**Yefim Gordon, Sergey Komissarov, Dmitriy
Komissarov**

Bell P-39 Airacobra Pilot's Flight Operating Instructions United States Air Force, 2008-09 The P-39 Airacobra was designed by Bell's brilliant engineer, Robert Woods. The plane featured a mid-engine design, intended to allow it to carry a lethal 37mm cannon in the nose. An all-metal, low-wing design, the P-39 was the first fighter to feature tricycle landing gear. The plane debuted in 1939, and proved impressive in tests. Yet the aircraft lacked a large fuel capacity that limited range, and pilots learned that its performance dropped off markedly at altitudes above 17,000 feet. Despite this, over 9,500 P-39s were built. Almost half were sent to the USSR, where Soviet pilots, flying low-level attack missions, achieved devastating results. Ace Alexander Pokryshkin flew the plane exclusively and scored nearly 60 kills. Originally printed by the USAAF and the RAF, this handbook provides a fascinating glimpse inside the cockpit of this warbird. Originally classified 'Restricted', the manual was de-classified and is here reprinted in book form.

The Bell P39 Airacobra and P63 Kingcobra Fighters Yefim Gordon, Sergey Komissarov, Dmitriy Komissarov, 2019-06-28 Under the Lend-Lease agreement with the US during WWII, the Soviet Union received large quantities of war materiel, including many aircraft; the Bell P-39 Airacobra takes a special place among them. The P-39 was dismissed as hardly suitable for combat both by the US and England, who turned it over in large numbers to the USSR. Soviet pilots had different views, though, and achieved excellent results

while flying the type; more than twenty Soviet aces flew the P-39. As air combat over the Russian front was conducted mostly at low altitudes, the P-39 came into its own. Innovative tactics and motivation, coupled with the P-39's sturdy construction and adequate firepower, proved successful for the Soviets. The P-39 was in Soviet service since 1942; nearly 5,000 were supplied and used on the Soviet-German front, along with 2,400 P-63 Kingcobras, which saw only limited action against Japan at the close of the war. This detailed, illustrated history features many color side views and previously unpublished photographs.

Bell P-39q Airacobra ,2019-08-19 This book is compilations of the 4-view color profile, scale plans and photo details of the single variant of the Bell P-39Q Airacobra. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also photos of the details in B&W and color.

To Fly and Fight Clarence E. "Bud"
Anderson,2017-05-12 Bud Anderson is a flyers flyer. The Californians enduring love of flying began in the 1920s with the planes that flew over his fathers farm. In January 1942, he entered the Army Air Corps Aviation Cadet Program. Later after he received his wings and flew P-39s, he was chosen as one of the original flight leaders of the new 357th Fighter Group. Equipped with the new and deadly P-51 Mustang, the group shot down five

enemy aircraft for each one it lost while escorting bombers to targets deep inside Germany. But the price was high. Half of its pilots were killed or imprisoned, including some of Buds closest friends. In February 1944, Bud Anderson, entered the uncertain, exhilarating, and deadly world of aerial combat. He flew two tours of combat against the Luftwaffe in less than a year. In battles sometimes involving hundreds of airplanes, he ranked among the groups leading aces with 16 aerial victories. He flew 116 missions in his old crow without ever being hit by enemy aircraft or turning back for any reason, despite one life or death confrontation after another. His friend Chuck Yeager, who flew with Anderson in the 357th, says, In an airplane, the guy was a mongoo sethe best fighter pilot I ever saw. Buds years as a test pilot were at least as risky. In one bizarre experiment, he repeatedly linked up in midair with a B-29 bomber, wingtip to wingtip. In other tests, he flew a jet fighter that was launched and retrieved from a giant B-36 bomber. As in combat, he lost many friends flying tests such as these. Bud commanded a squadron of F-86 jet fighters in postwar Korea, and a wing of F-105s on Okinawa during the mid-1960s. In 1970 at age 48, he flew combat strikes as a wing commander against communist supply lines. To Fly and Fight is about flying, plain and simple: the joys and dangers and the very special skills it demands. Touching, thoughtful, and dead honest, it is the story of a boy who grew up living his dream.

Attack of the Airacobras Dmitrii Fedorovich Loza, 2002 Focusing on the combat operations and

daily life of one unit - the 9th Guards Fighter Division - Loza refutes the myth that the P-39 was used mainly as a tank buster or flying artillery. Instead, its primary mission was to protect Red Army operations from aerial attacks by the enemy. So despite the occasional strafing of trains, truck convoys, and troops, most P-39 operations involved attacks on Luftwaffe bombers and dogfights with their fighter escorts.--BOOK JACKET.

You Suck at Racing Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of

art. It's more like a sandwich: convenient and nourishing.

Tex Johnston A. M. "Tex" Johnston, 2014-12-02 One of America's most daring and accomplished test pilots, Tex Johnston flew the first US jet airplanes and, in a career spanning the 1930s through the 1970s, helped create the jet age at such pioneering aerospace companies as Bell Aircraft and Boeing.

The Story of American Aviation Jim Ray, 2019-11-29 This book traces the history of aviation in America, from its early days to post-World War II. The book covers a range of topics, including the first transatlantic flight, the birth of precision bombing, the development of the first aircraft carrier, and the growth of commercial air travel. It also provides a detailed account of key events and innovations in American aviation and the impact of aviation on modern society.

Hwelte Clinton R. Petrie, Roy McShane, 2002-03 THE BEST KEPT RUSSIAN SECRET OF WORLD WAR II. By the close of World War II almost 1,000 Russian women had flown combat missions in every type of Soviet warplane. This was kept secret, not by the Soviets but by the Allies, from the general public in the West. Using historical fiction based on fact Roy McShane's exciting novel, HWELTE, reveals for the first time what truly deadly hunters these women fighter pilots proved to be. It also chronicles the adventures of a young American pilot, who stumbles across this secret, at the Battle of

Stalingrad in 1942. Author's Websites:

A Proud American Joe Foss, Donna Wild Foss, 2002
Flying over Guadalcanal in the fall and winter of 1942-43, Joe Foss rewrote the aerial combat record books by becoming the first American to match legendary World War I ace Eddie Rickenbacker's twenty-six victories, a feat that earned him the Medal of Honor. After the war, Joe Foss entered a new war zone--politics--becoming South Dakota's youngest governor. In the 1960s he was tapped to become the founding commissioner of the American Football League and was instrumental in creating the Super Bowl.

Eagles of the Southern Sky Luca Ruffato, Michael John Claringbould, 2012 The definitive history of the Imperial Japanese Tainan Naval Air Group - the most prestigious of any Japanese aerial unit in World War 2. It was assigned New Guinea in April 1942, confident of victory, having already conquered the Philippines and Dutch East Indies. However, by mid-November 1942 only eighteen pilots from the original cadre sailed home from Rabaul, marking the end of an era. This book outlines the definitive history of this flagship unit in New Guinea, sourcing material from all sides of the conflict.

Japan's Carnival War Benjamin Uchiyama, 2019-03-14 This cultural history of the Japanese home front during the Asia-Pacific War challenges ideas of the period as one of unrelenting repression. Uchiyama demonstrates that 'carnival war' coexisted with the demands of total war to promote consumerist desire alongside

sacrifice and fantasy alongside nightmare, helping mobilize the war effort.

A Summary of Drag Results from Recent Langley Full-scale-tunnel Tests of Army and Navy Airplanes Roy H. Lange, 1945 The results of drag investigations of twelve military airplanes tested in the Langley full-scale tunnel for the purpose of increasing their speed are summarized in this report. The purpose of this report is to point out undesirable aerodynamic features as a guide to airplane designers.

Mustang Designer Ray Wagner, 2014-12-02 Mustang Designer tells the story of American wartime fighter development, including engines and armaments, as part of a nationwide program of aircraft builders and fliers, focusing on Edgar Schmued, the designer of the Mustang. The P-51 Mustang is widely regarded as the best propeller-driven fighter that ever flew. What many might not realize is that the plane's developer was a German migrant. This book tells of how Schmued created a weapon that would ultimately prove lethal to the aspirations of those who had seized control over his native land.

Race of Aces John R Bruning, 2020-01-14 The astonishing untold story of the WWII airmen who risked it all in the deadly race to become the greatest American fighter pilot. In 1942, America's deadliest fighter pilot, or ace of aces -- the legendary Eddie Rickenbacker -- offered a bottle of bourbon to the first U.S. fighter pilot to break his record of twenty-six enemy planes shot down. Seizing on the challenge to motivate his men, General George Kenney promoted what they

would come to call the race of aces as a way of boosting the spirits of his war-weary command. What developed was a wild three-year sprint for fame and glory, and the chance to be called America's greatest fighter pilot. The story has never been told until now. Based on new research and full of revelations, John Bruning's brilliant, original book tells the story of how five American pilots contended for personal glory in the Pacific while leading Kenney's resurgent air force against the most formidable enemy America ever faced. The pilots -- Richard Bong, Tommy McGuire, Neel Kearby, Charles MacDonald and Gerald Johnson -- riveted the nation as they contended for Rickenbacker's crown. As their scores mounted, they transformed themselves from farm boys and aspiring dentists into artists of the modern dogfight. But as the race reached its climax, some of the pilots began to see how the spotlight warped their sense of duty. They emerged as leaders, beloved by their men as they chose selfless devotion over national accolades. Teeming with action all across the vast Pacific theater, *Race of Aces* is a fascinating exploration of the boundary between honorable duty, personal glory, and the complex landscape of the human heart. Brings you into the cockpit of the lethal, fast-paced world of fighter pilots . . . Fascinating. - - Sara VladicExtraordinary . . . a must-read. -- US Navy Captain Dan PedersenA heart-pounding narrative of the courage, sacrifice, and tragedy of America's elite fighter pilots. -- James M. ScottVivid and gripping . . . Confirms Bruning's status as the premier war historian of the air. --

America's Hundred Thousand Francis H. Dean, 1997
America's Hundred Thousand covers in detail the eleven U.S. fighter aircraft types produced just before and during World War II - with a combined production total of just over 100,000 aircraft. Covered are the Army Lockheed P-38 Lightning, P-39 Airacobra, Curtiss P-40

Tomahawk/Kittyhawk/Warhawk, P-47 Thunderbolt, North American P-51 Mustang, Northrop P-61 Black Widow, and the Navy F2A - Buffalo, F4F - Wildcat, F4U - Corsair, and F6F - Hellcat fighters. The text is supplemented by more than 650 photographs, and 200 tables and graphs. Fighter production figures are also included. After an introduction of each type, a heavily illustrated overview of earlier inter-war production from 1920-on, along with a discussion and illustration of wartime experimental types, is provided. A lengthy section considering several technical factors affecting fighter performance follows. These include engine models, supercharger types, propellers, aerodynamic thrust, lift and drag, aircraft weight, balance, stability and control, and armament. America's Hundred Thousand also provides details of each U.S. World War II production fighter in terms of models and changes, numbers produced, and major engine and aircraft performance aspects - in tabular and graphical form - details of weights, discussion of handling qualities and general comments, along with detailed descriptions containing many illustrations of aircraft structures and systems showing the technology of that time. In addition a

comprehensive week-to-week and month-to-month chronology of development and wartime combat operational life for each fighter is provided, including many photos. This study concludes with comparisons of the eleven types in terms of program milestones, aircraft drag, power available at various altitudes, speed, climb, rolling and turning, acceleration, and diving performance, as well as general evaluations by World War II pilots.
