A Woman Named Smith Marie Conway Oemler,2022-06-13 This book presents a great ghost story with a pinch of romance. It takes the reader back to the times of good old colonial South Carolina. The story takes place in an old house, just occupied by a new heiress after its old master had died. The main heroine inherits the house on the condition she will never leave it or tries to sell it. Yet, a mansion can tell a lot about family history, secrets, mysteries, and feuds.

The Boss of Little Arcady Harry Leon Wilson,2023-09-17 We may concede without disloyalty that Solon is peculiar unto himself. In his presence you are cursed with an unquiet suspicion that he may become frivolous with you at any moment,—may, indeed, be so at that moment, despite a due facial gravity and tones of weight,—for he will not infrequently seem to be both trivial and serious in the same breath. Again, he is amazingly sensitive for one not devoid of humor. In a pleasant sense he is acutely aware of himself, and he does not dislike to know that you feel his quality. Still again, he is bound to spice his writing. Were it his lot to report events on the Day of Judgment, I believe the Argus account would be thought too highly colored by many persons of good taste....FROM THE BOOKS.

The Great Portrait Mystery R. Austin Freeman, 2012-09-30 The National Portrait Gallery is the opening setting for this mystery of theft and fraud. A painter copies diligently from a watercolour one morning when an enigmatic musician appears and causes mayhem. The copyist replaces a masterpiece and makes an infamous escape. Who are the mysterious musician and copyist?

China's Cosmopolitan Empire Mark Edward Lewis, 2009-06-30 The Tang dynasty is often called China's "golden age," a period of commercial, religious, and cultural connections from Korea and Japan to the Persian Gulf, and a time of unsurpassed literary creativity. Mark Lewis captures a dynamic era in which the empire reached its greatest geographical extent under Chinese rule, painting and ceramic arts flourished, women played a major role both as rulers and in the economy, and China produced its finest lyric poets in Wang Wei, Li Bo, and Du Fu. The Chinese engaged in extensive trade on sea and land. Merchants from Inner Asia settled in the capital, while Chinese entrepreneurs set off for the wider world, the beginning of a global diaspora. The emergence of an economically and culturally dominant south that was controlled from a northern capital set a pattern for the rest of Chinese imperial history. Poems celebrated the glories of the capital, meditated on individual loneliness in its midst, and described heroic young men and beautiful women who filled city streets and bars. Despite the romantic aura attached to the Tang, it was not a time of unending peace. In 756, General An Lushan led a revolt that shook the country to its core, weakening the government to such a degree that by the early tenth century, regional warlordism gripped many areas, heralding the decline of the Great Tang.

Musical Composition in the Context of Globalization Christian Utz, 2021-03-31 Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-historical dynamic.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of

three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

3D Geo-Information Sciences Jiyeong Lee, Siyka Zlatanova, 2008-10-24 In recent years 3D geo-information has become an important research area due to the increased complexity of tasks in many geo-scientific applications, such as sustainable urban planning and development, civil engineering, risk and disaster management and environmental monitoring. Moreover, a paradigm of cross-application merging and integrating of 3D data is observed. The problems and challenges facing today's 3D software, generally application-oriented, focus almost exclusively on 3D data transportability issues – the ability to use data originally developed in one modelling/visualisation system in other and vice versa. Tools for elaborated 3D analysis, simulation and prediction are either missing or, when available, dedicated to specific tasks. In order to respond to this increased demand, a new type of system has to be developed. A fully developed 3D geo-information system should be able to manage 3D geometry and topology, to integrate 3D geometry and thematic information, to analyze both spatial and topological relationships, and to present the data in a suitable form. In addition to the simple geometry types like point line and polygon, a large variety of parametric representations, freeform curves and surfaces or sweep shapes have to be supported. Approaches for seamless conversion between 3D raster and 3D vector representations should be available, they should allow analysis of a

representation most suitable for a specific application.

Data Feminism Catherine D'Ignazio, Lauren F. Klein, 2023-10-03 A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In *Data Feminism*, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever “speak for themselves.” *Data Feminism* offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But *Data Feminism* is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.
