3D Geo-Information Sciences Jiyeong Lee, Siyka Zlatanova, 2008-10-24 In recent years 3D geo-information has become an important research area due to the increased complexity of tasks in many geo-scientific applications, such as sustainable urban planning and development, civil engineering, risk and disaster management and environmental monitoring. Moreover, a paradigm of cross-application merging and integrating of 3D data is observed. The problems and challenges facing today's 3D software, generally application-oriented, focus almost exclusively on 3D data transportability issues – the ability to use data originally developed in one modelling/visualisation system in other and vice versa. Tools for elaborated 3D analysis, simulation and prediction are either missing or, when available, dedicated to specific tasks. In order to respond to this increased demand, a new type of system has to be developed. A fully developed 3D geo-information system should be able to manage 3D geometry and topology, to integrate 3D geometry and thematic information, to analyze both spatial and topological relationships, and to present the data in a suitable form. In addition

to the simple geometry types like point line and polygon, a large variety of parametric representations, freeform curves and surfaces or sweep shapes have to be supported. Approaches for seamless conversion between 3D raster and 3D vector representations should be available, they should allow analysis of a representation most suitable for a specific application.

Folk-lore of West and Mid-Wales Jonathan Ceredig Davies, 1911

The Mass Retrofitting of an Energy Efficient-Low Carbon Zone Mark Deakin, Fiona Campbell, Alasdair Reid, Joel Orsinger, 2014-12-29 Maximizing reader insights into the strategic value of mass retrofits in the residential property sector through a detailed case study analysis of the 'Hackbridge project', this book uses this development to broaden understanding of how planners may perform urban regeneration in accordance with a centralized plan. This book demonstrates how urban morphology matters, not only with respect to either the geometry of design and construction systems, or occupational behaviours, but with regards to the potential with which the planning, (re)development, design, construction, use and occupation of buildings, has to not only lower levels of energy consumption and rates of carbon emission, but also to reduce global warming associated with climate change. Delivering a critique of the state-of-the-art on urban morphology, the geometry of design typologies, construction systems and occupational behaviours and armed with the critical insights this offers, this book offers a context-specific

analysis of how institutions can begin to actively plan for, integrate and sustain the development of energy efficient-low carbon zones.

Strange Stories Grant Allen, 1884

A Historical Sketch of the University of Georgia
Augustus Longstreet Hull, 1894

China's Cosmopolitan Empire Mark Edward Lewis, 2009-06-30 The Tang dynasty is often called China's "golden age," a period of commercial, religious, and cultural connections from Korea and Japan to the Persian Gulf, and a time of unsurpassed literary creativity. Mark Lewis captures a dynamic era in which the empire reached its greatest geographical extent under Chinese rule, painting and ceramic arts flourished, women played a major role both as rulers and in the economy, and China produced its finest lyric poets

in Wang Wei, Li Bo, and Du Fu. The Chinese engaged in extensive trade on sea and land. Merchants from Inner Asia settled in the capital, while Chinese entrepreneurs set off for the wider world, the beginning of a global diaspora. The emergence of an economically and culturally dominant south that was controlled from a northern capital set a pattern for the rest of Chinese imperial history. Poems celebrated the glories of the capital, meditated on individual loneliness in its midst, and described heroic young men and beautiful women who filled city streets and bars. Despite the romantic aura attached to the Tang, it was not a time of unending peace. In 756, General An Lushan led a revolt that shook the country to its core, weakening the government to such a degree that by the early tenth century, regional warlordism gripped many areas, heralding the decline of the Great Tang.

Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this

subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Boss of Little Arcady Harry Leon Wilson, 2023-09-17 We may concede without disloyalty that Solon is peculiar unto himself. In his presence you are cursed with an unquiet suspicion that he may become frivolous with you at any moment,—may, indeed, be so at that moment, despite a due facial gravity and tones of weight,—for he will not infrequently seem to be both trivial and serious in the same breath. Again, he is amazingly sensitive for one not devoid of humor. In a pleasant sense he is acutely aware of himself, and he does not dislike to know that you feel his quality. Still again, he is bound to spice his writing. Were it his lot to report events on the Day of Judgment, I believe the Argus account would be thought too highly

colored by many persons of good taste....FROM THE BOOKS.

Data Feminism Catherine D'Ignazio, Lauren F. Klein, 2023-10-03 A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In Data Feminism, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data

never, ever “speak for themselves.” Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

Musical Composition in the Context of Globalization Christian Utz, 2021-03-31 Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-historical dynamic.

Ritual and Music of North China Stephen Jones, 2016-12-05 The rich local traditions of musical life in rural China are still little known. Music-making in village society is largely ceremonial, and shawm bands account for a significant part of such music. This is the first major ethnographic study of Chinese shawm bands in their ceremonial and social context. Based in a

poor county in Shanxi province in northwestern China, Stephen Jones describes the painful maintenance of ceremonial and its music there under Maoism, its revival with the market reforms of the 1980s and its modification under the assault of pop music since the 1990s. Part One of the text explains the social and historical background by outlining the lives of shawm band musicians in modern times. Part Two looks at the main performing contexts of funerals and temple fairs, whilst Part Three discusses musical features such as instruments, scales, and repertoires. The downloadable resources consist of a 47-minute film in two parts, showing excerpts from funerals and temple fairs (complementing Part Two of the text), while a separate section contains a magnificent 1992 funerary performance of a complete shawm-band suite. As a package, the book and downloadable resources illuminate the whole ceremonial context of music-making in rural China, illustrating the ritual-music experience of villagers, with lay Daoist priests, opera troupes, and beggars also making cameo appearances. While the modern stage repertoires of urban professionals remain our main exposure to Chinese music, this publication is all the more valuable in showing the daily musical experiences of the majority of people in China. It will appeal to ethnomusicologists, anthropologists and all those interested in modern Chinese history and society.
