Andy Warhol Andy Warhol,2002 When we were making the 5 Deaths paintings, with the car upside down and the people underneath, Andy asked, 'Are they still alive?' as if the accident had actually occurred in front of us. --Gerard Malanga Within Warhol's Death and Disaster series, the so-called Car Crashes comprise the most numerous and diverse set of images. As Gerard Malanga writes in his accompanying essay, We would return to this silkscreen again and again for several months; in effect, the first painting repeated many times over, this initiating Andy's serial imagery on separate identically shaped canvases, and anticipating the Flower paintings to come. The book also includes a contemporary interview between Malanga and Jeff Koons as well as a reprint of an interview between Malanga and Warhol from 1963.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Outsider in Amsterdam Janwillem van de Wetering, 2003-07-01 [Van de Wetering] is doing what Simenon might have done if Albert Camus had sublet his skull. —John Leonard On a quiet street in downtown Amsterdam, a man is found hanging from the ceiling beam of his bedroom, upstairs from the new religious society he founded: a group that calls itself “Hindist” and supposedly mixes elements of various Eastern traditions. Detective-Adjutant Gripstra and Sergeant de Gier of the Amsterdam police are sent to investigate what looks like a simple suicide, but they are immediately suspicious of the circumstances. This now-classic novel, first published in 1975, introduces Janwillem van de Wetering's lovable Amsterdam cop duo of portly, wise Gripstra and handsome, contemplative de Gier. With its unvarnished depiction of the legacy of Dutch colonialism and the darker facets of Amsterdam's free drug culture, this excellent procedural asks the question of whether a murder may ever be justly committed.

Basics of Geomatics Mario A. Gomarasca, 2009-09-18 Geomatics is a neologism, the use of which is becoming increasingly widespread, even if it is not still universally accepted. It includes several disciplines and techniques for the study of the Earth's surface and its environments, and computer science plays a decisive role. A more meaningful and appropriate expression is G- spatial Information or GeoInformation. Geo-spatial Information embeds topography in its more modern forms (measurements with electronic instrumentation, sophisticated techniques of data analysis and network compensation, global satellite positioning techniques, laser scanning, etc.), analytical and digital photogrammetry, satellite and airborne remote sensing, numerical cartography, geographical information systems, decision support systems, WebGIS, etc. These specialized elds are intimately interrelated in

terms of both the basic science and the results pursued: rigid separation does not allow us to discover several common aspects and the fundamental importance assumed in a search for solutions in the complex survey context. The objective pursued by Mario A. Gomarasca, one that is only apparently modest, is to publish an integrated text on the surveying theme, containing simple and comprehensible concepts relevant to experts in Geo-spatial Information and/or specially in one of the disciplines that compose it. At the same time, the book is rigorous and synthetic, describing with precision the main instruments and methods connected to the multiple techniques available today.

Engineering Surveying W Schofield, Mark Breach, 2007-02-14 Engineering surveying involves determining the position of natural and man-made features on or beneath the Earth's surface and utilizing these features in the planning, design and construction of works. It is a critical part of any engineering project. Without an accurate understanding of the size, shape and nature of the site the project risks expensive and time-consuming errors or even catastrophic failure. This fully updated sixth edition of Engineering Surveying covers all the basic principles and practice of the fundamentals such as vertical control, distance, angles and position right through to the most modern technologies. It includes: * An introduction to geodesy to facilitate greater understanding of satellite systems * A fully updated chapter on GPS, GLONASS and GALILEO for satellite positioning in surveying * All new chapter on the important subject of rigorous estimation of control coordinates * Detailed material on mass data methods of photogrammetry and laser scanning and the role of inertial technology in them With many worked examples and illustrations of tools and techniques, it suits students and professionals alike involved in surveying, civil, structural and mining engineering, and related areas such as geography and mapping.

Of Corpse Peter Narvaez, 2003-07 Laughter, contemporary theory suggests, is often aggressive in some manner and may be prompted by a sudden perception of incongruity combined with memories of past emotional experience. Given this importance of the past to our recognition of the comic, it follows that some traditions dispose us to ludic responses. The studies in *Of Corpse: Death and Humor in Folklore and Popular Culture* examine specific interactions of text (jokes, poetry, epitaphs, iconography, film drama) and social context (wakes, festivals, disasters) that shape and generate laughter. Uniquely, however, the essays here peruse a remarkable paradox---the convergence of death and humor.

Abarth Buyer's Guide Peter Vack, 2003-04-01 Carlo Abarth was a performance tuning maestro. He created and modified the small displacement Italian cars of the times, adding his own tuned exhausts, cylinder heads and other components. The results were championship-winning racers and street cars. The Abarth Buyer's Guide tells the story of all the Abarth cars, including the earliest Cisitalias, Fiats, Simcas, the Zagato and Bialbero cars, Porsche Abarth Carrera, Lancias, formula cars, record-setters and the sports racers. The book is built on an impressive archive of historical photographs, many of them rare original Abarth factory pictures. The detailed text chronicles the development history of Abarth, including specifications, restoration and authenticity notes, and the Buyer's Guide star investment ratings. Author Peter Vack is an Abarth enthusiast of long standing, and he writes of the cars with passion and experience. Over a period of 13 years, the Abarth Buyer's Guide has proven to be a very dependable and useful book for those interested in Abarth cars. Now in its third printing, it remains one of the best and most comprehensive Abarth books ever written. Of that we are proud. We hope that it will continue to encourage others to do further research and create enthusiasm for the restoration of all Abarths.
