**Adaptation in the Age of Media Convergence** Johannes Fehrle, Werner Schäfke-Zell, 2019-09-06 This collection considers new phenomena emerging in a convergence environment from the perspective of adaptation studies. Giving an overview of the various fields and practices most prominent in convergence culture and viewing them as adaptations in a broad intertextual and intermedial sense, the contributions offer reconsiderations of theoretical concepts and practices in participatory and convergence culture. These range from fan fiction born from mash-ups of novels and YouTube songs to negotiations of authorial control and interpretative authority between media producers and fan communities to perspectives on the fictional and legal framework of brands and franchises. In this fashion, the collection expands the horizons of both adaptation and transmedia studies and provides reassessments of frequently discussed (BBC's Sherlock or the LEGO franchise) and previously largely ignored phenomena (self-censorship in transnational franchises, mash-up novels, or YouTube cover videos).

**Comprehensive and Molecular Phytopathology** Yuri Dyakov, Vitaly Dzhavakhiya, Timo Korpela, 2007-01-09 This book offers a collection of information on successive steps of molecular 'dialogue' between plants and pathogens. It additionally presents data that reflects intrinsic logic of plant-parasite interactions. New findings discussed include: host and non-host resistance, specific and nonspecific elicitors, elicitors and suppressors, and plant and animal immunity. This book enables the reader to understand how to promote or prevent disease development, and allows them to systematize their own ideas of plant-pathogen interactions. \* Offers a more extensive scope of the problem as compared to other books in the market \* Presents data to allow consideration of host-parasite relationships in dynamics and reveals interrelations between pathogenicity and resistance factors \* Discusses beneficial plant-microbe interactions and practical aspects of molecular investigations of plant-parasite relationships \* Compares historical study of common and specific features of plant immunity with animal immunity

Other key topics examined include: carbon auditing of supply chains; transferring freight to greener transport modes; reducing the environmental impact of warehousing; improving the energy efficiency of freight transport; making city logistics more environmentally sustainable; reverse logistics for the management of waste; role of government in promoting sustainable logistics. The 3rd edition of Green Logistics includes indispensable online supporting materials, including graphics, tables, chapter

summaries, and guidelines for lecturers.

Bastard Or Playmate? Robrecht Vanderbeeken, 2012 Artistic media seem to be in a permanent condition of mutation and transformation. Contemporary artists often investigate the limits and possibilities of the media they use and experiment with the crossing, upgrading and mutilation of media. Others explicitly explore the unknown intermedial space between existing media, searching for the hybrid beings that occupy these in-betweens. This issue of Theater topics explores the theme of mutating and adapting media in its relation with theatre and performance--P. [4] of cover.

The Engagements J. Courtney Sullivan, 2013-06-11 A People Magazine Top 10 Best Books of the Year • The New York Times best-selling author of *Maine* returns with an exhilarating novel about Frances Gerety, the real pioneering ad woman who coined the famous slogan “A Diamond is Forever,” and four unique marriages that will test how true—or not—those words might be. Sullivan is a born storyteller. Like its mineral muse, *Engagements* shines.—Entertainment Weekly Evelyn has been married to her husband for forty years, but their son’s messy divorce has put them at rare odds; James, a beleaguered paramedic, has spent most of his marriage haunted by his wife’s family’s expectations; Delphine has thrown caution to the wind and left a peaceful French life for an exciting but rocky romance in America; and Kate, partnered with Dan for a decade, has seen every kind of wedding and has vowed never, ever, to have one of her own. As the stories connect to each other and to Frances’s legacy in surprising ways, *The Engagements* explores the complicated ins and outs of relationships, then, now, and forever.

Animal Manure Recycling Sven G. Sommer, Morten L. Christensen, Thomas Schmidt, Lars Stoumann Jensen, 2013-07-15 A rapidly changing and expanding livestock and poultry production sector is causing a range of environmental problems on local, regional and global scales. *Animal Manure Recycling: Treatment and Management* presents an accessible overview of environmentally friendly technologies for managing animal manure more efficiently and in a sustainable manner. Parallel Agile – faster delivery, fewer defects, lower cost Doug Rosenberg,Barry Boehm,Matt Stephens,Charles Suscheck,Shobha Rani Dhalipathi,Bo Wang,2020-01-03 From the beginning of software time, people have wondered why it isn't possible to accelerate software projects by simply adding staff. This is sometimes known as the "nine women can't make a baby in one month" problem. The most famous treatise declaring this to be impossible is Fred

Brooks' 1975 book *The Mythical Man-Month*, in which he declares that "adding more programmers to a late software project makes it later," and indeed this has proven largely true over the decades. Aided by a domain-driven code generator that quickly creates database and API code, Parallel Agile (PA) achieves significant schedule compression using parallelism: as many developers as necessary can independently and concurrently develop the scenarios from initial prototype through production code. Projects can scale by elastic staffing, rather than by stretching schedules for larger development efforts. Schedule compression with a large team of developers working in parallel is analogous to hardware acceleration of compute problems using parallel CPUs. PA has some similarities with and differences from other Agile approaches. Like most Agile methods, PA gets to code early and uses feedback from executable software to drive requirements and design. PA uses technical prototyping as a risk-mitigation strategy, to help sanity-check requirements for feasibility, and to evaluate different technical architectures and technologies. Unlike many Agile methods, PA does not support design by refactoring, and it doesn't drive designs from unit tests. Instead, PA uses a minimalist UML-based design approach (Agile/ICONIX) that starts out with a domain model to facilitate communication across the development team, and partitions the system along use case boundaries, which enables parallel development. Parallel Agile is fully compatible with the Incremental Commitment Spiral Model (ICSM), which involves concurrent effort of a systems engineering team, a development team, and a test team working alongside the developers. The authors have been researching and refining the PA process for several years on multiple test projects that have involved over 200 developers. The book's example project details the design of one of these test projects, a crowdsourced traffic safety system.

**Friends** Rosella Calauti,2011-12-30 Friends Here... There... Everywhere... was written to enhance social and literacy development in young children, ages two to five. Growth occurs at different rates for each child in this very important period of development that occurs rapidly, as they learn to become independent. The book encourages young children to feel secure as they develop, and experience their first encounters of making friends, while they explore the world and continue to become individuals. It is ideal for teachers, parents, and caregivers who wish to discuss how to share and play cooperatively. In addition to the topic of building friendships, this book helps develop recognition of words that are opposites and introduces adverbs (here, there, and everywhere). It can motivate children to inquire about friendships, relate to them, and suggests places to find friends, while strengthening reading and writing skills.

**The King Who Banned the Dark** Emily Haworth-Booth,2020-11-27 Waterstones' Children's Book Prize 2019, Klaus Flugge Prize 2019 and Independent Bookshop Week Awards 2019 There was once a little boy who was afraid of the dark. There's nothing unusual about that. Most children are afraid of the dark at one time or another. But this little boy was a Prince, and he decided that when he became King, he would do something about the dark. He would ban it. When the King bans the dark completely, installing an artificial sun, and enforcing anti-dark laws, it seems like a good idea. The citizens don't need to worry about any of the scary things that might live in the dark. But what happens when nobody can sleep, and the citizens revolt? Will the King face his fears and turn the lights off? The King Who Banned the Dark is a beautiful and thought-provoking story about how we need the dark in order to enjoy the light.

**Shooting Incident Reconstruction** Michael G. Haag,Lucien C. Haag,2020-10-10 Shooting Incident Reconstruction, Third Edition, offers a thorough explanation of matters from simple to complex to help the reader understand the factors surrounding ballistics, trajectory, and shooting scenes. Forensic scientists, law enforcement, and crime scene investigators are often tasked with reconstruction of events based on crime scene evidence, along with the subsequent analysis of that evidence. The use and misuse of firearms to perpetrate crimes from theft to murder necessitates numerous invitations to reconstruct shooting incidents. The discharge of firearms and the behavior of projectiles create many forms of physical evidence that, through proper testing and interpretation by a skilled forensic scientist, can establish what did and what did not occur. Written by the world's most well-respected shooting scene and ballistics experts, the book addresses the terminology, science, and factors involved in reconstructing shooting incident events to solve forensic cases. It covers the full range of related topics

including: the range from which a firearm was discharged; the sequence of shots in a multiple discharge shooting incident; the position of a firearm at the moment of discharge; and the position of a victim at the moment of impact. The probable flight path of a projectile and the manner in which a firearm was discharged are also discussed. Case studies illustrate real-world application of technical concepts, supported by over 200 full-color diagrams and photographs. This book will be of value to practicing forensic scientists (firearm and toolmark examiners), ballistics experts, crime scene personnel, police departments, forensic consultants (generalists), attorneys and judges, medical examiners (coroners), and forensic pathologists. New chapters on special reconstructive properties and value of shootings involving sub-machine guns or pseudo automatic firearms, rate of fire with special attention on shot-to-shot time intervals, human factors in shooting incidents Updated and revised glossary terms to fit with new technology and the emergence of standardization of terms by groups such as the Organization of Scientific Advisory Committees Provides clear practice standards and ethical guidelines for those involved in reconstructing shooting scenes

**Advanced Hybrid and Electric Vehicles** Michael Nikowitz,2016-04-05 This contributed volume contains the results of the research program "Agreement for Hybrid and Electric Vehicles", developed in the framework of the Energy Technology Network of the International Energy Agency. The topical focus lies on technology options for the system optimization of hybrid and electric vehicle components and drive train configurations which enhance the energy efficiency of the vehicle. The approach to the topic is genuinely interdisciplinary, covering insights from fields. The target audience primarily comprises researchers and industry experts in the field of automotive engineering, but the book may also be beneficial for graduate students.

**Andrea Fraser** Andrea Fraser,Rhea Anastas,Alejandro Cesarco,2019 This publication is a substantial archive and a singular point of entry into thinking with and understanding Andrea Fraser's work and reception. The interview format provides intimate insight into Fraser's self-positioning as a central aspect of her practice. By presenting the artist's voice as mediated through interlocutors ranging from professional peers to popular media, 'Collected Interviews, 1990-2018' uniquely contextualizes Fraser's practice in the artistic, institutional, and discursive fields in which she intervenes. As Fraser is engaged, challenged, and understood from diverse perspectives, readers learn as much about her artistic commitments from the artist's humor and affect as from her incisive analyses. The collection spans three decades, from the early 1990s to the present, and is organized chronologically with minimal editing. The collection's unmediated format allows Fraser's key ideas and themes to attain deeper resonance through repetitions and subtle differentiations over multiple conversations.
