**Eugen Sänger**

*Amazing Stories of the Space Age* Rod Pyle, 2017 Reveals the most unusual space missions ever devised inside and outside of NASA during a time when nothing was too odd to be taken seriously, and the race to the moon and the threat from the Soviet Union trumped all other considerations. --Publisher.

*Rocket Flight Engineering* Eugen Sänger, 1965

**A Rocket Drive for Long Range Bombers** Eugen Sänger, 1952

*Weapons of World War II* Matt Doeden, 2017-09-15 Countries from all over the globe fought in World War II. Check out this book to find out more about the weapons used in World War II.

**The Peenemünde Wind Tunnels** Peter P. Wegener, 1996-01-01 In 1943, on orders from the German Air Ministry, young physicist Peter P. Wegener left the Russian front and reported to the Baltic village of Peenemünde. His assignment was to work at the supersonic wind tunnels of the rocket laboratories of the German Army. Here Wernher von Braun led a team that developed the V-2, the world's first large rocket-powered guided missile, and laid much of the groundwork for postwar rocket development. In this fascinating book, Wegener recounts his experiences during Hitler's time, World War II, and his years at Peenemünde. He tells how he was working one night in August 1943 when the Allies bombed the laboratories, but left the wind tunnels undamaged. The tunnels were moved to Bavaria, and Wegener was ordered to follow in 1944. After the war, the tunnels were moved again--this

time to the United States, accompanied by the author and other German scientists. Shortly before the end of the war, Wegener visited Germany's underground V-2 production plant to retrieve archival material on aerodynamics that had been stored in caves for safekeeping. He describes the appalling history of the concentration camps where SS guards watched over inmates who toiled underground in inhuman conditions and often did not survive. A photoessay enhances this remarkable memoir.

*Sänger* David Myhra, 2002-01-01 Eugen Sänger's proposed manned, bi-fuel, liquid rocket-powered orbital bomber was truly mid-1940s high tech. The world's first intercontinental bomber project, the Sänger orbital bomber's total flight time was expected to be no more than two hours. Fascinating stuff. The complete story is told here for the first time.

**My Commando Operations** Otto Skorzeny, 1995 The memoirs of the legendary Skorzeny appear here in its first unabridged English edition. Skorzeny's fame began with the successful raid to free Benito Mussolini from the Gran Sasso, Italy in 1943. His elite commandos surprised Italian guards in a daring daytime raid. Hitler presented Skorzeny with the Knight's Cross for this operation. Not only is this raid explained in minute detail, many of Skorzeny's previously unknown operations in all European and Russian theatres of World War II are given in detailed accounts. Operation Griffin - the innovative use of German Kommandos dressed as American soldiers working behind enemy lines - during the Ardennes Offensive in 1944 is given in-depth

coverage, as is Skorzeny's remembrances on the Malmedy massacre. Skorzeny also offers his insights into the mysterious Rudolf Hess mission to England in May 1941, and offers a behind the scenes look at German and Russian secret military intelligence, and the workings of Canaris and Gehlen.

The Mars Project Wernher Von Braun, 1953 This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in The Mars Project.

**Critical Mass** Carter Plymton Hydrick, 2004 The true story of the Manhattan Project you haven't heard about! On May 19, 1945, eleven days after the surrender of Nazi Germany in Europe, a U-boat was escorted into Portsmouth Naval Yard, New Hampshire. News reporters covering the surrender of U-234 were ordered, contrary to all previous and later U-boat surrender procedures, to keep their distance from crew members and passengers of U-234, on threat of being shot by the attending Marine guards. Why the tight security? Buried in the nose of the mammoth boat, sealed in cylinders lined with gold, was 560

kilograms, 1,120 pounds, of enriched uranium oxide labeled U235-the fissile material from which atom bombs are made. Following ten years of research, author Carter Hydrick presents documentation that demonstrates surrendered German components from U-234 were used by the Manhattan Project to complete both the uranium bomb dropped on Hiroshima and the plutonium bomb dropped on Nagasaki to defeat the Japanese, win World War Two and usher in the Nuclear Age.

**The Problem with Space Travel** Herman Noordung,1995-03 A translation from German of a 1929 treatise by the author. Deals with the problem of the space travel. Expresses ideas about rocketry and space travel. Extensive treatment of the engineering aspects of a space station. Extensive bibliography. 100 drawings.

**The Wages of Destruction** Adam Tooze,2008-02-26 Masterful . . . [A] painstakingly researched, astonishingly erudite study...Tooze has added his name to the roll call of top-class scholars of Nazism. -Financial Times An extraordinary mythology has grown up around the Third Reich that hovers over political and moral debate even today. Adam Tooze's controversial book challenges the conventional economic interpretations of that period to explore how Hitler's surprisingly prescient vision--ultimately hindered by Germany's limited resources and his own racial ideology--was to create a German super-state to dominate Europe and compete with what he saw as America's overwhelming power in a soon-to- be globalized world. The Wages of

Destruction is a chilling work of originality and tremendous scholarship that set off debate in Germany and will fundamentally change the way in which history views the Second World War.

**Chasing 193** Ryan Trapp, Lee Abbamonte, 2015-05-19 There are 193 official countries on Earth. Fewer than 100 people have seen them all. The 34 people interviewed for this book have made it their life mission to visit every last one of them. Jam-packed with nearly 500 pages, these revealing Q&A interviews examine the lives of ordinary people who have undertaken extraordinary travels in their quest to visit every country in the world. Learn about their adventures and explore the highs and lows of what it means to be an extreme traveler, from near-death experiences to moments that have left even the most jaded traveler speechless. How did they do this? What have they sacrificed? What compelled these people to go beyond the realm of the ordinary tourist to see the entire world? The answers to these questions and more are contained in this rare look inside the minds of some of the world's most-traveled people. Their stories, ranging from being questioned by U.S. Special Forces while doing a solo tour of war-torn Iraq, to showing a Costco ID card in order to tour a restricted launching place for space satellites in French Guiana, to entering Libya during Arab Spring and getting caught in the cross fire of cigarette smugglers, and many more, are guaranteed to fascinate and entertain every travel fan.

*Target: America* James Duffy, 2011-11-08 Details the Third Reich's shocking

plans for worldwide offensives using secret weapons, including Hitler's plan to bring World War II to the American homeland.

*Hitler's Women* Guido Knopp, 2003 First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

*The Third Reich at War* Richard J. Evans, 2009 The final volume in Richard J. Evans's masterly trilogy on the history of Nazi Germany traces the rise and fall of German military might, the mobilization of a 'people's community' to serve a war of conquest, and Hitler's campaign of racial subjugation and genocide Already hailed as 'a masterpiece' (William Grimes in The New York Times) and 'the most comprehensive history' of the Third Reich' (Ian Kershaw), this epic trilogy reaches its terrifying climax in this volume. Evans interweaves a broad narrative of the war's progress with viscerally affecting personal testimony from a wide range of people'from generals to front-line soldiers, from Hitler Youth activists to middle-class housewives. The Third Reich at War lays bare the dynamics of a nation more deeply immersed in war than any society before or since. Fresh insights into the conflict's great events are here, from the invasion of Poland to the Battle of Stalingrad to Hitler's suicide in the bunker. But just as important is the re-creation of the daily experience of ordinary Germans in wartime, staggering under pressure from Allied bombing and their own government's mounting demands upon them. At the center of the book is the Nazi extermination of Europe's Jews, set in the context of Hitler's genocidal

plans for the racial restructuring of Europe. Blending narrative, description and analysis, The Third Reich at War creates an engrossing picture 'at once sweeping and precise' of a society rushing headlong to self-destruction and taking much of Europe with it. It is the culmination of a historical masterwork that will remain the most authoritative work on Nazi Germany for years to come.

Nuclear Reactor Experiments Argonne National Laboratory, 1958

**Hitler's Uranium Club** Jeremy Bernstein, 2013-03-09 From April through December of 1945, ten of Nazi Germany's greatest nuclear physicists were detained by Allied military and intelligence services in a kind of gilded cage at Farm Hall, an English country manor near Cambridge. The physicists knew the Reich had failed to develop an atomic bomb, and they soon learned, from a BBC radio report on August 6, that the Allies had succeeded in their own efforts to create such a weapon. But what they did not know was that many of their meetings and private conversations were being monitored and recorded by British agents. This book contains the complete collection of transcripts that were made from these secret recordings, providing an unprecedented view of how the German scientists, including two Nobel Laureates, thought and spoke about their roles during the war.

**Von Braun** Michael Neufeld, 2017-04-12 Curator and space historian at the Smithsonian's National Air and Space Museum delivers a brilliantly nuanced biography of controversial space pioneer Wernher von Braun. Chief rocket

engineer of the Third Reich and one of the fathers of the U.S. space program, Wernher von Braun is a source of consistent fascination. Glorified as a visionary and vilified as a war criminal, he was a man of profound moral complexities, whose intelligence and charisma were coupled with an enormous and, some would say, blinding ambition. Based on new sources, Neufeld's biography delivers a meticulously researched and authoritative portrait of the creator of the V-2 rocket and his times, detailing how he was a man caught between morality and progress, between his dreams of the heavens and the earthbound realities of his life.

**The Rocket into Planetary Space** Hermann Oberth, 2014-10-22 For all being interested in astronautics, this translation of Hermann Oberth's classic work is a truly historic event. Readers will be impressed with this extraordinary pioneer and his incredible achievement. In a relatively short work of 1923, Hermann Oberth laid down the mathematical laws governing rocketry and spaceflight, and he offered practical design considerations based on those laws.
