1,001 Celestial Wonders to See Before You Die

Michael E. Bakich, 2010-07-10 1,001 Celestial Wonders is a guide to the night sky's brightest and most fascinating objects. Each target is accessible to amateur astronomers using medium-sized telescopes from a dark site. In fact, many are so bright they remain visible under moderate light pollution, as from the outskirts of a city or the suburbs of a town. The book provides a chronological target list, making it easy to use. No matter what night you choose, this book will show you many of the most memorable objects to observe, whether you are using a small telescope or even binoculars, or an instrument of larger aperture. This is far more than just a list of interesting objects. It is structured so that objects of various observing difficulty are included, which will help readers become better observers, both encouraging beginners and challenging long-time amateur astronomers. This book is designed to be easy-to-use at the telescope, and observers will appreciate each object's standardized layout and the book's chronological organization. Finally, many amateur astronomers function best when presented with a list! Even the Meade Autostar® controller features a 'best tonight' list (although the list is far less comprehensive and detailed than the catalog provided in this book), a feature that has proved extremely popular. 1,001 Celestial Wonders offers a life-list of objects any observer would be proud to complete.

Soldier Extraordinaire Alfred E. Cornebise, 2019

Soldier Extraordinaire explores the colorful life and varied accomplishments of Brig. Gen. Frank Pinkie Dorn, an unusual player on the world stage during the 1920s and beyond World War II. Over the course of his 30-year Army career, Dorn manifested probing observations and analyses especially of Asia. He produced writings on subjects ranging from Philippine native tribes to Peking's Forbidden City and the origins of the Sino-Japanese War that began in 1937. Following the end of World War II, he was closely involved in Gen. Douglas MacArthur's brilliant occupation and pacification of Japan. Beyond his military successes, Dorn created world-class art, enjoyed cooking and writing cookbooks, was renowned for his cartography skills, and relished opportunities to comment on the frequent maelstroms and interplay of relevant personalities on social and military scenes.--Provided by publisher.

Soil pollution: a hidden reality Food and Agriculture Organization of the United Nations, 2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked

to FAO's strategic objectives, especially S01, S02, S04 and S05 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

Fundamentals of Fire Fighter Skills David Schottke, 2014

Panzer III Bob Carruthers, 2013-05-17 The Panzer III was designed to be the backbone of the Panzer force and was deployed on every front. However, due to its deficient armament and poor armour, and despite its outstanding reliability, it was obsolete by 1942. This comprehensive overview of the Panzer III in action was compiled by Emmy Award winning historian Bob Carruthers. It draws heavily on war-time intelligence reports to produce a fascinating insight into the development and combat history of the Panzer III at the tactical and operational level. Also featured are rare developments such as the flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study, from an array of primary sources, of the world of the Panzer III and its crews, which conveys to the modern reader a vivid sense of how they were viewed at the time.

IS-2 Heavy Tank 1944–73 Steven J.

Zaloga, 2011-10-20 The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.

From One Leader to Another Combat Studies

Institute Press, 2013-05 This work is a collection of observations, insights, and advice from over 50 serving and retired Senior Non-Commissioned Officers. These experienced Army leaders have provided for the reader, outstanding mentorship on leadership skills, tasks, and responsibilities relevant to our Army today. There is much wisdom and advice from one leader to another in the following pages.

Revoked Allison Frankel, 2020 [The report] finds that supervision -- probation and parole -- drives high numbers of people, disproportionately those who are Black and brown, right back to jail or prison, while in large part failing to help them get needed services and resources. In states

examined in the report, people are often incarcerated for violating the rules of their supervision or for low-level crimes, and receive disproportionate punishment following proceedings that fail to adequately protect their fair trial rights.--Publisher website.

Fighting the People's War Jonathan

Fennell,2019-01-24 Jonathan Fennell captures for the first time the true wartime experience of the ordinary soldiers from across the empire who made up the British and Commonwealth armies. He analyses why the great battles were won and lost and how the men that fought went on to change the world.

Uncertainty Quantification in Laminated

Composites Sudip Dey,Tanmoy Mukhopadhyay,Sondipon Adhikari,2018-09-19 Over the last few decades, uncertainty quantification in composite materials and structures has gained a lot of attention from the research community as a result of industrial requirements. This book presents computationally efficient uncertainty quantification schemes following meta-model-based approaches for stochasticity in material and geometric parameters of laminated composite structures. Several metamodels have been studied and comparative results have been presented for different static and dynamic responses. Results for sensitivity analyses are provided for a comprehensive coverage of the relative importance of different material and geometric parameters in the global structural responses.

Mangrove Ecosystems: A Global Biogeographic

Perspective Victor H. Rivera-Monroy, Shing Yip Lee, Erik Kristensen, Robert R. Twilley, 2017-11-03
This book presents a comprehensive overview and analysis of mangrove ecological processes, structure, and function at the local, biogeographic, and global scales and how these properties interact to provide key ecosystem services to society. The analysis is based on an international collaborative effort that focuses on regions and countries holding the largest mangrove resources and encompasses the major biogeographic and socio-economic settings of mangrove distribution. Given the economic and ecological importance of mangrove wetlands at the global scale, the chapters aim to integrate ecological and socio-economic perspectives on mangrove function and management using a system-level hierarchical analysis framework. The book explores the nexus between mangrove ecology and the capacity for ecosystem services, with an emphasis on thresholds, multiple stressors, and local conditions that determine this capacity. The interdisciplinary approach and illustrative study cases included in the book will provide valuable resources in data, information, and knowledge about the current status of one of the most productive coastal ecosystem in the world.

Designing the T-34 Peter Samsonov, 2019-12-27
When the German army launched Operation Barbarossa — the invasion of the Soviet Union — on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun

and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it "the finest tank in the world". Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war's most revolutionary tank design.

Players Making Decisions Zack

Hiwiler, 2015-12-09 Game designers today are expected to have an arsenal of multi-disciplinary skills at their disposal in the fields of art and design, computer programming, psychology, economics, composition, education, mythology—and the list goes on. How do you distill a vast universe down to a few salient points? *Players Making Decisions* brings together the wide range of topics that are most often taught in modern game design courses and focuses on the core concepts that will be useful for students for years to come. A common theme to many of these concepts is the art and craft of creating games in which players are engaged by making meaningful decisions. It is the decision to move right or left, to pass versus shoot, or to develop one's own strategy that makes the game enjoyable to the player. As a game designer, you are never entirely certain of who your audience will be, but you can enter their world and offer a state of focus and concentration on a task that is intrinsically rewarding. This detailed and easy-to-follow guide to game design is for both digital and analog game

designers alike and some of its features include: A clear introduction to the discipline of game design, how game development teams work, and the game development process Full details on prototyping and playtesting, from paper prototypes to intellectual property protection issues A detailed discussion of cognitive biases and human decision making as it pertains to games Thorough coverage of key game elements, with practical discussions of game mechanics, dynamics, and aesthetics Practical coverage of using simulation tools to decode the magic of game balance A full section on the game design business, and how to create a sustainable lifestyle within it

Thriving on Our Changing Planet: A Decadal Strategy for Earth Observation from Space National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, 2019-06-18 We live on a dynamic Earth shaped by both natural processes and the impacts of humans on their environment. It is in our collective interest to observe and understand our planet, and to predict future behavior to the extent possible, in order to effectively manage resources, successfully respond to threats from natural and human-induced environmental change, and capitalize on the opportunities — social, economic, security, and more — that such knowledge can bring. By continuously monitoring and exploring Earth, developing a deep understanding of its evolving behavior, and characterizing the processes that shape and reshape the environment in which we live, we not only advance knowledge and basic

discovery about our planet, but we further develop the foundation upon which benefits to society are built. *Thriving on Our Changing Planet: A Decadal Strategy for Earth Observation from Space* (National Academies Press, 2018) provides detailed guidance on how relevant federal agencies can ensure that the United States receives the maximum benefit from its investments in Earth observations from space, while operating within realistic cost constraints. This short booklet, designed to be accessible to the general public, provides a summary of the key ideas and recommendations from the full decadal survey report.

Modeling, Design and Optimization of Multiphase

Systems in Minerals Processing Luis A.

Cisternas, 2020-03-19 Mineral processing deals with complex particle systems with two-, three- and more phases. The modeling and understanding of these systems are a challenge for research groups and a need for the industrial sector. This Special Issue aims to present new advances, methodologies, applications, and case studies of computer-aided analysis applied to multiphase systems in mineral processing. This includes aspects such as modeling, design, operation, optimization, uncertainty analysis, among other topics. The special issue contains a review article and eleven articles that cover different methodologies of modeling, design, optimization, and analysis in problems of adsorption, leaching, flotation, and magnetic separation, among others. Consequently, the topics covered are of interest to readers from academia and industry.

The Biopolitics of Development Sandro

Mezzadra, Julian Reid, Ranabir Samaddar, 2013-12-27 This book offers an original analysis and theorization of the biopolitics of development in the postcolonial present, and draws significantly from the later works of Michel Foucault on biopolitics. Foucault's works have had a massive influence on postcolonial literatures, particularly in political science and international relations, and several authors of this book have themselves made significant contributions to that influence. While Foucault's thought has been inspirational for understanding colonial biopolitics as well as governmental rationalities concerned with development, his

works have too often failed to inspire studies of political subjectivity. Instead, they have been used to stoke the myth of the inevitability of the decline of collective political subjects, often describing an increasingly limited horizon of political possibilities, and provoking a disenchantment with the political itself in postcolonial works and studies. Working against the grain of current Foucauldian scholarship, this book underlines the importance of Foucault's work for the capacity to recognize how this degraded view of political subjectivity came about, particularly within the framework of the discourses and politics of 'development', and with particular attention to the predicaments of postcolonial peoples. It explores how we can use Foucault's ideas to recover the vital capacity to think and act politically at a time when fundamentally human capacities to think, know and to act purposively in the world are being pathologized as expressions of the hubris and 'underdevelopment' of postcolonial peoples. Why and how it is that life in postcolonial settings has been depoliticized to such dramatic effect? The immediacy of these themes will be obvious to anyone living in the South of the world. But within the academy they remain heavily under-addressed. In thinking about what it means to read Michel Foucault today, this book tackles some significant questions and problems: Not simply that of how to explain the ways in which postcolonial regimes of governance have achieved the debasements of political subjectivity they have; nor that of how we might better equip them

with the means to suborn the life of postcolonial peoples more fully; but that of how such peoples, in their subjection to governance, can and do resist, subvert, escape and defy the imposition of modes of governance which seek to remove their lives of those very capacities for resistance, subversion, flight, and defiance.
