Evaluation of Iroquois UH-1B Stability and Control L. R. Ward, AIRCRAFT RESEARCH AND DEVELOPMENT UNIT EDINBURGH (Australia), 1982 The purpose of this investigation was to evaluate the forward flying qualities of the Iroquois UH-1B helicopter for the Training and SAR missions as conducted by the Royal Australian Air Force. Several unsatisfactory handling characteristics were identified. Highly undesirable features included the rapidly divergent longitudinal long term response in maximum power climbs; excessive vibration levels; coupling of sideslip to pitching moments; excessive trim changes when transitioning from climb to descent; and non-linearities in the collective fixed static longitudinal stability gradients in maximum power climbs. Undesirable features included the level flight gust response; longitudinal control response in level flight; lateral-directional oscillation; and adverse yaw. Possible causes of the extremely divergent longitudinal long term response in high powered climbs and the sideslip-pitch coupling are discussed.

Evaluation of New Iroquois Torquemeter PN 73-30-1 L. R. Ward, AIRCRAFT RESEARCH AND DEVELOPMENT UNIT EDINBURGH (Australia), 1982 The purpose of this investigation was to supervise the installation of a prototype torquemeter in an Iroquois UH-1H and to evaluate the accuracy, damping, drift and ergonomic aspects of the new torquemeter. Tests showed that torquemeter accuracy was unacceptable and the indicating system was prone to significant drift. Tradesmen found adjustment of the 'zero set' difficult to perform due to poor access to the adjustment screw. Instrument markings in the range greater than 30 psi were obscured when viewed from the co-pilot's seat. The night-lighting of the instrument and the reflection characteristics of the glass cover were also unsatisfactory. The procedure for torquemeter adjustment for installed engine Data Plate Torque was found to be in error and a revised procedure is proposed. Several modifications to the instrument are recommended to be made before fleet-wide installation. A limited number of flight tests should be made to check that the production torquemeter and the new performance calculator are compatible. If significant delays occur before introduction of a suitable production torquemeter, an interim method of displaying maximum permissible torque is proposed.

Federated Defense in the Middle East Jon B. Alterman, Kathleen H. Hicks, 2015-10-01 This study examines the potential for a "federated defense" approach to U.S. action in the Middle East, the constraints to closer military cooperation in the region, and specific capability areas that would benefit from federated defense.

Sea Harrier Over the Falklands Commander 'Sharkey' Ward, DSC, AFC, RN, 1993-08-05 Sharkey Ward commanded 801 Naval Air Squadron, HMS Invincible, during the Falkland War of April to June 1982, and was senior Sea Harrier adviser to the command on the tactics, direction and progress of the air war. He flew over 60 war missions, achieved three air-to-air kills, and took part in or witnessed a total of ten kills; he was also the leading night pilot, and was decorated with the Distinguished Service Cross for gallantry. But what, after all, could 20 Sea Harriers, operating from a flight-deck bucketing about in the South Atlantic, do against more than 200 Argentine military aircraft flown by pilots who, as the raids against the British shipping proved, displayed enormous skill and almost suicidal gallantry? The world knows the answer - now. What is puzzling, therefore, is this book's truthful depiction of the attitudes of some senior non-flying naval officers, and of the RAF, towards the men (and indeed the machine) that made possible the victory in the Falklands. This first-hand account charts, in detail, the naval pilots' journey to the South Atlantic, and how they took on and triumphantly conquered the challenges they faced. It is a dramatic story, leavened with accounts of the air-to-air fighting and of life in a squadron at sea and on a war footing. But it is also a tale of inter-Service rivalry, bureaucratic interference, and the less-than-generous attitudes of a number of senior

commanders who should certainly have known better; indeed, some of them might even have lost the war through a lack of understanding of air warfare. The author attempts to put the record straight.

Air War in the Falklands 1982 Chris Chant,2013-01-20 The war fought between the United Kingdom and Argentina in 1982, for the possession of the Falkland Islands was probably the last 'colonial' war that will ever be undertaken by the British. This book shows how the key to British success was the speed with which the British gained and then maintained air superiority over the islands and the waters around then with their small force of Sea Harrier STOVL warplanes, which operated from two aircraft carriers. Though subsonic, the Sea Harrier and its Sidewinder AAM were a combination altogether superior to Argentina's mix of supersonic and subsonic warplanes with older weapons, and this advantage was emphasised by the significantly greater tactical acuity of the British pilots. The Argentine pilots fought with considerable piloting skill and enormous courage, and scored a number of stunning successes against British warships, but ultimately they could not prevent the British landing and the following land campaign that resulted in complete Argentine defeat.

The Bell AH-1 Cobra Alexander Lüdeke,2018-02-20 The Bell AH-1 was the first helicopter designed and built exclusively for combat. First flown in 1965, the AH-1, with its characteristic streamlined silhouette and stub wings, quickly became an indispensable asset and feared opponent. Development continued over the years and even today much improved and higher performance versions are still in service around the world. Design, development, and construction are discussed, as well as modifications made during production and the addition of night combat capabilities. Operational use in Vietnam, Operations Desert Shield/Storm, as well as current day combat are extensively covered. AH-1 use by other armed forces around the world such as Spain, Israel, Japan, Taiwan, Turkey, and others is described as well.

Hostile Skies David Morgan,2012-09-06 The gripping personal story of a Falklands Fighter Ace. David Morgan, RAF officer and poet, relives his experiences during the Falklands War in this vivid memoir. On secondment to the Royal Navy when the Argentine invasion of the Falklands began and personally credited with shooting down two Argentine Skyhawks as well as enemy helicopters, Morgan was later awarded the Distinguished Service Cross. Here he recounts his involvement in the first British air-strike against Argentine positions around Port Stanley and describes being first on the scene when enemy jets bombed the landing ships SIR TRISTRAM and SIR GALAHAD. Including the author's heartfelt letters sent back to England to close family and friends, HOSTILE SKIES dramatically recalls what it was really like to fight, live and love during the Falklands War.

The Lost Diggers Ross Coulthart,2016-12-01 'It's a treasure trove. It's previously unknown, candid images of our troops just out of the line. Men with the fear and experiences of battle written on their faces.' General Sir Peter Cosgrove Investigative journalist Ross Coulthart, joint winner of the Prime Minister's Prize for History 2015, brings together stunning images of Western Front diggers and the amazing stories behind them. This fully revised and expanded edition offers a wealth of fresh information including more soldiers newly identified with the aid of their families. A trove of portraits taken in the tiny French town of Vignacourt just behind the front lines was found a century later in an ancient metal chest in a French

farmhouse. The collection of glass plates has been hailed as one of the most important First World War discoveries ever made. Haunting images show diggers enjoying a brief respite from the horror of the trenches: having their portraits taken for a lark, for a keepsake or to send to loved ones. For all too many, this would be their only memorial, and to gaze into the eyes of these men is to meet a lost generation. 'These stunning black and white photographs stand as mute, yet eloquent, witness to the courage of soldiers and the horror of war ... Remarkably informative, beautifully illustrated and thoroughly researched ...' - Ross Fitzgerald, Sydney Morning Herald

Book of Flight Riccardo Niccoli, 2002 If man were meant to fly, he'd have wings. Luckily, the intrepid pioneers of aviation didn't let that little detail stop them. Dedicated to the history of human flight, this richly illustrated retrospective spans centuries of innovation from the drawings of DaVinci to the daring deeds of John Glenn. Strap yourself in for a thrilling, sometimes bumpy ride as the uncertain attempts of the medieval period give way to the excitement of the Wright Brothers' advances and eventually the sophistication of the Space Shuttle. Whether warplanes, transport and tourism crafts, acrobatic machines, seaplanes or helicopters capture your imagination, you'll find every type of aircraft described in vivid detail. Marvel as technology leads to the development of convertiplanes, 21st century superfighters, and the controversial Concorde. You'll even glimpse the future of air travel with prototypes of commercial airliners yet to be produced by Airbus and Boeing.
