The UK Pesticide Guide 2017 M. A.

Lainsbury, 2017-01-06 The UK Pesticide Guide 2017 has seven new active ingredient profiles. Two are confirmed as available in 2017 while five are currently only listed as Products also Registered (PARs). The two available are: - cyantraniliprole for insect control in headed brassicas - halauxifen-methyl +/- fluroxypyr for broad-leaved weed control in cereals. The five awaiting confirmation are: - buprofezin for insect control in protected Solonaceae - pethoxamid for weed control in grain maize and winter

oilseed rape - Pepino Mosaic Virus for suppression of viral diseases in protected tomatoes - Pythium oligandrum M1 for disease control in spring barley, wheat, and oilseed rape - Tembotrione for weed control in maize and sweetcorn. In addition, hazard precautions have been upgraded, and the roll out of extended buffer zones for some products continues with many products re-approved under new MAPP numbers. There are also: - Seven new herbicide profiles-- four in the main section and three as PARs - Eight new fungicide profiles-- six in the main section and two as PARs - One new plant growth regulator (PGR) combination and one new molluscicide. The main section of the guide no longer includes eight herbicide profiles (tepraloxym approval expires 30/11/ 2016), 17 fungicides (including prochloraz), four insecticides, and one PGR.

The UK Pesticide Guide 2020 Martin A.

Lainsbury, 2020 By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva Agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.
