Dive Bomber! Peter C. Smith, 2008 In this illustrated history of dive bombers from around the world, Peter C. Smith takes the reader from the earliest experiments in 1910, through the planes first operations, to their eventual emergence as effective tools of aerial warfare during World War II. With its large number of photographs, diagrams, and tables, this book presents a fascinating and authoritative piece of aviation history.

U. S. Navy Dive and Torpedo Bombers of World War II Barrett Tillman Robert L. Lawson, With their stout airframes, innovative airbrakes and near-vertical dive capabilities, U.S. Navy torpedo and dive bombers rendered Japanese deck gunners nearly defenseless and played a crucial role in Allied victory. The Universal Computer Martin Davis, 2018-10-08 The breathtakingly rapid pace of change in computing makes it easy to overlook the pioneers who began it all. Written by Martin Davis, respected logician and researcher in the theory of computation, *The Universal Computer: The Road from Leibniz to Turing* explores the fascinating lives, ideas, and discoveries of seven remarkable mathematicians. It tells the stories of the unsung heroes of the computer age – the logicians. The story begins with Leibniz in the 17th century and then focuses on Boole, Frege, Cantor, Hilbert, and Gödel, before turning to Turing. Turing's analysis of algorithmic processes led to a single, all-purpose machine that could be programmed to carry out such processes—the computer. Davis describes how this incredible group, with lives as extraordinary as their accomplishments, grappled with logical reasoning and its mechanization. By investigating their achievements and failures, he shows how these pioneers paved the way for modern computing. Bringing the material up to date, in this revised edition Davis discusses the success of the IBM Watson on Jeopardy, reorganizes the information on incompleteness, and adds information on Konrad Zuse. A distinguished prize-winning logician, Martin Davis has had a career of more than six decades devoted to the important interface between logic and computer science. His expertise, combined with his genuine love of the subject and excellent storytelling, make him the perfect person to tell this story.

Intelligent Decision Making: An AI-Based Approach Gloria Phillips-Wren, Nikhil Ichalkaranje, 2008-03-04 Intelligent Decision Support Systems

have the potential to transform human decision making by combining research in artificial intelligence, information technology, and systems engineering. The field of intelligent decision making is expanding rapidly due, in part, to advances in artificial intelligence and network-centric environments that can deliver the technology. Communication and coordination between dispersed systems can deliver just-in-time information, real-time processing, collaborative environments, and globally up-to-date information to a human decision maker. At the same time, artificial intelligence techniques have demonstrated that they have matured sufficiently to provide computational assistance to humans in practical applications. This book includes contributions from leading researchers in the field beginning with the foundations of human decision making and the complexity of the human cognitive system. Researchers contrast human and artificial intelligence, survey computational intelligence, present pragmatic systems, and discuss future trends. This book will be an invaluable resource to anyone interested in the current state of knowledge and key research gaps in the rapidly developing field of intelligent decision support.

Can't Stop Won't Stop Jeff Chang, 2007-04-01 *Can't Stop Won't Stop* is a powerful cultural and social history of the end of the American century, and a provocative look into the new world that the hip-hop generation created. Forged in the fires of the Bronx and Kingston, Jamaica, hip-hop became the Esperanto of youth rebellion and a generation-defining movement. In a post-civil rights era defined by deindustrialization and globalization, hip-hop crystallized a multiracial, polycultural generation's worldview, and transformed American politics and culture. But that epic story has never been told with this kind of breadth, insight, and style. Based on original interviews with DJs, b-boys, rappers, graffiti writers, activists, and gang members, with unforgettable portraits of many of hip-hop's forebears, founders, and mavericks, including DJ Kool Herc, Afrika Bambaataa, Chuck D, and Ice Cube, *Can't Stop Won't Stop* chronicles the events, the ideas, the music, and the art that marked the hip-hop generation's rise from the ashes of the 60's into the new millennium.

Chessie Racing George J. Collins, Kathy Alexander, 2001-05-11 The history of the racing yacht Chessie, the first ever entry from the Chesapeake Bay in the famous Whitbread Round the World Race. This book records the history of the racing yacht Chessie, the first ever entry from the Chesapeake Bay in the famous Whitbread Round the World Race. Skippered by Baltimore businessman George Collins and named after the Chesapeake's equivalent to the Loch Ness monster, Chessie became a focal point of regional and national pride when she competed in 1997-98. That year was also the first time that Baltimore and Annapolis were included as a combined stopover in the nine-leg, 31,600-mile race, beginning and ending in Southampton, England. After a neck-and-neck race up the bay against famed skipper Dennis Connor, Chessie entered Baltimore's Inner Harbor greeted by the cheers of thousands of fans. During the stopover, over a half-million visitors came to the Whitbread Race Village in Baltimore and an additional sixty thousand toured the Race Village in Annapolis, giving Baltimore-Annapolis the highest attendance of any of the nine ports visited by the race. While racing, the boat also served an educational purpose through a two-part curriculum developed by the Living Classrooms Foundation, a Baltimore nonprofit educational organization for at-risk children. Children from five hundred schools in twenty states and seven foreign countries participated through the Whitbread Education Project, a curriculum package augmented by an Internet component, the Chessie Chase, which explored academic subjects such as math, science, social studies, geography, and literature and tackled such practical issues as vessel

design, ocean currents, changing weather, and the principles of navigation. Classes competed in a virtual race against each other in the multifaceted program for a chance to visit Chessie and meet her crew when she reached Baltimore. The children also exchanged e-mails with Chessie's crew throughout the race. When President Clinton and Vice President Gore visited the Living Classrooms Foundation in Baltimore, students helped them write an e-mail to the boat saying, Have a great race. This book contains chapters on the race, boat construction, crew selection, and the Living Classrooms Foundation Whitbread Education Project. Personal experiences and memories of the crew bring the sailing adventure to life and reveal the educational purpose of the boat. Sidebars feature useful charts and information, special observations, and a few human-interest e-mail exchanges between individuals and the crew. A large Mercator-projection map marks the race course and individual legs. Numerous photos document racing action as well as the hoopla on shore.

Book Seventeen Greg Delanty, 2015-02-16 Purporting to be a lost seventeenth book of the 16-volume Anthologia Graeca, Book Seventeen uses the themes and images of ancient mythology to conjure a new way of looking at our modern world. Gods of all types line the pages of this collection, from those deities that only operate in our personal spaces-the poet's companion, the demigod Solitude, as well as the elusive god of Complicity-to more familiar divinities in unfamiliar roles, such as Helios shopping in an outdoor market in Paris, or an aging Aphrodite in a short skirt chatting with visitors to an unfamiliar city. Pithy and humorous, reverential and impudent, Greg Delanty's poems showcase the author's keen eye for the mythologies on which we depend to make sense of our messy, bewildering lives.
