**Professor Porsche's Wars** Karl E. Ludvigsen,2014 Regarded as one of the great automotive engineers of the twentieth century, Ferdinand Porsche is well remembered today for his remarkable automotive designs including the Volkswagen Beetle and Auto Union Grand Prix cars. Yet there is another side to his extraordinary career, for he was an equally inventive designer of military vehicles and machinery. In this field too he excelled. Indeed the sheer versatility of his contribution is astonishing. Karl Ludvigsen's study is the definitive guide. He tells the complete story, focusing on Porsche's relations with the German armed forces and on the stream of advanced designs he was responsible for. Included are Austro Daimler's pioneering aero engines, the Kübelwagen, Schwimmwagen, Type 100 Leopard tank, Ferdinand or Elefant tank destroyer and the astounding Type 205 Maus tank. He also describes Porsche's creative work on aero engines, tank engines and even a turbojet for the V-1 flying bomb. **A Woman's World Tour in a Motor** Harriet White Fisher,1911 Account of a journey by motor car through India, China, and Japan by Harriet White Fisher in 1909-1910. Fisher describes her journey as the trip of a woman who had grown a little weary of the details of a useful but somewhat heavy business (her company manufactured anvils!), and sought recreation under India's burning sun, in Ceylon, China, Japan, in many places where no motor car had ever taken man or woman before. Her adventure attracted hundreds of excited spectators in cities around the world and was the subject of dozens of contemporary newspaper articles.

**First Overland** Tim Slessor,2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the desrts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were ‘just too many rivers and too few roads’. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, ‘First Overland’, is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

Waking the Frog Tom Rand,2014-04-01 A “provocative [and] compelling” look at how we can achieve both economic growth and environmental sustainability (Columbus Dispatch). A venture capitalist, entrepreneur, and engineer, Tom Rand looks to contemporary psychology, economics, business, and finance to explain our difficulty in confronting one of the most fundamental problems of our time. Rand’s account doesn’t just point fingers at the bad guys, but goes deeper—to our motivations, institutional lethargy, and deeply buried assumptions about market economics. Waking the Frog reveals that our ingenuity, technology, capital, and policy can work together to turn down the heat—and at the same time enable the largest economic opportunity of the twenty-first century. “There are a plethora of books on climate disruption. Read this one. Waking the Frog has breadth, science, practice, enterprise, and vision.” –Paul Hawken, author of Blessed Unrest

**Volkswagen Military Vehicles of the Third Reich** Blaine Taylor,2004-06-29 When Volkswagen burst upon the American automobile scene in the 1960s, it established a reputation for both economy and reliability. Few who drove the original sixties' Love Bug knew that the vehicle was the creation of Adolf Hitler in the days of the Third Reich. Originally intended as a symbol of prewar prosperity, the Volkswagen, or people's car, eventually became a key element in the Nazi war machine.With the outbreak of World War II, the production of the Volkswagen car was adapted for military use, and the Kubelwagen, German jeep, was designed and manufactured throughout Germany. A special amphibious version, the Schwimmwagen, was later developed and spearheaded many major German offensives. Appearing in several variants, Volkswagen vehicles became the mainstay of German command and motorized units.This detailed history of the Volkswagen in the 1930s and 1940s covers all varieties of makes and models of the Volkswagen in use during the Third Reich and is richly illustrated with rare photographs of the vehicles themselves, technical drawings, engine designs,

and sales brochures of the period.
