Fundamentals of Tractor Design Karl Theodor Renius, 2019-10-28 This textbook offers a comprehensive review of tractor design fundamentals. Discussing more than hundred problems and including about six hundred international references, it offers a unique resource to advanced undergraduate and graduate students, researchers and also practical engineers, managers, test engineers, consultants and even old-timer fans. Tractors are the most important pieces of agricultural mechanization, hence a key factor of feeding the world. In order to address the educational needs of both less and more developed countries, the author included fundamentals of simple but proved designs for tractors with moderate technical levels, along with extensive information concerning modern, premium tractors. The broad technical content has been structured according to five technology levels, addressing all components. Relevant ISO standards are considered in all chapters. The book covers historical highlights, tractor project management (including cost management), traction mechanics, tires (including inflation control), belt ground drives, and ride dynamics. Further topics are: chassis design, diesel engines (with emission limits and installation instructions), all important types of transmissions, topics in machine element design, and human factors (health, safety, comfort). Moreover, the content covers tractor-implement management systems, in particular ISOBUS automation and hydraulic systems. Cumulative damage fundamentals and tractor load spectra are described and implemented for dimensioning and design verification. Fundamentals of energy efficiency are discussed for single tractor components and solutions to reduce the tractor CO₂ footprint are suggested.

North Korea's New Diplomacy Virginie Grzelczyk, 2017-07-20 This book examines how North Korea has managed to weather an uncertain political future and catastrophic economic system since the end of the Cold War. Emerging as a state that has successfully developed and tested missiles and nuclear weapons, North Korea has consolidated the Kim family dynasty through the appointment of Kim Jong Un as Pyongyang's latest strongman. The author provides an empirically rich account of new diplomatic recognitions, military partnerships, knowledge trade, coping mechanisms to offset international sanctions, import and export partners, foreign investment practices and engagement within the Global South. The resulting picture is that of a state that is, against all odds, mainstreaming, and becoming a more complex and relevant actor in the 21st century diplomatic world.

War and Memory in Russia, Ukraine and Belarus Julie Fedor, Markku Kangaspuro, Jussi Lassila, Tatiana Zhurzhenko, 2017-12-05 This edited collection contributes to the current vivid multidisciplinary debate on East European memory politics and the post-communist instrumentalization and re-mythologization of World War II memories. The book focuses on the three Slavic countries of post-Soviet Eastern Europe – Russia, Ukraine and Belarus – the epicentre of Soviet war suffering, and the heartland of the Soviet war myth. The collection gives insight into the persistence of the Soviet commemorative culture and the myth of the Great Patriotic War in the post-Soviet space. It also demonstrates that for geopolitical, cultural, and historical reasons the political uses of World War II differ significantly across Ukraine, Russia and Belarus, with important ramifications for future developments in the region and beyond. The chapters 'Introduction: War and Memory in Russia, Ukraine and Belarus', 'From the Trauma of Stalinism to the Triumph of Stalingrad: The Toponymic Dispute over Volgograd' and 'The "Partisan Republic": Colonial Myths and Memory Wars in Belarus' are published open access under a CC BY 4.0 license at link.springer.com. The chapter 'Memory, Kinship, and Mobilization of the Dead: The Russian State and the "Immortal Regiment" Movement' is published open access under a CC BY-NC-ND 4.0 license at link.springer.com.

Struggle over Identity Nelly Bekus, 2010-04-20 Rejecting the cliché about weak identity and underdeveloped nationalism, Bekus argues for the co-existence of two parallel concepts of Belarusianness—the official and the alternative one—which mirrors the current state of the Belarussian people more accurately and allows for a different interpretation of the interconnection between the democratization and nationalization of Belarussian society. The book describes how the ethno-symbolic nation of the Belarussian nationalists, based on the cultural capital of the Golden Age of the Belarussian past (17th century) competes with the nation institutionalized and reified by the numerous civic rituals and social practices under the auspices of the actual Belarussian state. Comparing the two concepts not only provides understanding of the logic that dominates Belarussian society's self-description models, but also enables us to evaluate the chances of alternative Belarusianness to win this unequal struggle over identity.

The Political Economy of Hungary Adam Fabry, 2019-04-03 This book explores the political economy of Hungary from the mid-1970s to the present. Widely considered a 'poster boy' of neoliberal transformation in post-communist Eastern Europe until the mid-2000s, Hungary has in recent years developed into a model 'illiberal' regime. Constitutional checks-and-balances are non-functioning; the independent media, trade unions, and civil society groups are constantly attacked by the authorities; there is widespread intolerance against minorities and refugees; and the governing FIDESZ party, led by Prime Minister Viktor Orbán, controls all public institutions and increasingly large parts of the country's economy. To make sense of the politico-economical roller coaster that Hungary has experienced in the last four decades, Fabry employs a Marxian political economy approach, emphasising competitive accumulation, class struggle (both between capital and labour, as well as different 'fractions of capital'), and uneven and combined development. The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orbán regime cannot be explained as a case of Hungarian exceptionalism, but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989.

The European Union and its Eastern Neighbours Elena Korosteleva, 2012-05-15 This book explores the EU's relations with its eastern neighbours. Based on extensive original research – including surveys, focus-groups, a study of school essays and in-depth interviews with key people in Belarus, Ukraine, Moldova, Russia and in Brussels – it assesses why the EU's initiatives have received limited legitimacy in the neighbourhood. The European Neighbourhood Policy of 2004, and the subsequent Eastern Partnership of 2009 heralded a new form of relations with the EU's neighbours – partnership based on joint ownership and shared values – which would complement if not entirely replace the EU's traditional governance framework used for enlargement. These initiatives have, however, received a mixed response from the EU's eastern neighbours. The book shows how the key elements of partnership have been forged mainly by the EU, rather than jointly, and examines the idea and application of external governance, and how this has been over-prescriptive and confusing.

Models of Capitalism in the European Union Beáta Farkas, 2016-09-07 This book uses comparative economic analysis to provide a common conceptual framework for all current European Union member states. Based on empirical

investigation, the author identifies the Nordic, North-western, Mediterranean, and Central and Eastern models of capitalism on the threshold of the 2008 global financial and economic crisis. The chapters also examine the resulting institutional responses to the crisis and the methods of crisis management adopted by each member state. The analysis reveals that the crisis has not triggered radical institutional change but, instead, highlighted deep institutional differences not between the old and new member states, but between the Nordic, North-western, Mediterranean, and Central and Eastern European countries. These institutional differences are so significant that they require the rethinking of European integration theory. *Models of Capitalism in the European Union* serves as a useful handbook for academics, advanced students, policy-makers and advisors who are interested in European economic issues.

International Economic Sanctions William H Kaempfer, Anton D Lowenberg, 1992-09-16 The incidence of sanctioning behaviour is generally on the increase internationally. This study introduces, analyzes and seeks to clarify the issues that are fundamental to an understanding of the subject. The authors argue that only a public-choice analysis, with its emphasis on politics, can answer three important questions about sanctions: why, in the light of their weak economic impacts, are they being used more and more frequently?; why is it that they take the particular forms they do?; and why are they often successful even when their economic impact is slight?

Chassis Handbook Bernhard Heißing, Metin Ersoy, 2010-11-09 In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

Trust Networks for Recommender Systems Patricia Victor, Chris Cornelis, Martine De Cock, 2011-05-03 This book describes research performed in the context of trust/distrust propagation and aggregation, and their use in recommender systems. This is a hot research topic with important implications for various application areas. The main innovative contributions of the work are: -new bilattice-based model for trust and distrust, allowing for ignorance and inconsistency -proposals for various propagation and aggregation operators, including the analysis of mathematical properties -Evaluation of these operators on real data, including a discussion on the data sets and their characteristics. -A novel approach for identifying controversial items in a recommender system -An analysis on the utility of including distrust in recommender systems -Various approaches for trust based recommendations (a.o. base on collaborative filtering), an in depth experimental analysis, and proposal for a hybrid approach -Analysis of various user types in recommender systems to optimize bootstrapping of cold start users.

Sissy Dreams: From Boyfriend to Girlfriend Paul Zante, Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

Labour After Communism David Mandel, 2004 The collapse of the Soviet Union led to a period of steep economic decline, followed by economic reform, soaring inflation, corruption and crime. Despite the fact that unions were part of the State and that membership was obligatory, incorporating 98 percent of the labor force, millions of workers were not paid their wages. Based upon an abundance of first-hand material, *Labour After Soviet Socialism* examines the complex interplay of history, ideology, leadership, state policy and economics, to explain the difficulty workers have encountered in defending their interests. David Mandel, labor scholar and activist, teaches political science at the University of Quebec, Montreal. He is co-founder of the School for Worker Democracy, which conducts rank-and-file labor education in Russia, Ukraine and Belarus.

Tumor Microenvironment, 2020 Revealing essential roles of the tumor microenvironment in cancer progression, this volume focuses on non-hematopoietic cells within the tumor microenvironment. Further, it teaches readers about the roles of distinct constituents of the tumor microenvironment and how they affect cancer development. Topics include fibroblasts, adipocytes, mesenchymal stem cells, stellate cells, and more. Taken alongside its companion volumes, *Tumor Microenvironment: Non-Hematopoietic Cells* updates us on what we know about the different aspects of the tumor microenvironment as well as future directions. Useful for introducing the newer generation of researchers to the history of how scientists focused in the tumor microenvironment and how this knowledge is currently applied for cancer treatments, it will be essential reading for advanced cell biology and cancer biology students as well as researchers seeking an update on research in the tumor microenvironment. All of the chapter authors are renowned international experts in the cancer biology field in specific subfields that will be the focus of their chapters.

Mixture Formation in Internal Combustion Engines Carsten Baumgarten, 2006-09-28 A systematic control of mixture formation with modern high-pressure injection systems enables us to achieve considerable improvements of the combustion process in terms of reduced fuel consumption and engine-out raw emissions. However, because of the growing number of free parameters due to more flexible injection systems, variable valve trains, the application of different combustion concepts within different regions of the engine map, etc., the prediction of spray and mixture formation becomes increasingly complex. For this reason, the optimization of the in-cylinder processes using 3D computational fluid dynamics (CFD) becomes increasingly important. In these CFD codes, the detailed modeling of spray and mixture formation is a prerequisite for the correct calculation of the subsequent processes like ignition, combustion and formation of emissions. Although such simulation tools can be viewed as standard tools today, the predictive quality of the sub-models is constantly enhanced by a more accurate and detailed modeling of the relevant processes, and by the inclusion of new important mechanisms and effects that come along with the development of new injection systems and have not been considered so far. In this book the most widely used mathematical models for the simulation of spray and mixture formation in 3D CFD calculations are described and discussed. In order to give the reader an introduction into the complex processes, the book starts with a description of the fundamental mechanisms and categories of fuel injection, spray break-up, and mixture formation in internal combustion engines.

Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child’s social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal
