Topics in Local Anesthetics Víctor M. Whizar-Lugo, Enrique Hernández-Cortez, 2020-09-30 The fascinating history of local anesthetics was born in the Andean Mountains with the use of *Erythroxylum coca* and has gradually evolved into a group of safe drugs in anesthesiology and pain medicine. Their mechanism of action on the cell membrane produces anesthesia, analgesia, and side effects that can be catastrophic. Other effects such as antimicrobial, anti-inflammatory, antineoplastic, and other therapeutic results have also been found and are still under investigation. Pharmacological advances in local anesthetics, the use of adjuvant drugs, and new regional anesthesia techniques have resulted in greater efficacy and safety for patients. Written by authors from around the world, this book examines selected topics on local anesthetics and their current use in clinical practice.

Nutrition and Feeding of Organic Cattle, 2nd Edition Robert Blair, 2021-04-28 Organic cattle farming is on the increase, with consumer demand for organic milk and meat growing yearly. Beginning with an overview of the aims and principles behind organic cattle production, this book presents extensive information about how to feed cattle so that the milk and meat produced meet organic standards, and provides a comprehensive summary of ruminant digestive processes and nutrition. Since the publication of the first edition, global consumers have increasingly become concerned with the sustainability of meat production. Here, Robert Blair considers the interrelationships of sustainable practices and profitability of organic herds, reviewing how to improve forage production and quality, and minimizing the need for supplementary feeding using off-farm ingredients.

The Rain Drop and Other Shades of Prose Patrick Mandidi, 2010-03 The word prose does not exist. But the author of this book of prose uses it to describe the presentation of prose in a manner that attempts to depict the aims and objectives of poetry. *The Rain Drop and Other Shades of Prose* is written in five sections. The first is *The Rain Drop* and tells of an author who has just achieved great success. He reflects back on an embarrassing incident that happened when he was six, and which comes to mind whenever it rains. The second story, *The Priest*, is about a man who became a priest by accident, but grows to love his chosen profession. Then he is presented a great temptation when he meets a woman who resembles a girl he loved as a teenager. *The Cricketer* shows the game through the eyes of an experienced player, one about to go through a very unusual experience during a cricket match. In *The Driver*, the anxieties of an aging Formula One racecar driver show what happens during what could be the last year of his racing career. In the fifth and final story, *The Admirer*, the anguish of a young man who has fallen madly in love with a girl he has never spoken with is told in prose.

The Ancient Origins of Consciousness Todd E. Feinberg,Jon M. Mallatt,2016-03-25 How consciousness appeared much earlier in evolutionary history than is commonly assumed, and why all vertebrates and perhaps even some invertebrates are conscious. How is consciousness created? When did it first appear on Earth, and how did it evolve? What constitutes consciousness, and which animals can be said to be sentient? In this book, Todd Feinberg and Jon Mallatt draw on recent scientific findings to answer these questions—and to tackle the most fundamental question about the nature of consciousness: how does the material brain create subjective experience? After assembling a list of the biological and neurobiological features that seem responsible for consciousness, and considering the fossil record of evolution, Feinberg and Mallatt argue that consciousness appeared much earlier in evolutionary history than is commonly assumed. About 520 to 560 million years ago, they explain, the great “Cambrian explosion” of animal diversity produced the first complex brains, which were accompanied by the first appearance of consciousness; simple reflexive behaviors evolved into a unified inner world of subjective experiences. From this they deduce that all vertebrates are and have always been conscious—not just humans and other mammals, but also every fish, reptile, amphibian, and bird. Considering invertebrates, they find that arthropods (including insects and probably crustaceans) and cephalopods (including the octopus) meet many of the criteria for consciousness. The obvious and conventional wisdom—shattering implication is that consciousness evolved simultaneously but independently in the first vertebrates and possibly arthropods more than half a billion years ago. Combining evolutionary, neurobiological, and philosophical approaches allows Feinberg and Mallatt to offer an original solution to the “hard problem” of consciousness.

Pocono: NASCAR's Northern Invasion Joe Miegoc,2011-04-14 Pocono: NASCAR's Northern Invasion, by author Joe Miegoc, is the story of how NASCAR stepped into the breach created by the Indy car war of the late 1970s, saved Pocono Raceway from extinction and gave it an expanded national identity. In the late 1970s, NASCAR's northern races were few. One was at Pocono, a unique three-turn track caught in the middle in the CART-USAC war which was about to send Indy car racing's popularity into history's ashbin. As Pocono teetered on bankruptcy, NASCAR founder Bill France convinced Pocono owner Dr. Joe Mattioli to try it one last time. France knew Pocono's strategic value, rewarding Pocono with a second Winston Cup race in the process. Hall of Fame drivers and NASCAR insiders tell how Pocono gave NASCAR expanded exposure to 30 million people in a 300-mile radius of the track. Pocono: NASCAR's Northern Invasion tells the story of the third-largest rock festival of the 1970s drawing 200,000 fans, of where Janet Guthrie became the first woman to drive in a 500-mile Indy car race, where Tim Richmond flashed onto the

stock-car scene and where Bobby Allison's career ended on a Father's Day afternoon.

Imsa , 2018-08-25 In 1969, John Bishop and Bill France, Sr. acted on a collective vision to plot a new course for road racing in the United States. What began as a Formula Ford and Formula Vee race in October of 1969, quickly morphed into a sports car racing series that brought the aspirational cars people drove, or wished to drive, to compete on a racetrack. Thus the International Motor Sports Association, or IMSA as it is more commonly known, was founded, and not long after domestic and import car-makers took notice as did the leading sports car racing drivers from at home and abroad. Today, 50 years after Bishop and France hatched their plan over a glass or two of scotch, compelled by a shared passion to bring competitive racing for drivers and teams that would captivate fans and fuel the sale of sports cars in showroom across America, IMSA has stayed true to their vision. Along the way, there have been some twists. Yet, in whatever the form it was at the time, IMSA has undeniably produced a bounty of great sports car racing that often has witnessed the titans of the sport battle each other for supremacy. Today, IMSA continues to be a collection of legendary events contested by an international field of drivers and teams behind the wheel of the world's most illustrious automobile marques. Celebrating 50 years of IMSA, this book reacquaints us with just some of the people, cars and events through images and words from the sport's leading photographers and journalists that have played a role in creating IMSA's lore. Across these pages is journey of highlights and reminiscences, facts and possibly a tale or two to recall a fraction of what has transpired throughout IMSA's history, but will certainly inspire memories of your own.

The Biopolitics of Gender Jemima Repo,2016 This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.
