**Cities Under Siege** Stephen Graham,2011-11-01 Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, Cities Under Siege traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism.'

**Electric and Hybrid Cars** Curtis D. Anderson,Judy Anderson,2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

**A Permanent Member of the Family** Russell Banks,2013-11-12 Suffused with Russell Banks's trademark lyricism and reckless humor, the twelve stories in A Permanent Member of the Family examine the myriad ways we try-and sometimes fail-to connect with one another, as we seek a home in the world. In the title story, a father looks back on the legend of the cherished family dog whose divided loyalties mirrored the fragmenting of his marriage. "A Former Marine" asks, to chilling effect, if one can ever stop being a parent. And in the haunting, evocative "Veronica," a mysterious woman searching for her daughter may not be who she claims she is. Moving between the stark beauty of winter in upstate New York and the seductive heat of Florida, Banks's acute and penetrating collection demonstrates the range and virtuosity of both his narrative prowess and his startlingly panoramic vision of modern American life.

**Day of the Cheetah** Dale Brown,2008-10 In this aerial combat story, the author refers to technology only now coming off real military drawing boards and his own hands-on insider's skill. In this novel of high-tech aviation, the story comes to a shattering climax. The author also wrote Flight of the Old Dog and Silver Tower. **Environmental Advertising in China and the USA** Xinghua Li,2016-05-05 Since the late 1980s, green consumerism has been hailed in the West as an efficient solution to environmental problems. However, Chinese consumers have been slow to warm up to eco-friendly products. Consumers prefer SUVs to hybrid cars, health supplements and snake oil medicines to organic foods and eco-fashion is still secluded in high-end designer studios. These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese. This book examines the psycho-cultural differences that disrupt the translation of eco-friendly appeals to China by analyzing environmental advertising. It explores the different notions of green, the structures of desire that underlies the advertisements, and how they are shaped by ideological, cultural, and historical differences. Rather than arguing the superiority of the American or Chinese version of green consumerism, the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement. This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies, green advertising and marketing, environmental communication and media studies, China studies and environmental sociology, ethics and cultural studies.

**Car PC Hacks** Damien Stolarz,2005 Car PC Hacks is the first book available to introduce and entrench you into the hot new car PC market. Expect innovation, tools and fun experiments for creating a mobile multimedia center. This Hacks Series addition packs a punch in this comprehensive and easy-to-read guide. Whether you're venturing into car PC for the first time or an experienced hobbyist, hop in for a joy ride.

**Using R for Introductory Statistics** John Verzani,2018-10-03 The second edition of a bestselling textbook, Using R for Introductory Statistics guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version. See What's New in the Second Edition: Increased emphasis on more idiomatic R provides a grounding in the functionality of base R. Discussions of the use of RStudio helps new R users avoid as many pitfalls as possible. Use of knitr package makes code easier to read and therefore easier to reason about. Additional information on computer-intensive approaches motivates the traditional approach. Updated examples and data make the information current and topical. The book has an accompanying package, UsingR, available from CRAN, R's repository of user-contributed packages. The package contains the data sets mentioned in the text (data(package=UsingR)), answers to selected problems (answers()), a few demonstrations (demo()), the errata (errata()), and sample code from the text. The topics of this text line up closely with traditional teaching progression; however, the book also highlights computer-intensive approaches to motivate the more traditional approach. The authors emphasize realistic data and examples and rely on visualization techniques to gather insight. They introduce statistics and R seamlessly, giving students the tools they need to use R and the information they need to navigate the sometimes complex world of statistical computing.

**Emails from an Asshole** John Lindsay,2010-04-01 One man causes chaos in the online classifieds resulting in this humorous collection of real-life email conversations. When John Lindsay launched DontEvenReply.com in June 2009, it became an instant sensation. With 60% of the book featuring entirely new material never before available on the website, Emails from an Asshole offers fans a fresh opportunity to revel in people's gullibility. Posing as a customer or seller, Lindsay responded to a variety of classified ads, making ridiculous offers to unsuspecting victims. Their responses, and the ensuing conversations, will have readers simultaneously laughing non-stop and gasping with disbelief. "It's like Sasha Baron Cohen on the internet." -Jane Wells, CNBC

**The Canon** Natalie Angier,2008-04-03 The New York Times bestseller that makes scientific subjects both understandable and fun: "Every sentence sparkles with wit and charm." -Richard Dawkins From the Pulitzer Prize-winning New York Times science journalist and bestselling author of Woman, this is a playful, passionate guide to the science all around us (and inside us)-from physics to chemistry, biology, geology, astronomy, and more. Drawing on conversations with hundreds of the world's top scientists, Natalie Angier creates a thoroughly entertaining guide to scientific literacy. For those who want a fuller understanding of some of the great issues of our

time, The Canon offers insights on stem cells, bird flu, evolution, and global warming. For students—or parents whose kids ask a lot of questions about how the world works—it brings to life such topics as how the earth was formed, or what electricity is. Also included are clear, fascinating explanations of how to think scientifically and grasp the tricky subject of probability. The Canon is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder—and along the way, tells us what is actually happening when our ice cream melts or our coffee gets cold, what our liver cells do when we eat a caramel, why the horse is an example of evolution at work, and how we’re all really made of stardust.

**Alternative Energy Sources** Efsthathios E. Stathis Michaelides, 2012-01-16 Alternative Energy Sources is designed to give the reader, a clear view of the role each form of alternative energy may play in supplying the energy needs of the human society in the near future (20-50 years). The two first chapters on energy demand and supply and environmental effects, set the tone as to why alternative energy is essential for the future. The third chapter gives the laws of energy conversion processes, as well as the limitations of converting one energy form to another. The section on exergy gives a quantitative background on the capability/potential of each energy source to produce power. The fourth, fifth and sixth chapters are expositions of fission and fusion nuclear energy, the power plants that may produce power from these sources and the issues that will frame the public debate on nuclear energy. The following five chapters include descriptions of the most common renewable energy sources (wind, solar, geothermal, biomass, hydroelectric) some of the less common sources (e.g. tidal and wave energy). The emphasis of these chapters will be on the global potential of each source, the engineering/technical systems that are used in harnessing the potential of each source, the technological developments that will contribute to wider utilization of the sources and environmental effects associated with their wider use. The last three chapters are: energy storage, which will become an important issue if renewable energy sources are used widely. The fourteen chapters in the book have been chosen so that one may fit a semester University course around this book. At the end of every chapter, there are 10-20 problems and 1-3 suggestions of semester projects that may be assigned to students for further research.

**Car Guys vs. Bean Counters** Bob Lutz, 2013-05-28 “One of the most acute books about management and how companies work in practice that I have read in a long time. If anyone wants to know exactly how the U.S. auto industry got into trouble, here is your guide.” —John Gapper, FINANCIAL TIMES When Bob Lutz got into the auto business in the early 1960s, CEOs knew that if you captured the public’s imagination with innovative car design and top-quality craftsmanship, the money would follow. The “car guys” held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM’s leadership began to put its faith in numbers and spreadsheets. Determined to eliminate the “waste” and “personality worship” of the bygone creative leaders, management got too smart for its own good. With the bean counters firmly in charge, carmakers, and much of American industry, lost their single-minded focus on product excellence and their competitive advantage. Decline soon followed. In 2001, General Motors hired Lutz out of retirement with a mandate to save the company by making great cars again. As vice chairman, he launched a war against the penny-pinching number crunchers who ran the company by the bottom line and reinstated a focus on creativity, design, and cars and trucks that would satisfy GM’s customers. Lutz’s commonsense lessons, combined with a generous helping of fascinating anecdotes, will inspire readers in any industry.

**The Measure of Man and Woman** Alvin R. Tilley, Henry Dreyfuss Associates, 2001-12-31 Human factors research impacts everything from the height of kitchen counters to the placement of automobile pedals to a book's type size. And in this updated and expanded version of the original landmark work, you'll find the research information necessary to create designs that better accommodate human need. Featuring more than 200 anthropometric drawings, this handbook is filled with all of the essential measurements of the human body and its relationship to the designed environment. You'll also discover guidelines for designing for children and the elderly, for the digital workplace, and for ADA compliance. Measurements are in both English and metric units.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

**Hummer** Michael Bradley, 2009 From military missions to trips to the mall, the Hummer is truly a unique vehicle. It's big, it's tough, and it has rolled its way onto American roads. Let's take a ride through the history of the Hummer with Sports Illustrated for Kids author Michael Bradley! Book jacket.

**Crap Cars** Richard Porter, 2005-10-01 Offers a window into the vanity and silliness of almost every decade as expressed by the ultimate status symbol of the car, showcasing the cheapest, tackiest, and most mechanically inept vehicles built from the 1960s to the 1990s.

**Man and Machine** Stephan Wilkinson, 2005-12-01 They sit on a spur of test track outside General Electric's locomotive factory in Erie, Pennsylvania, panting and grumbling like two old lions half asleep. The ominous, muttering rumble is the idle of 8,800 horsepower--24 cylinders with pistons big as buckets, turbochargers the size of washing machines, two V12 engines driving alternators five feet in diameter. For here are two units of the most advanced diesel-electric locomotives in the world: a pair of GE Evolutions.--Excerpt from Do the Locomotion in Man and Machine Stephan Wilkinson--a longtime expert on the ways men entertain themselves when no one is telling them what to do--takes readers into the high-speed, high-risk world of restored jets, fast boats, and Formula 1 cars. Wilkinson visits a factory where Amish men build custom ambulances, flies an airliner from the glory days of air travel, meets a bird that is a killing machine, and has a hot date with a handgun. In another chapter, Wilkinson relates the hazards of flying purely on instruments, and why being able to do so can make the difference between life and death. He draws from his own misadventures in flight and explains exactly why the high-end Beech Bonanza is known as “the doctor killer.” And dissecting the finely tuned instrument that is the Formula 1 car, Wilkinson relates how the engine's connecting rods actually stretch at 19,000 rpm, even though they're made of titanium, and what can happen when a racecar brakes at 6Gs. Always entertaining, Wilkinson takes men, and maybe even a few women, where they love to go--under the hood, over the mechanic's shoulder, and behind the wheel.

**Icons and Idiots** Bob Lutz, 2013-06-04 When Bob Lutz retired from General Motors in 2010, after an unparalleled forty-seven-year career in the auto industry, he was one of the most respected leaders in American business. He had survived all kinds of managers over those decades: tough and timid, analytical and irrational,

charismatic and antisocial, and some who seemed to shift frequently among all those traits. His experiences made him an expert on leadership, every bit as much as he was an expert on cars and trucks. Now Lutz is revealing the leaders-good, bad, and ugly-who made the strongest impression on him throughout his career. Icons and Idiots is a collection of shocking and often hilarious true stories and the lessons Lutz drew from them. From enduring the sadism of a Marine Corps drill instructor, to working with a washed-up alcoholic, to taking over the reins from a convicted felon, he reflects on the complexities of all-too-human leaders. No textbook or business school course can fully capture their idiosyncrasies, foibles and weaknesses – which can make or break companies in the real world. Lutz shows that we can learn just as much from the most stubborn, stupid, and corrupt leaders as we can from the inspiring geniuses. The result is a powerful and entertaining guide for any aspiring leader.
