China and Angola Marcus Power, Ana Alves Cristina, 2012-07-19 Despite the escalation of co-operation between China and Angola and the explosion of interest in China's broader engagement with Africa, the terms and implications of the China-Angola partnership remain unclear. This illuminating book reveals all.

Tanks in the Great War, 1914-1918 J. F. C. Fuller, 2023-10-28 Tanks in the Great War, 1914-1918 by J. F. C. Fuller provides a comprehensive look at the role of tanks during World War I. Fuller's meticulous research and storytelling offer readers a detailed account of the development and deployment of tanks on the battlefield. This book is a valuable resource for history enthusiasts and those interested in the evolution of military technology during one of the most significant conflicts in history. It sheds light on the pivotal role that tanks played in shaping the outcome of the war.

T-34 Shock: The Soviet Legend in Pictures Francis Pulham, Will Kerrs, 2021-07-11 The Soviet T-34 medium tank needs no introduction, being the most famous tank ever built especially as has seen service across the globe throughout the twentieth century's most brutal wars. However, despite this fame, little has been written about its design changes. While most tank enthusiasts can differentiate between the 'T-34/76' and the 'T-34-85', identifying different factory production batches has proven more elusive. Until now. With nearly six hundred photographs, mostly taken by soldiers who both operated and fought against the T-34, this book seeks to catalogue and contextualise even the subtlest details to create a true 'T-34 continuum'. The book begins with the antecedents of the T-34, the ill-fated BT 'fast tank' series and the influence of the traumatic Spanish Civil War before moving to an in-depth look at the T-34's prototypes. After this, every factory production change is catalogued and contextualised, with never-before-seen photographs and stunning technical drawings. Furthermore, four battle stories are also integrated to explain the changing battle context when major production changes take place. The production story is completed with sections on the T-34's post-war production (and modification) by Czechoslovakia, Poland, and the People's Republic of China, as well as T-34 variants.

M1 Abrams at War Michael Green, 2005 The impact of the M1 tank cannot be overstated; while applying lessons learned from mistakes of the past, this new tank defined tanks and armored warfare for the foreseeable future. It redefined how the U.S. Army thought, planned, trained, and fought. The M1 carried the army into an order-of-magnitude change that ran the gamut of ground warfare. The speed that the army moved across the battlefield was increased, the methods used to supply this faster-moving force were redefined and mastered, the methods used to provide supporting fire from artillery and close-air-support aircraft were redefined and mastered, and the decision-making process used by the leadership at virtually all levels was accelerated. For the first time in history, the U.S. Army had the best tank in the world. The M1 Abrams became the yardstick for foreign countries potential enemies, and friends alike, to measure the capabilities of their own tanks ... the M1 embodied what arguably may be the ultimate balance of the three classic tank design criteria - firepower, mobility, and protection - Introduction.

Decisive Encounters Odd Arne Westad, 2003 Though the book highlights the military aspects of the war, it also shows how these took place alongside profound changes in Chinese politics, society, and culture - changes that ultimately contributed as much to the character of today's China as did the major battles. By analyzing the war as an international and not simply a domestic conflict, the author explains why so much of the present legitimacy of the Beijing government derives from its successes during the late 1940s, and reveals how the antagonism between China and the United States, so important to current international affairs, was born.--BOOK JACKET.

Engineering Communist China You-Li Sun, Dan Ling, 2003 Dan Ling, a patriotic young engineer eager to help build a new China, falls afoul of the authorities and spends 17 years as a political prisoner. Rehabilitated after Deng Xiaoping came to power, Dan returns to work with unflagging determination to help provide a good life for himself and his people after enduring prison, work camps and work farms, and the primitive life of the social outcast breaking new ground on the frozen northern frontier. Youli Sun is Director of American University's Beijing Program. He holds a PhD from the University of Chicago and did post-doctoral studies at Washington University; he is a specialist in American diplomatic history, modern Chinese history, and US-East Asian relations.

Chinese Warlord Armies 1911-30 Philip Jowett, 2012-02-20 Defeated in the Sino-Japanese War 1894-95 and the Boxer Rebellion of 1900, Imperial China collapsed into revolution and a republic was proclaimed in 1912. From the death of the first president in 1916 to the rise of the Nationalist Kuomintang government in 1926, the differing regions of this vast country were ruled by endlessly forming, breaking and re-forming alliances of regional generals who ruled as 'warlords'. These warlords acted essentially as local kings and much like Sengoku-period Japan, fewer, larger power-blocks emerged, fielding armies hundreds of thousands strong. In the mid to late 1920s some of these regional warlords. This book will reveal each great warlord as well as the organization of their forces which acquired much and very varied weaponry from the west including the latest French air force bombers. They were also joined by Japanese, White Russian and some Western soldiers of fortune which adds even more colour to a fascinating and oft-forgotten period.

The Way of the Heavenly Sword Leonard A. Humphreys, 1995 The story of the bitter political struggles within a factionalized military elite, released in the 1920's from the constraints of the informal but unified system of Imperial leadership which had characterized the military in the Meiji era.

Tanks Marsh Gelbart, 1996 The role of the armoured fighting vehicle (AVF) on the battlefield is probably the subject of more discussion now than at any time in recent history. From the formidable main battle tank to the light armoured personnel carrier, the variety and role of these versatile vehicles is extensive. This work details the equipment to be found in current use throughout the world.

Chinese Civil War Armies 1911-49 Philip Jowett, 1997-07-15 The fall of the Manchu Empire in 1911 ended thousands of years of Imperial rule and ushered in almost 40 years of conflict in China. From the abdication of Pu-Yi, the last emperor, the invasion of Manchuria by the Japanese, and the 'long march', to the birth of the People's Republic of China in 1949, this book looks in detail at the fighting men, and women, who fought for the

communists, imperialists, republicans, nationalists, warlords and the puppet armies. The result is a comprehensive and illuminating work covering a large and complex series of combatants and conflicts.

China in War and Revolution, 1895-1949 Peter Zarrow, 2006-06-07 Providing historical insights essential to the understanding of contemporary China, this text explores the events that lead to the rise of communism and a strong central state during the early twentieth century. This book weaves narrative together with thematic chapters that pause to address themes central to China's transformation.

T-62 Main Battle Tank 1965–2005 Steven J. Zaloga, 2011-10-20 The Soviet Army hastily developed the T-62 in a struggle to compete against the rapid proliferation of NATO tanks in the 1960s. It was essentially a modification of the widely-manufactured T-55 tank with the addition of a new 115mm gun. Within the USSR itself, the T-62 was quickly superseded, but it was widely exported, becoming a critical component of the Egyptian and Syrian armies in the 1973 Yom Kippur conflict and heavily influenced later designs of the M1 Abrams and Challenger tanks. In the first English-language history of this tank, Steven Zaloga examines the development of the T-62 using detailed combat descriptions to bring to life the operational history of this tank from the deserts of the Sinai to the harsh terrain of Afghanistan.

The Tank Wars Mark Urban, 2013 From the evacuation of France in 1940 to the final dash to Hamburg in 1945, the 5th Royal Tank Regiment were on the front line throughout the Second World War. Theirs was a war that saw them serve in Africa as part of the Desert Rats, before returning to Europe for the Normandy landings. Wherever they went, the notoriety of the 'Filthy Fifth' grew - they revelled in their reputation for fighting by their own rules. The Tank War explains how Britain, having lost its advantage in tank warfare by 1939, regained ground through shifts in tactics and leadership methods, as well as the daring and bravery of the crews themselves. Overturning the received wisdom of much Second World War history, Mark Urban shows how the tank regiments' advances were the equal of the feats of the German Panzer divisions. Drawing on a wealth of new material, from interviews with surviving soldiers to rarely seen archive material, this is an unflinchingly honest, unsentimental and often brutal account of the 5th RTR's wartime experiences. Capturing the characters in the crews and exploring the strategy behind their success, The Tank War is not just the story of an battle hardened unit, but something more extraordinary: the triumph of ordinary men, against long odds, in the darkest of times.

World Military Expenditures and Arms Transfers ,1988

Armour of the Pacific War Steve Zaloga, 1983 This book investigates the design, deployment and development of the armoured vehicles that saw service in the Pacific theatre of World War 2. The course of the war is traced, and the vehicles' performance summarised. Vehicles are shown in full colour artwork.

Kirov John Schettler, 2012 Kirov - Military Fiction (Naval) - Available Mar 15, 2012 The battlecruiser Kirov, is the most powerful surface combatant that ever put to sea. Built from the bones of all four prior Kirov Class battlecruisers, she is updated with Russia's most lethal weapons, given back her old name, and commissioned in the year 2020. A year later, with tensions rising to the breaking point between Russia and the West, Kirov is completing her final missile trials in the Arctic Sea when a strange accident transports her to another time. With power no ship in the world can match, much less comprehend, she must decide the fate of nations in the most titanic conflict the world has ever seen-WWII. The novel is an intensely focused naval saga, where the crew of the lost Russian battlecruiser must struggle to understand what has happened to them, and then make a choice that could be decisive in the outcome of the war-who's side are they on? The course of all future history rides in the balance! At this crucial time, Kirov finds herself just days and miles away from a secret summit at sea between Churchill and Roosevelt. On August 9, 1941, the two great leaders meet to plan cooperation in the war and lay down the Atlantic Charter, which decides the framework of post war power in the world and becomes the basis for the new United Nations and NATO. With the hindsight of history as their guide, Kirov races south toward the secret meeting place at Argentia Bay in Newfoundland. Even as she cruises for the Denmark strait, both Roosevelt and Churchill prepare to embark for the sea journey as well. The Royal Navy soon discovers what they believe to be a fearsome new German raider in the Norwegian Sea, and they join with America's Atlantic Fleet to bar the way and hunt down the most formidable surface action ship in the world. Kirov is by John Schettler, the award winning author of the Meridian time travel series, scheduled for a release in March 2012, by the Writing Shop Press. The book will be released on Amazon and Smashwords in popular eBook formats and sell for \$4.99, and Lightning Source Trade paperback at \$19.99. eBook: ISBN 978-0-9849465-1-8 - 390 Pages, about 180,000 words Trade Paperback: ISBN 978-0-9849465-2-5- 386Pages, about 180,000 words.
