Hong Kong Architecture 1945-2015 Charlie Q. L.

Xue,2016-06-13 This book focuses on the transformation from colonial to global – the formation, mechanism, events, works and people related to urban architecture. The book reveals hardships the city encountered in the 1950s and the glamour enjoyed in the 1980s. It depicts the public and private developments, and especially the public housing which has sheltered millions of residents. The author identifies the architects practising in the formative years and the representatives of a rising generation after the 1980s. Suffering from land shortage and a dense environment, the urban development of Hong Kong has in the past 70 years met the changing demands of fluctuating economic activities and a rising population. Architecture on the island has been shaped by social demands, the economy and technology. The buildings have been forged by the government, clients, planners, architects, many contractors and end-users. The built environment nurtures our life and is visual evidence of the way the city has developed. Hong Kong is a key to East Asia in the Pacific Era. The book is a must-read for a thorough understanding the contemporary history and architecture of this oriental pearl. Endorsement: “Hong Kong sets an extreme example of hyper-density living. MTR’s Kowloon Station project offered my firm the unique opportunity to contribute to a new type of fully integrated three dimensional transport mega-structure, conceived as a well-connected place for people to live, work and play. Through Charlie Xue’s book, one can see how a compact city works and high density integrated development indicates a sustainable path for modern city making.” Sir Terry Farrell, CBE, Principal, Farrells Well researched and refreshingly well structured, Charlie Xue's latest book comprehensively shows how Hong

Kong's post-war urban architecture both tracks and symbolizes the former British colony's rise to success - a must read for architecture and culture buffs alike. Peter G. Rowe, Raymond Garbe Professor of Architecture and Urban Design, Harvard University Distinguished Service Professor. "An essential addition to the growing literature on Chinese architecture, the title of the book belies the full scope of Xue's extensive history. Covering Hong Kong's postwar transition from defeated colony to Pacific Age power house, Xue expertly traces the evolution of the city's ambitious and innovative programs of integrated high density urban design and infrastructure, as well as changing architectural fashions. In a time when many Western governments have all but abandoned public housing programs, Xue's book is a timely reminder of what can be achieved." Professor Chris Abel, author of Architecture and Identity, Architecture, technology and process and The Extended Self."/p>

The Making of Hong Kong Barrie Shelton, Justyna Karakiewicz, Thomas Kvan, 2013-03-01 This book investigates what the history of Hong Kong's urban development has to teach other cities as they face environmental challenges, social and demographic change and the need for new models of dense urbanism. The authors describe how the high-rise intensity of Hong Kong came about; how the forest of towers are in fact vertical culs de sac; and how the city might become truly 'volumetric' with mixed activities through multiple levels and 3D movement networks incorporating 'town cubes' rather than town squares. Sou Fujimoto Sōsuke Fujimoto, Serpentine Gallery, 2013 From the Gallery website: The Serpentine Gallery Pavilion 2013 is designed by multi award-winning Japanese architect

Sou Fujimoto. He is the thirteenth and, at 41, youngest architect to accept the invitation to design a temporary structure for the Serpentine Gallery. The most ambitious architectural programme of its kind worldwide, the Serpentine's annual Pavilion commission is one of the most anticipated events on the cultural calendar. Past Pavilions have included designs by Herzog & de Meuron and Ai Weiwei (2012), Frank Gehry (2008), the late Oscar Niemeyer (2003) and Zaha Hadid, who designed the inaugural structure in 2000. We are thrilled to be working with one of the most fascinating architects in the world today. A visionary, who has conceived an extraordinary response to our invitation to design the Serpentine Gallery Pavilion, Sou Fujimoto has designed a structure that will enthral everyone that encounters it throughout the summer. --Julia Peyton-Jones, Director, and Hans Ulrich Obrist, Co-Director, Serpentine Gallery

Indelible City Louisa Lim, 2023-04-18 A NEW YORK TIMES NOTABLE BOOK OF THE YEAR An award-winning journalist and longtime Hong Konger indelibly captures the place, its people, and the untold history they are claiming, just as it is being erased. The story of Hong Kong has long been dominated by competing myths: to Britain, a “barren rock” with no appreciable history; to China, a part of Chinese soil from time immemorial, at last returned to the ancestral fold. For decades, Hong Kong’s history was simply not taught, especially to Hong Kongers, obscuring its origins as a place of refuge and rebellion. When protests erupted in 2019 and were met with escalating suppression from Beijing, Louisa Lim—raised in Hong Kong as a half-Chinese, half-English child, and now a reporter who has covered the region for nearly two decades—realized that she was

uniquely positioned to unearth the city's untold stories. Lim's deeply researched and personal account casts startling new light on key moments: the British takeover in 1842, the negotiations over the 1997 return to China, and the future Beijing seeks to impose. *Indelible City* features guerrilla calligraphers, amateur historians and archaeologists, and others who, like Lim, aim to put Hong Kongers at the center of their own story. Wending through it all is the King of Kowloon, whose iconic street art both embodied and inspired the identity of Hong Kong—a site of disappearance and reappearance, power and powerlessness, loss and reclamation.

Brutal London Zupagrafika,2016 Appealing to fans of architecture, this ingeniously designed book lets you build replicas of some of London's iconic post-war concrete structures while learning about their place in the city's architectural history. In this fun and intellectually stimulating book, readers can recreate a number of London's most renowned Brutalist buildings. Opening with an informative history of the origins and philosophy of Brutalist architecture, the book then focuses on 9 buildings, including the Barbican Estate, Robin Hood Gardens, Balfron Tower and the National Theatre. The first part of the book looks at the significance of each of these buildings, with a short chapter on each, complete with texts and images. The second part of the book consists of a series of 9 pre-cut and folded buildings, printed on heavy card stock, that readers can detach and construct with easy-to-follow instructions. At once fun and informative, this unique book offers a challenging and entertaining approach to architecture.

Last One In Nicholas Kulish,2009-10-13 Jimmy Stephens makes the worst mistake of his career as a gossip columnist

when he wrongly accuses a big star of cheating on his wife. With lawsuits pending, Jimmy's imperious new editor blackmails him into taking the place of the paper's injured front-line war correspondent. Shipped off to the desert and embedded with a group of foulmouthed but fraternal Marines, Jimmy provides a bewildered but unfiltered view of the invasion of Iraq that is alternately hair-raising, hilarious, and heartbreaking.

Remaking Beijing Wu Hung, 2005 In 1949, Beijing still retained nearly all of its time-honored character and magnificence. But when Chairman Mao rejected the proposal to build a new capital for the People's Republic of China and decided to stay in the ancient city, he initiated a long struggle to transform Beijing into a shining beacon of socialism. So began the remaking of the city into a modern metropolis rife with monuments, public squares, exhibition halls, and government offices. Wu Hung grew up in Beijing and experienced much of the city's makeover firsthand. In this lavishly illustrated work, he offers a vivid, often personal account of the struggle over Beijing's reinvention, drawing particular attention to Tiananmen Square—the most sacred space in the People's Republic of China. Remaking Beijing considers the square's transformation from a restricted imperial domain into a public arena for political expression, from an epic symbol of socialism into a holy relic of the Maoist regime, and from an official and monumental complex into a site for unofficial and antigovernment demonstrations. Wu Hung also explores how Tiananmen Square has become a touchstone for official

art in modern China—as the site for Mao's monumental portrait, as the location of museums narrating revolutionary history, and as the grounds for extravagant National Day parades celebrating the revolutionary masses. He then shows how in recent years the square has inspired artists working without state sponsorship to create paintings, photographs, and even performances that reflect the spirit of the 1989 uprisings and pose a forceful challenge to official artworks and the sociopolitical system that supports them. Remaking Beijing will reward anyone interested in modern Chinese history, society, and art, or, more generally, in how urban renewal becomes intertwined with cultural and national politics.

Paris is the city of chic—and as such, its innate style shines throughout the city, even in the simplest spaces. Quaint bistros, picturesque alleyways, artists' studios and unique characters are elevated to a modern-day genre painting when set in Paris. From skateboarders to antiquarians, this volume is a glimpse into Parisian life, as if peering over the edge of the balcony at your own pied-a-terre.

Towards a New Museum Victoria Newhouse, 2007-01-01

Since first publication in 1998, *Towards a New Museum* has achieved iconic status as a seminal exploration of the late-20th-century revolution in museum architecture: the transformation from museum as restrained container for art to museum as exuberant companion to art. Author Victoria Newhouse critiqued numerous institutions for the display of

art opened in the 1970s, 1980s, and 1990s, culminating in Frank Gehry's Guggenheim in Bilbao and Richard Meier's Getty Center in Los Angeles. In this expanded edition, she continues her investigation of new museums, assessing the radical, 21st-century changes that have propelled Herzog & de Meuron's De Young Museum in San Francisco and SANAA's 21st Century Museum of Contemporary Art in Kanazawa, Japan, to the forefront of this building type. Among the institutions added to this new edition are the Giovanni and Marella Agnelli Pinacoteca, perched atop an enormous Fiat factory in Turin, Italy, and the Nasher Sculpture Center in Dallas, both by Renzo Piano Building Workshop; three notable updates of the museum as sacred space, two by Yoshio Taniguchi and one by SANAA; the Lois & Richard Rosenthal Center for Contemporary Art in Cincinnati by Zaha Hadid; and expansions of the Reina Sofia Museum of Modern Art in Madrid by Ateliers Jean Nouvel, the Walker Art Center in Minneapolis by Herzog & de Meuron, and the Museum of Modern Art in New York by Taniguchi. Finally, the De Young Museum, reflecting its own eclectic conditions, and the 21st Century Museum, consisting of non-hierarchical spaces for every conceivable kind of contemporary artwork as well as facilities for social exchange, are innovative hybrids that propose new directions for the future of museum architecture.

Hong Kong Murders Kate Whitehead, 2001 In this unique and engrossing story, Kate Whitehead shows how murders committed in Hong Kong reflect various aspects of its life. It will appeal to anyone with an interest in Hong Kong, Chinese culture and society, and psychology.

Dreaming Up Christy Hale, 2012 A collection of illustrations, concrete poetry, and photographs that shows how young children's constructions, created as they play, are reflected in notable works of architecture from around

The Vertical City K. Al-Kodmany, 2018-06-25 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception. As cities try to cope with rapid population growth - adding 2.5 billion dwellers by 2050 - and grapple with destructive sprawl, politicians, planners and architects have become increasingly interested in the vertical city paradigm. Unfortunately, cities all over the world are grossly unprepared for integrating tall buildings, as these buildings may aggravate multidimensional sustainability challenges resulting in a “vertical sprawl” that could have worse consequences than “horizontal” sprawl. By using extensive data and numerous illustrations this book provides a comprehensive guide to the successful and sustainable integration of tall buildings into cities. A new crop of skyscrapers that employ passive design strategies, green technologies, energy-saving systems and innovative renewable energy offers significant architectural improvements. At the urban scale, the book argues that planners must integrate tall buildings with efficient mass transit, walkable neighbourhoods, cycling networks, vibrant mixed-use activities, iconic transit stations, attractive plazas, well-landscaped streets, spacious parks and engaging public art. Particularly, it proposes the Tall Building and Transit Oriented Development (TB-TOD) model as one of the sustainable options for large cities going forward. Building on the work of leaders in the fields of ecological and sustainable design, this book will open readers’ eyes to a wider range of possibilities for utilizing green, resilient, smart, and sustainable features in architecture and urban planning projects. The 20 chapters offer comprehensive reading for all those interested in the planning, design, and construction of sustainable cities.

Made by the Office for Metropolitan Architecture

Albena Yaneva, 2009 Summary: The book presents an ethnographic account of the design rhythm in the Office for Metropolitan Architecture. Written as a collection of short stories, it draws on the mundane trajectories of models and architects at the OMA. Includes photo documentation on various projects: the Seattle Public Library, the Whitney Museum of American Art in New York, the China Central Television (CCTV) in Beijing, the Los Angeles County Museum of Art (LACMA), la Casa da Musica in Porto, etc.
