Essex-Class Aircraft Carriers 1945-91 Mark Stille, 2022-09-15

A history of the enduring Essex-class ships, the US Navy's finest and most numerous fleet carrier during World War II, which were modernized repeatedly and served with distinction. The Essex class was the USN's war-winning ship class of the Pacific War. Of the 24 ships completed, 14 saw action, making the Essex class the largest class of fleet aircraft carriers ever built. These ships had a fine balance of striking power, protection, and speed and were modernized during and after the war. There were five distinct programs carried out, adding not only angled flight decks for jet operations, but repeated upgrades to sensors, weapons, and equipment. Essex-class carriers were used in a number of roles and provided the vast majority of US Navy air power in the Korean War, and a sizeable proportion of air power in the Vietnam conflict. However, as the "super carriers" began to enter service in the early 1960s, the Essex class was relegated to secondary roles- a single Essex carrier served until 1991 as the US Navy's training carrier. Using detailed artwork and photos, this book provides an in-depth portrait of this important and enduring class of ship, and looks at its development and modifications while considering the many and varied actions it took part in.

Essex Class Aircraft Carriers of the Second World War Steve Backer, 2009-03-19 The latest volume covers the hugely important American carrier of the Second World War. Built in larger numbers than any fleet carrier before or since, the Essex class can claim to be the US Navy's most significant weapon in the defeat of Japan. Carrying up to 100 aircraft and capable of absorbing enormous punishment (not one was sunk), they spearheaded the Fast Carrier Task Forces for most of the Pacific War.??The heavily illustrated work contains everything a modeller needs to know about this prolific class.

**Force without War** Barry Blechman, Stephen S. Kaplan, 2010-12-01 The United States has used military force short of war as an instrument of diplomacy on many occasions and in many areas of the world in the years since the Second World War. This book describes and analyzes the circumstances accompanying 215 shows of force and examines how effective these actions were in helping to attain U.S. foreign policy objectives. Which type of force (air, ground, naval) was most often used? What did the forces do and how effective were they? Of what significance was Soviet involvement when U.S. military power was called upon to influence events? Was the threat presented by the alerting or deployment of strategic nuclear forces or by very large conventional forces especially telling?

How clear is it that a desired effect was in fact caused by the demonstration of force? Barry Blechman and Stephen Kaplan explore these and other questions, examining also such elements as a President's domestic popularity and personal diplomacy preceding or during crises that led to U.S. military demonstrations. Complementing their analysis are five sets of case studies describing ten instances of the use of American military power to influence events in Central and Eastern Europe, the Middle East, South and Southeast Asia, and the Caribbean. The case studies—by David K. Hall, William B. Quandt, Jerome N. Slater, Robert M. Slusser, and Philip Windsor—focus on the reasons for U.S. action and the methods adopted, on the behavior of other parties, and on the relation between the use of force and the resolution of the crisis. The book's main conclusion is that the demonstrative use of U.S. armed forces has often stabilized a deteriorating situation enough to avoid further deterioration, relieved domestic and international pressure for more drastic and possibly self-defeating action, and gained time for diplomacy to achieve a more lasting remedy.

**Japanese Destroyer Captain** Tameichi Hara, 2011-08-15

This highly regarded war memoir was a best seller in both Japan and the United States during the 1960s and has long been treasured by historians for its insights into the Japanese side of the surface war in the Pacific. The author was a survivor of more than one hundred sorties against the Allies and was known throughout Japan as the Unsinkable Captain. A hero to his countrymen, Capt. Hara exemplified the best in Japanese surface commanders: highly skilled (he wrote the manual on torpedo warfare), hard driving, and aggressive. Moreover, he maintained a code of honor worthy of his samurai grandfather, and, as readers of this book have come to appreciate, he was as free with praise for American courage and resourcefulness as he was critical of himself and his senior commanders.

**Twelve Years a Slave** Solomon Northup, 2024-01-04

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807- c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Air Controlman United States. Naval Technical Training Command, 1954

Double-Edged Secrets W.J. Holmes, 2013-01-15 In the foreword to this book, first published in 1978, Sen. Daniel Inouye describes the story as the raw material of adventure fiction--but this is all true and told in a manner that is at the same time fascinating and professional. Despite the passage of twenty years and the appearance of several studies of code breaking, this inside look at naval intelligence in the Pacific is as powerful as

ever. This book provides a compassionate and unique understanding of the war and the business of intelligence gathering. Assigned to the combat intelligence unit in Honolulu from June 1941 to the end of the war, W. J. Holmes shares his history-making experiences as part of an organization that collected, analyzed, and disseminated naval intelligence throughout World War II. His book not only captures the mood of the period but gives rare insight into the problems and personalities involved, allowing the reader to fully appreciate the painful moral dilemma faced daily by commanders in the Pacific once the Japanese naval codes were broken. Every time the Americans made use of the enemy messages they had decoded, they increased the probability of the Japanese realizing what had happened and changing their codes. And such a change would cause the U.S. Pacific Fleet to lose a vital edge. On the other hand, withholding the information could--and sometimes did--result in the loss of U.S. lives and ships. This revealing study illuminates the difficulties in both collecting intelligence and deciding when to use it.

**The Japanese Submarine Force and World War II** Akihiko Yoshida,2013-01-15 When first published in 1995, this book was hailed as an absolutely indispensable contribution to the history of the Pacific War. Drawing heavily from Japanese sources and American wartime intercepts of secret Japanese radio messages, a noted American naval historian and a Japanese mariner painstakingly recorded and evaluated a diverse array of material about Japan's submarines in World War II. The study begins with the development of the first Japanese 103-ton Holland-type

submergible craft in 1905 and continues through the 1945 surrender of the largest submarine in the world at the time, the 5300-ton I-400 class that carried three airplanes. Submarine weapons, equipment, personnel, and shore support systems are discussed first in the context of Japanese naval preparations for war and later during the war. Both successes and missed opportunities are analyzed in operations ranging from the California coast through the Pacific and Indian Oceans to the coast of German-occupied France. Appendixes include lists of Japanese submarine losses and the biographies of key Japanese submarine officers. Rare illustrations and specifically commissioned operational maps enhance the text.
