Volvo F88 and F89 at Work Patrick W. Dyer, 2012-05 First released in 2005, Patrick Dyer's popular title has been revised, extended and reformatted for this new edition. Between 1965 and 1977 the Swedish manufacturer Volvo produced a staggering 40,000 F88 trucks. Along with Scania, Volvo came to dominate the European truck market. Before this revolution trucks were often noisy, uncomfortable and liable to break down. Volvo transformed engines, gearboxes, frames, brakes, drives and shafts, bringing all these components under their own control. This unique position gave them an enviable edge over rivals for quality control and supply. Development work, too, could proceed without interruption. Wherever trucking work was needed on substantial loads or for long-haul work the F88 was bound to be a serious contender. Patrick Dyer presents the predecessors to the F88, a photographic record of the truck at work in all manner of situations and then deals with the successor F89. His second edition includes all the original photographs as well as 53 new ones - including some rarities - mainly from the Volvo archives. He has added 7,000 words to the text. Patrick Dyer works in motor sport and also holds a Class 1 HGV licence. In companion books for Old Pond he has covered other iconic machines from Scania, DAF and Ford.

DAF at Work Patrick W. Dyer, 2010-07 Following the success of his previous book, *Scania at Work*, Patrick Dyer takes a close look at another favourite of long haul drivers, DAF. Although now owned by the American company, PACCAR, and with links to Leyland, the roots of DAF trucks are firmly in Eindhoven, Holland. The company started truck manufacture relatively late, but in the early 1970s it took an industry lead with its flagship 2800. The 'Supercontinental' version,

with its wide tilt sleeper cab with two full-size bunks and its powerful 11.6-litre DAF engine was a natural for long-haul work. The successor 3300 and 3600 models took the company into the 1980s, running alongside Scania and Volvo as a long-distance driver's favourite. The 330 hp engine suited it for the heavy-duty special transport that became a feature of the period. Patrick W Dyer, author of two books for Old Pond - Scania at Work and Know Your Trucks - works in the automotive industry and is based in Essex. His new book is rich in photographs from the 1970s and '80s.

Ford Transcontinental at Work Patrick W. Dyer, 2012-02 This is the full story of the Ford Transcontinental - affectionately known as the Transconti - a big lorry, magnificent to drive and unusual in its time for its Eaton-Fuller gear-box and a high-spec cab. The Ford Transconti nearly got it right; nearly made a profit for Ford. Nevertheless, the Transconti remains a memorable model, loved by truckers and truck enthusiasts alike. For Patrick's new book celebrating the model he has gathered over 200 photographs to show the truck in its full glory over the years and in a variety of liveries and locations. Each photograph has an extensive caption. When read together these give the complete story of the introduction, development, and decline of the model. There is extensive information on bodywork and engine specifications, the little differences that changed over time and the details which made the model so special to those who drove it. Photographs show the trucks at

work abroad and there are many shots of them on the productions line. To set the Transcontinental in context, Patrick also considers the models which came before and after. Patrick's informative and friendly writing style gives the impression of sharing this story with a fellow enthusiast. The entertaining foreword is by George Bennett.

Trucks in the 1980s: The Photos of David Wakefield Nick

Ireland, 2015-07-20 Many would argue that the 1980s were a better time for truck drivers than nowadays: there were no cell phones, there was less traffic on the road, CB radio was all the rage, and stickers were the simple heart of truck customizing. However, the transport industry is constantly evolving and companies must adapt their vehicles to keep pace with the developments. As a result, vehicle design and liveries regularly change. Many of the companies around in the 1980s have expired and been forgotten. Most of the trucks from that time are long gone to the great scrapyard in the sky! David Wakefield has been working in the transport industry for over 30 years and has been taking photographs of trucks since the early 1980s. He has amassed thousands of high-quality images, producing one of the most comprehensive photographic collections of the time, but many of his photographs have never been previously published. In this vivid compilation, Nick Ireland has collated 300 of David's images from the 1980s in order to preserve them and make them publicly available for the first time. The book features trucks from all over the world, and it is a must-have for current and former truckers who will enjoy being reminded of 'the good old days, ' as well as anyone else with an interest in transport history. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding

soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Scania 113 and 143 at Work Patrick W. Dyer, 2017-05-10 Patrick Dyer's ninth book in the 'at work' series marks a return to Scania to study the 3-series trucks produced between 1988 and 1996, with the emphasis on the 113 and 143 models. In much the same way as these trucks evolved from the previous 2-series and LB (1-series) so too does the book, taking the story forward from the previous titles covering those ranges. For Scania, masters of the modular system and evolutionary engineering processes, the 3-series represented the pinnacle of development for designs born decades earlier. Industry recognition of its achievement came early with the range being awarded the Truck of the Year title in 1989. With over 200 photographs provided by the manufacturer and enthusiasts, Scania 113

& 143 at Work charts the story of the 3-series through informative text in the popular and familiar style of previous 'at work' titles from the same author.

Scania at Work Patrick W. Dyer,2009 In this highly illustrated book Patrick Dyer shows how the model developed from the L75. It's a story of careful attention to trends in the transport market and equally thorough commitment to engineering detail and driver comfort. Scania's enterprise, together with Volvo, led to the demise of the previously invincible British truck industry.

Seddon Atkinson at Work 400, 401 and 4-11 Patrick W.

Dyer,2012-11 When, in 1970, the Oldham company Seddon took over Atkinson, based in Preston, it merged two of the greatest names in British truck manufacturing. Later, International Harvester brought its substantial backing in the mutually beneficial takeover of 1974. Patrick Dyer looks at Seddon Atkinson's premium range for the period 1975 - 88. Launched as the 400, the new range was designed to meet the European invasion, led by Volvo and Scania, head on. Equipped with a luxurious tilt cab made of steel and strong drivelines comprised of proven proprietary components, it was an immediate hit and soon took the top spot for heavy-weight trucks in the UK. An evolution process followed with the superb 401, introduced in 1981, and then the 4-11 which saw production through to its end in 1988. The book charts the development of the 400, 401 and 4-11 over the thirteen years of production, supported, as usual, by a fine selection of photographs, a quarter of which were sourced from the Seddon Atkinson Historic Archive.,

Volvo Lorries Bill Reid,2017-11-15 Car production at Volvo began in 1926 in Stockholm with a prototype. By 1927 small goods vehicles based on the car designs were in production at Gothenburg, and heavier three-tonners were being produced by 1928. Already known for their robust cars, Volvo lorries first came to British roads in 1967 after Jim McKelvie, a former road haulier, saw the need for better trucks than UK manufacturers were producing at the time, and imported the Volvo F86 model as a 30/32 ton artic unit. The lorry was light, had a high power-to-weight ratio and provided incomparable comfort for the driver. It took the UK market by storm. This early import was the forerunner of later Volvo trucks across the entire range, with various models of bus chassis also being introduced to the UK markets. Volvo production has gone forward in leaps and bounds,

today being a major player on the world stage. Though a relative newcomer to the UK scene, Volvos have gained a very large following. Lavishly illustrated with rare and unpublished photographs, Volvo Lorries traces their history in Britain from the early F86 imports of the 1960s to the FH16 750 bhp fleet flagships seen on the roads today.
