Nissan Z Pete Evanow, 2020 Nissan Z: 50 Years of Exhilarating Performance is a handsomely illustrated coffee-table book celebrating five decades of Nissan's immensely popular Z-Cars, from the ground-breaking 1970 240Z to today's top-performing 370Z, including the 50th anniversary Z. The story begins with the introduction of Nissan's (then Datsun) first foray into the sports-car world, the Datsun Roadster then gets into the details regarding the creation of the legendary 240Z. Each derivative is explored: including 260Z, 280Z, 280ZX, 300ZX through today's 370Z. Nissan's Z is one of the few sports car models to be in production for 50 years, and Nissan Z pays fitting tribute to its proud heritage--

Flammang, 1992 This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagen. Also in these pages, you'll find details on such lesser-known yet no less

intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

The Creative Priority Jerry Hirshberg, 1999-01-06 How does your company define creativity? Or does creativity define your company? In this remarkable book, Jerry Hirshberg, founder and president of Nissan Design International (NDI), distills his experience as leader of the world's hotbed of automotive innovation and reveals his strategy for designing an organization around creativity. In The Creative Priority Hirshberg weaves together enlightening real-world anecdotes with the story of NDI's genesis to illustrate eleven interlocking strategies that came to define NDI's creative priority. Richly illustrated with NDI's elegant designs and sketched, The Creative Priority is at once a compelling narrative, a rich store of hands-on experience, and a grab bag of breakthrough insights that can help your business perform its most vital function.

The Ware Tetralogy Rudy Rucker, 2019-04-02 Rucker's four Ware novels—Software, Wetware, Freeware, and Realware—form an extraordinary cyberweird future history with the heft of an epic fantasy novel and the speed of a quantum processor. Still exuberantly fresh despite their age, they primarily follow two characters (and their descendants): Cobb Anderson, who instigated the first robot revolution and is offered immortality by his grateful “children,” and stoner Sta-Hi Mooney, who (against his impaired better judgment) becomes an important figure in robot-human

relations. Over several generations, humans, robots, drugs, and society evolve, but even weird drugs and the wisdom gathered from interstellar signals won't stop them from making the same old mistakes in new ways. Rucker is both witty and serious as he combines hard science and sociology with unrelentingly sharp observations of all self-replicating beings. This classic series well deserves its omnibus repackaging, particularly suitable for libraries.

— Publisher's Weekly. Rudy Rucker is one of the modern heroes of science fiction, one of the original cyberpunks. The early cyberpunks only had a few writers who could be meaningfully called punks — writers like John Shirley and Richard Kadrey — but there was only one who could truly be called cyber: Rudy Rucker. Rucker is a mad professor, a mathematician and computer scientist with a serious, scholarly interest in the limits of computation and the physics and mathematics of higher-dimension geometry. But that's just about the only thing you can describe as 'serious' when it comes to Rucker. He's a gonzo wildman, someone for whom 'trippy' barely scratches the surface. His work is shot through with weird sex, weird drugs, weird brain chemistry, and above all, weird science. — Cory Doctorow

The Glass Hammer K. W. Jeter, 1987 Ross Schuyler is a star. He drives his racer across the Arizona desert, carrying black market computer chips--running a nightly gauntlet of government satellite tracking systems firing explosive, pulse-phase particle beams--to reach the safety and rewards of L.A. His life story is being broadcast around the world, and he's been heralded as the father of the newborn god. Then his microcomputer starts whispering warnings of conspiracy and doom--and suddenly Schuyler must choose between the familiar dangers of the satellites and the perils of an all-seeing yet faceless enemy.
