**3D Geo-Information Sciences** Jiyeong Lee, Siyka Zlatanova, 2008-10-24 In recent years 3D geo-information has become an important research area due to the increased complexity of tasks in many geo-scientific applications, such as sustainable urban planning and development, civil engineering, risk and disaster management and environmental monitoring. Moreover, a paradigm of cross-application merging and integrating of 3D data is observed. The problems and challenges facing today's 3D software, generally application-oriented, focus almost exclusively on 3D data transportability issues - the ability to use data originally developed in one modelling/visualisation system in other and vice versa. Tools for elaborated 3D analysis, simulation and prediction are either missing or, when available, dedicated to specific tasks. In order to respond to this increased demand, a new type of system has to be developed. A fully developed 3D geo-information system should be able to manage 3D geometry and topology, to integrate 3D geometry and thematic information, to analyze both spatial and topological relationships, and to present the data in a suitable form. In addition to the simple geometry types like

point line and polygon, a large variety of parametric representations, freeform curves and surfaces or sweep shapes have to be supported. Approaches for seamless conversion between 3D raster and 3D vector representations should be available, they should allow analysis of a representation most suitable for a specific application.

**The Mass Retrofitting of an Energy Efficient—Low Carbon Zone** Mark Deakin, Fiona Campbell, Alasdair Reid, Joel Orsinger, 2014-12-29 Maximizing reader insights into the strategic value of mass retrofits in the residential property sector through a detailed case study analysis of the 'Hackbridge project', this book uses this development to broaden understanding of how planners may perform urban regeneration in accordance with a centralized plan. This book demonstrates how urban morphology matters, not only with respect to either the geometry of design and construction systems, or occupational behaviours, but with regards to the potential with which the planning, (re)development, design, construction, use and occupation of buildings, has to not only lower levels of energy consumption and rates of carbon emission, but also to reduce global warming associated with climate change. Delivering a critique of the state-of-the-art on urban morphology, the geometry of design typologies, construction systems and occupational behaviours and armed with the critical insights this offers, this book offers a context-specific analysis of how institutions can begin to actively plan for, integrate and sustain the development of energy efficient-low carbon zones.

**The Face in the Night** Edgar Wallace,2022-09-15  
'The Face in the Night' is a mystery novel written by Edgar Wallace. The story revolves around a woman named Audrey, who worked as a literary assistant for an old man named Malpas. The old man has an ongoing rivalry with his neighbor about a family matter, and Audrey is about to find herself a part of it...

**A Woman Named Smith** Marie Conway

Oemler,2022-06-13 This book presents a great ghost story with a pinch of romance. It takes the reader back to the times of good old colonial South Carolina. The story takes place in an old house, just occupied by a new heiress after its old master had died. The main heroine inherits the house on the condition she will never leave it or tries to sell it. Yet, a mansion can tell a lot about family history, secrets, mysteries, and feuds.

Wilson,2023-09-17 We may concede without disloyalty that Solon is peculiar unto himself. In his presence you are cursed with an unquiet suspicion that he may become frivolous with you at any moment,—may, indeed, be so at that moment, despite a due facial gravity and tones of weight,—for he will not infrequently seem to be both trivial and serious in the same breath. Again, he is amazingly sensitive for one not devoid of humor. In a pleasant sense he is acutely aware of himself, and he does not dislike to know that you feel his quality. Still again, he is bound to spice his writing. Were it his lot to report events on the Day of Judgment, I believe the Argus account would be thought too highly colored by many persons of good taste....FROM THE BOOKS.

**Captain Bayley's Heir** George Alfred Henty,1889

Adventures of a young English boy who journeys to California to seek his fortune in the 1840's gold rush.

Ritual and Music of North China Stephen

Jones,2016-12-05 The rich local traditions of musical life in rural China are still little known. Music-making in village society is largely ceremonial, and shawm bands account for a significant part of such music. This is the first major ethnographic study of Chinese shawm bands in their

ceremonial and social context. Based in a poor county in Shanxi province in northwestern China, Stephen Jones describes the painful maintenance of ceremonial and its music there under Maoism, its revival with the market reforms of the 1980s and its modification under the assault of pop music since the 1990s. Part One of the text explains the social and historical background by outlining the lives of shawm band musicians in modern times. Part Two looks at the main performing contexts of funerals and temple fairs, whilst Part Three discusses musical features such as instruments, scales, and repertoires. The downloadable resources consist of a 47-minute film in two parts, showing excerpts from funerals and temple fairs (complementing Part Two of the text), while a separate section contains a magnificent 1992 funerary performance of a complete shawm-band suite. As a package, the book and downloadable resources illuminate the whole ceremonial context of music-making in rural China, illustrating the ritual-music experience of villagers, with lay Daoist priests, opera troupes, and beggars also making cameo appearances. While the modern stage repertoires of urban professionals remain our main exposure to Chinese music, this publication is all the more valuable in showing the daily musical experiences of the majority of people in China. It will appeal to ethnomusicologists, anthropologists and all those interested in modern Chinese history and society.

**China's Cosmopolitan Empire** Mark Edward

Lewis, 2009-06-30 The Tang dynasty is often called China's "golden age," a period of commercial, religious, and cultural connections from Korea and Japan to the Persian Gulf, and a time of unsurpassed literary creativity. Mark Lewis captures a dynamic era in which the empire reached

its greatest geographical extent under Chinese rule, painting and ceramic arts flourished, women played a major role both as rulers and in the economy, and China produced its finest lyric poets in Wang Wei, Li Bo, and Du Fu. The Chinese engaged in extensive trade on sea and land. Merchants from Inner Asia settled in the capital, while Chinese entrepreneurs set off for the wider world, the beginning of a global diaspora. The emergence of an economically and culturally dominant south that was controlled from a northern capital set a pattern for the rest of Chinese imperial history. Poems celebrated the glories of the capital, meditated on individual loneliness in its midst, and described heroic young men and beautiful women who filled city streets and bars. Despite the romantic aura attached to the Tang, it was not a time of unending peace. In 756, General An Lushan led a revolt that shook the country to its core, weakening the government to such a degree that by the early tenth century, regional warlordism gripped many areas, heralding the decline of the Great Tang.

**Musical Composition in the Context of Globalization** Christian Utz, 2021-03-31 Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-

historical dynamic.

**Detroit 67** Stuart Cosgrove, 2016-10-06 First in the award-winning soul music trilogy—featuring Motown artists Diana Ross & the Supremes, Smokey Robinson, Marvin Gaye, and others. *Detroit 67* is “a dramatic account of twelve remarkable months in the Motor City” during the year that changed everything (Sunday Mail). It takes you on a turbulent journey through the drama and chaos that ripped through the city in 1967 and tore it apart in personal, political, and interracial disputes. It is the story of Motown, the breakup of the Supremes, and the damaging clashes at the heart of the most successful African American music label ever. Set against a backdrop of urban riots, escalating war in Vietnam, and police corruption, the book weaves its way through a year when soul music came of age and the underground counterculture flourished. LSD arrived in the city with hallucinogenic power, and local guitar band MC5—self-styled holy barbarians of rock—went to war with mainstream America. A summer of street-level rebellion turned Detroit into one of the most notorious cities on earth, known for its unique creativity, its unpredictability, and self-lacerating crime rates. The year 1967 ended in social meltdown, rancor, and intense legal warfare as the complex threads that held Detroit together finally unraveled. “A whole-hearted evocation of people and places,” *Detroit 67* is “a tale set at a fulcrum of American social and cultural history” (Independent).
