**The Universal Computer** Martin Davis,2018-10-08 The breathtakingly rapid pace of change in computing makes it easy to overlook the pioneers who began it all. Written by Martin Davis, respected logician and researcher in the theory of computation, *The Universal Computer: The Road from Leibniz to Turing* explores the fascinating lives, ideas, and discoveries of seven remarkable mathematicians. It tells the stories of the unsung heroes of the computer age – the logicians. The story begins with Leibniz in the 17th century and then focuses on Boole, Frege, Cantor, Hilbert, and Gödel, before turning to Turing. Turing's analysis of algorithmic processes led to a single, all-purpose machine that could be programmed to carry out such processes—the computer. Davis describes how this incredible group, with lives as extraordinary as their accomplishments, grappled with logical reasoning and its mechanization. By investigating their achievements and failures, he shows how these pioneers paved the way for modern computing. Bringing the material up to date, in this revised edition Davis discusses the success of the IBM Watson on Jeopardy, reorganizes the information on incompleteness, and adds information on Konrad Zuse. A distinguished prize-winning logician, Martin Davis has had a career of more than six decades devoted to the important interface between logic and computer science. His expertise, combined with his genuine love of the subject and excellent storytelling, make him the perfect person to tell this story.

**Slide Rule** Nevil Shute,2010-01-26 Nevil Shute was a power and a pioneer in the world of flying long before he began to write the stories that made him a bestselling novelist. This autobiography charts Shute's path from childhood to his career as a gifted aeronautical engineer working at the forefront of the technological experimentation of the 1920s and 30s. The inspiration for many of the themes and concerns of Shute's novels can be identified in this enjoyable and enlightening memoir.

**ECCWS 2020 20th European Conference on Cyber Warfare and Security** Dr Thaddeus Eze,Dr Lee Speakman,Dr Cyril Onwubiko,2020-06-25 These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security (ECCWS 2020), supported by University of Chester, UK on 25-26 June 2020. The Conference Co-chairs are Dr Thaddeus Eze and Dr Lee Speakman, both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director, Cyber Security Intelligence at Research Series Limited. ECCWS is a well-established event on the academic research calendar and now in its 19th year the key aim remains the opportunity for participants to share ideas and meet. The conference was due to be held at University of Chester, UK, but due to the global Covid-19 pandemic it was moved online to be held as a virtual event. The scope of papers will ensure an interesting conference. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research.

How Culture Makes Us Human Dwight W Read,2016-05-23 What separates modern humans from our primate cousins—are we a mere blink in the march of evolution, or does human culture represent the definitive evolutionary turn? Dwight Read explores the dilemma in this engaging, thought-provoking book, taking readers through an evolutionary odyssey from our primate beginnings through the development of culture and social organization. He assesses the two major trends in this field: one that sees us as a logical culmination of primate evolution, arguing that the rudiments of culture exist in primates and even magpies, and another that views the human transition as so radical that the primate model provides no foundation for understanding human dynamics. Expertly synthesizing a wide body of evidence from the anthropological and life sciences in accessible prose, Read's book will interest a broad readership from experts to undergraduate students and the general public.

**Intelligent Decision Making: An AI-Based Approach** Gloria Phillips-Wren,Nikhil Ichalkaranje,2008-03-04 Intelligent Decision Support Systems have the potential to transform human decision making by combining research in artificial intelligence, information technology, and systems engineering. The field of intelligent decision making is expanding rapidly due, in part, to advances in artificial intelligence and network-centric environments that can deliver the technology. Communication and coordination between dispersed systems can deliver just-in-time information, real-time processing, collaborative environments, and globally up-to-date information to a human decision maker. At the same time, artificial intelligence techniques have demonstrated that they have matured sufficiently to provide computational assistance to humans in practical applications. This book includes contributions from leading researchers in the field beginning with the foundations of human decision making and the complexity of the human cognitive system. Researchers contrast human and artificial intelligence, survey computational intelligence, present pragmatic systems, and discuss future trends. This book will be an invaluable resource to anyone interested in the current state of knowledge and key research gaps in the rapidly developing field of intelligent decision support.
