Edmundson, 2012-06-20 The Sturmgeschütz III proved to be one of the more significant German AFVs of World War II, with over 9,000 being produced up until April 1945. Originally designed in the late 1930s as a self-propelled infantry support gun, its role became more diverse throughout the war and it served as a tank hunter and in front-line Panzer companies. This title provides a detailed, step-by-step guide to modelling a 1/35-scale StuG III. It also provides a comprehensive list of available aftermarket products and kits of all scales. Key aspects such as finishing techniques, including painting and displaying your model are also covered. This guide forms part of Osprey Modelling 22 Modelling the Sturmgeschütz III ebook.

Hitler's Tank Killer Hans Seidler, 2010 Sturmgeschütz III was originally designed as an assault weapon, but as war progressed it was increasingly used in a defensive role and evolved into an assault gun and tank destroyer. By 1943 its main role was providing anti-tank support to the units in its area of operation. This consequently led to many StuGs being destroyed in battle. Nonetheless they were very successful as tank killers and destroyed, among others, many bunkers, pillboxes and other defenses. While not considered to be a true tank because it lacked a turret, the gun was mounded directly in the hull, with a low profile to reduce vehicle heights, and had a limited lateral traverse of a few degrees in either direction. Thus, the entire vehicle had to be turned in order to acquire targets. Omitting the turret made production much simpler and less costly, enabling greater numbers to be built. Most assault guns were mounted on the chassis of a Panzer III or Panzer IV, with the resultant model being called either a StuG III or StuG IV respectively. The StuG was one of the most effective tracked vehicles of World War II, and over 10,000 of them were eventually produced.

This second volume of Assault Gun III - Backbone of the German Infantry enables readers - to identify the date of photographs, - to restore vehicles to factory conditions - to build exact models The necessary information is broken down into 90 identifiable characteristics - all illustrated by photographs and presented in an easy approach. The usual troop modifications are discussed as well. Additionally, there are many photographs of all variants, placed in chronological order as accepted by the Armament Office: 4-sided drawings in modeler scale 1:35 of all variants, Ausf G shown in four steps, fact tables and photographs. Sturmgeschütz III Assault Gun 1940–42 Hilary Doyle, Tom Jentz, 1996-04-15 The workhorse of the German Army that swept across Poland, France and Russia, the Sturmgeschütz III saw service in all theatres of World War II, both in an infantry support role and as a tank destroyer. Cheaper and quicker to produce than a tank, the assault gun proved a remarkably effective weapon. Its design and development, production, capabilities and operational history are all closely examined, as is its tactical employment and organisation into units. This book uses original German combat and experience reports to show how the Sturmgeschütz fared in action, whilst also providing information on both retrofitted and production modifications.

Sturmgeschütz III and IV 1942–45 Tom Jentz, Hilary Doyle, 2001-06-25 As the Second World War dragged on, heavy German losses in armoured vehicles and tanks ensured that assault gun units had to play an increasingly vital role in supporting the beleaguered infantry and countering Allied armour, particularly on the Eastern Front. The Sturmgeschütz was one of the most numerous produced and effectively deployed of the German armoured vehicles. This book reveals how the Sturmgeschütz provided the backbone of Germany's armoured forces in every theatre and on every front during the long fighting-retreat of the final years of the war.

STUG III Sturmgeschutz III Ausführung A to G (SdKfz 142) Enthusiasts' Manual Mark Healy, 2019-12-17 The German Sturmgeschütz series of assault guns was a successful and cost-effective range of armoured fighting vehicles; of which some 10,000 were built during the Second World War. Based on the chassis of the Panzer III tank; the turret was replaced by an armoured fixed superstructure fitted with a more powerful 7.5cm StuK 40 L/48 gun. Originally intended as a mobile assault weapon for infantry support; the StuG was constantly modified and saw extensive use on all battlefronts as an assault gun and tank destroyer. Its fixed superstructure with limited-traverse mounting for the main armament was simpler and cheaper to build than the turret of the battle tank; plus its low height meant it was easy to camouflage and conceal. Towards the end of the war; more StuGs were built than tanks. StuGs also saw combat when used by several Axis allies; notably Romania and Finland. They were also exported to Bulgaria, Hungary, Italy, and Spain. The Soviet Union gave some of their captured German vehicles to Syria in the 1950s, which continued to use them up until the War over Water against Israel in the mid-1960s. By the time of the Arab-Israeli Six-Day War in 1967; all of them had been either destroyed, stripped for spare parts, or placed on the Golan Heights as static pillboxes.

*The Combat History of German Heavy Anti-Tank Unit 653 in World War II* Karlheinz Munch, 2005 Hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and Jagdtiger. Color illustrations focus on unit markings, numbering, and camouflage. Accompanying text chronicles the unit's combat operations plus there are personal accounts from the men who rode in these mechanical monsters. German Heavy Anti-Tank Unit 653 was equipped with the heaviest tank destroying vehicles of the German armed forces. Initially activated as an assault gun battalion and redesignated in April 1943, the 653 received its first

Ferdinand heavy tank destroyers (later modified and renamed Elephants) in May 1943 and went into action on the Eastern Front a month later. In 1944, the unit converted to the even more massive Jagdtiger. The seventy-five-ton, heavily armored Jagdtiger was the behemoth of the battlefield and boasted a 128mm gun-as opposed to the Ferdinand's 88-with a range of more than thirteen miles, making it deadly despite its limited mobility. Outfitted with these lethal giants, the 653 saw service in Russia, Italy, Austria, and Germany.

German Tanks in Normandy 1944 Steven J. Zaloga,2021-08-19 A new study of the German Panzer forces that stood between the Allies' D-Day beachhead and victory in World War II – how they compared, how they were organized, and how they fought. The German tank forces in Normandy in June–August 1944 had the advantage of fighting on the defensive side, as well as comprising of some of the most powerful and advanced tanks used by any side in the war. Yet success in tank warfare depends on many things beyond technological superiority. This book describes the types of tanks, tank destroyers and assault guns used by the Panzer units in Normandy, how they fought on the Normandy battlefield, and why they were overwhelmed by the advancing Allies. It discusses the organization and equipment of the units, providing thumbnail sketches of basic organization and doctrine as well as statistical data on the types and categories of AFVs in German service.

**Stug III and Stug IV** Dennis Oliver,2019-06 In the last years of the Second World War the Sturmgeschütz III (StuG III) and Sturmgeschütz IV (StuG IV) played a vital role as assault guns during the German army's struggle to block the Allied advance on the Western Front. As the Wehrmacht's tank forces declined, these armored vehicles were thrown into every defensive operation. They are not as well known as the Tigers and Panthers, but German resistance would have been much weaker without them. They were also among the most frequently encountered German armored vehicles on the battlefields, which is why they are such a fascinating subject for Dennis Oliver in this volume in the TankCraft series He uses archive photos and extensively researched color illustrations to examine the StuG III and StuG IV deployed by the German army and the Waffen-SS during these doomed campaigns. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic armored vehicles.

Death Traps Belton Y. Cooper,2007-12-18 “An important contribution to the history of World War II . . . I have

never before been able to learn so much about maintenance methods of an armored division, with precise details that underline the importance of the work, along with descriptions of how the job was done.”—Russell F. Weigley, author of Eisenhower’s Lieutenants “Cooper saw more of the war than most junior officers, and he writes about it better than almost anyone. . . . His stories are vivid, enlightening, full of life—and of pain, sorrow, horror, and triumph.”—Stephen E. Ambrose, from his Foreword “In a down-to-earth style, *Death Traps* tells the compelling story of one man’s assignment to the famous 3rd Armored Division that spearheaded the American advance from Normandy into Germany. Cooper served as an ordnance officer with the forward elements and was responsible for coordinating the recovery and repair of damaged American tanks. This was a dangerous job that often required him to travel alone through enemy territory, and the author recalls his service with pride, downplaying his role in the vast effort that kept the American forces well equipped and supplied. . . . [Readers] will be left with an indelible impression of the importance of the support troops and how dependent combat forces were on them.”—Library Journal “As an alumnus of the 3rd, I eagerly awaited this book’s coming out since I heard of its release . . . and the wait and the book have both been worth it. . . . Cooper is a very polished writer, and the book is very readable. But there is a certain quality of ‘you are there’ many other memoirs do not seem to have. . . . Nothing in recent times—ridgerunning in Korea, firebases in Vietnam, or even the one hundred hours of Desert Storm—pressed the ingenuity and resolve of American troops . . . like WWII. This book lays it out better than any other recent effort, and should be part of the library of any contemporary warrior.”—Stephen Sewell, *Armor Magazine* “Cooper’s writing and recall of harrowing events is superb and engrossing. Highly recommended.”—Robert A. Lynn, *The Stars and Stripes* “This detailed story will become a classic of WWII history and required reading for anyone interested in armored warfare.”—Publishers Weekly (starred review) “[*Death Traps*] fills a critical gap in WWII literature. . . . It’s a truly unique and valuable work.”—G.I. Journal

*M10 Tank Destroyer vs StuG III Assault Gun* Steven J. Zaloga, 2013-08-20 The Allies' M10 Tank Destroyer and the Germans' Sturmgeschütz (StuG) III were the unsung workhorses of the northwest European battlefields of 1944–45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters, from the Normandy Bocage, to the rubble-strewn streets of Aachen. The StuG III was the quintessential assault gun, a low-slung, heavily armoured, turret-less vehicle intended to provide direct fire support for infantry formations, whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer. However, by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks, and was consequently relegated to infantry support too. Widely deployed in roles their designers had not envisaged, these two armoured fighting vehicles clashed repeatedly during the 11-month campaign, which saw the Allies advance from Normandy to the heart of the Reich. Fully illustrated with specially commissioned artwork, this is the story of their confrontation at the height of World War II.
