superpower. Freedom’s Forge vividly re-creates American industry’s finest hour, when the nation’s business elites put aside their pursuit of profits and set about saving the world. Praise for Freedom’s Forge “A rarely told industrial saga, rich with particulars of the growing pains and eventual triumphs of American industry . . . Arthur Herman has set out to right an injustice: the loss, down history’s memory hole, of the epic achievements of American business in helping the United States and its allies win World War II.”—The New York Times Book Review “Magnificent . . . It’s not often that a historian comes up with a fresh approach to an absolutely critical element of the Allied victory in World War II, but Pulitzer finalist Herman . . . has done just that.”—Kirkus Reviews (starred review) “A compulsively readable tribute to ‘the miracle of mass production.’”—Publishers Weekly “The production statistics cited by Mr. Herman . . . astound.”—The Economist “[A] fantastic book.”—Forbes “Freedom’s Forge is the story of how the ingenuity and energy of the American private sector was turned loose to equip the finest military force on the face of the earth. In an era of gathering threats and shrinking defense budgets, it is a timely lesson told by one of the great historians of our time.”—Donald Rumsfeld

*"Ironsides"* Harold A. Skaarup,2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

**Stirling Engine Design Manual** William Martini,2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

My Antonia Willa Cather,2024-01-02 A haunting tribute to the heroic pioneers who shaped the American Midwest This powerful novel by Willa Cather is considered to be one of her finest works and placed Cather in the forefront of women novelists. It tells the

stories of several immigrant families who start new lives in America in rural Nebraska. This powerful tribute to the quiet heroism of those whose struggles and triumphs shaped the American Midwest highlights the role of women pioneers, in particular. Written in the style of a memoir penned by Antonia's tutor and friend, the book depicts one of the most memorable heroines in American literature, the spirited eldest daughter of a Czech immigrant family, whose calm, quite strength and robust spirit helped her survive the hardships and loneliness of life on the Nebraska prairie. The two form an enduring bond and through his chronicle, we watch Antonia shape the land while dealing with poverty, treachery, and tragedy. "No romantic novel ever written in America...is one half so beautiful as My Ántonia." -H. L. Mencken Willa Cather (1873-1947) was an American writer best known for her novels of the Plains and for *One of Ours*, a novel set in World War I, for which she was awarded the Pulitzer Prize in 1923. She was elected a fellow of the American Academy of Arts and Sciences in 1943 and received the gold medal for fiction from the National Institute of Arts and Letters in 1944, an award given once a decade for an author's total accomplishments. By the time of her death she had written twelve novels, five books of short stories, and a collection of poetry.

**The Sterling Submachine Gun** Matthew Moss, 2018-11-29 Designed by a motorcycle racer turned small-arms engineer, George Patchett, the submachine gun that eventually became known as the Sterling was developed during World War II. Some suggest it first saw action during Operation Infatuate with No. 4 Commando, before becoming fully adopted by the British Army in 1953 as the Sterling Machine Carbine (L2A1). It was centre stage for many of Britain's post-colonial conflicts from Malaya to Kenya and from Yemen to Northern Ireland. The silenced L34A1 Sterling-Patchett entered service in 1966 and first saw action deep in the jungles of Vietnam in the hands of the elite special forces of Australia, New Zealand and the United States during prisoner snatches and reconnaissance patrols. Employing first-hand accounts and painstaking technical analysis, this engaging account features carefully selected archive photography and specially commissioned colour artwork depicting the submachine gun that armed British and other forces for nearly 60 years.

Bradbeer, 2018-09 Lethal and Non-Lethal Fires: Historical Case Studies of Converging Cross-Domain Fires in Large Scale Combat Operations, provides a collection of ten historical case studies from World War I through Desert Storm. The case studies detail the use of lethal and non-lethal fires conducted by US, British, Canadian, and Israeli forces against peer or near-peer threats. The case studies span the major wars of the twentieth-century and present the doctrine the various organizations used, together with the challenges the leaders encountered with the doctrine and the operational environment, as well as the leaders' actions and decisions during the conduct of operations. Most importantly, each chapter highlights the lessons learned from those large scale combat operations, how they were applied or ignored and how they remain relevant today and in the future.
