*Tiger I: German Army Heavy Tank* Dennis Oliver,2019-10-30 The Tiger I tank, probably the most famous German armoured vehicle of the Second World War, might have been a war-winning, break-through weapon if it had been produced in sufficient numbers and if it had been introduced earlier on the Eastern Front, before the balance of strength had tipped towards the Soviet Union. At the Battle of Kursk there were not enough Tigers to make a decisive difference and thereafter the Tiger was forced to play a mainly defensive role as the Wehrmacht struggled to withstand the advances of the Red Army. And it is this period in the Tiger tank's short history that Dennis Oliver concentrates on in this, his third book on the Tiger in the TankCraft series. He uses archive photos and extensively researched colour illustrations to examine the tanks and units of the German army's heavy panzer battalions. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of the Tigers of 1943.

**Tiger I** Dennis Oliver,2018-04-30 A fully illustrated guide to the German Tiger I tank and its operations in the field by the renowned expert on WWII armored vehicles. At Hitler's insistence, the first Tiger I tanks drove into action in Tunisia in December 1942. Despite their lack of reliability and the small number deployed, they quickly gained a fierce reputation. With its heavy armor and 88mm gun, the Tiger I outclassed all the Allied tanks then in service. Beyond their deployment in North Africa, they also operated in Sicily and Italy between 1943 and 1945. In his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tank and the German army units that first took them into combat. Perfect for model enthusiasts, Tiger I showcases available model kits and aftermarket products. It also includes a gallery of beautifully constructed and painted models in various scales. Technical details, as well as modifications introduced during production and in the field, are also examined providing everything the modeler needs to recreate an accurate representation of the tanks.

**Modelling a Tiger I Gruppe Fehrman, Germany 1945** Darren Thompson,2012-04-20 Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title is a detailed modelling guide on the 'F05', Gruppe Fehrmann, Germany 1945 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

**Tiger I, German Army Heavy Tank** Dennis Oliver,2021-12-30 This illustrated guide examines the famous WWII German tank and its operations in the Eastern Front, with extensive resources for modeling enthusiasts. Tiger I & Tiger II Tanks Dennis Oliver,2020-08-31 “Will be of great interest to modelers that plan to build a Tiger tank and to military historians alike.” —AMPS Indianapolis By the first weeks of 1945, the Eastern Front had been pushed back to the Carpathian mountain passes in the south and Warsaw on the Vistula River in the center, while in the north, the German army was fighting in East Prussia. The Wehrmacht's armored and mobile formations were now employed exclusively as fire brigades, rushed from one crisis to the next as the Red Army pushed inexorably westward. Critical to the German defense were the army's heavy Panzer battalions, whose Tiger tanks, with their 8.8 cm guns, were almost invincible on the open plains of central Europe. In his latest book in the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and units of the German Army and Waffen-SS heavy Panzer battalions that struggled to resist the onslaught of Soviet armor during the last days of the conflict that culminated in the battle for Berlin. A key section of this book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to create an accurate representation of these historic tanks.

*Tiger Tanks at War* Michael Green, James D. Brown, 2008-02-15 The first prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production. This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably. His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.

**Tiger I** Dennis Oliver, 2018-04-30 When at Hitler's insistence the first Tiger I tanks went into action in Tunisia in December 1942 they rapidly gained a formidable fighting reputation despite their lack of reliability and the small number deployed. With its heavy armour and 88mm gun, it outclassed all the Allied tanks then in service and forced the Allies to accelerate the introduction of improved anti-tank guns and tanks that could match the Tiger in terms of firepower and protection. In this, his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and German army units that first took them into combat in North Africa and then operated them as they fell back through Sicily and Italy between 1943 and 1945. **Tiger 1** Hilary Louis Doyle, Thomas L. Jentz, 1997

Germany's Tiger Tanks Thomas L. Jentz, Hilary L. Doyle, 1997 This new volume covers development from the VK 45.02(P), VK 45.03(H) to the modifications under design for the Tiger II at the end of the war. All of this illustrated with scale drawings by Hilary L. Doyle combined with drawings, sketches, and photographs depicting external modifications as well as internal views. Over twenty years of intensive research went into finding the original documents needed to create this new history on the development, characteristics, and tactical capabilities of the Tiger series. Tom Jentz has conducted an exhaustive search for surviving records of the design/assembly firms (including Henschel, Krupp, Nibelungenwerk, Porsche, and Wegmann), the Heeres-Waffenamt, the D656 series of manuals on the Tiger, and the war diaries and operations reports from the German units. The written records were supplemented by examining thousands of photos. On-sight research into almost all the surviving Tigers provided details that could only be obtained from actual specimens. New information was found on the evolution of the heavy tank series, the key decisions on the design of the Tigers, the significant modifications made during the production runs, production statistics, the Tigers characteristics and tactical capabilities, an exact accounting of the issue of the Tigers to the combat units, and combat account written directly after the actions. Tom Jentz is also the author of Germany's Tiger Tanks: Tiger I & II - Combat Tactics; Germany's Panther Tank: The Quest for Combat Supremacy; Panzertruppen 1933-1942; and Panzertruppen 1943-1945 (all four titles are available from Schiffer Publishing Ltd.).

*Tigers I and II* David Doyle, 2019-11-28 Germany's Tiger tank, whether in the form of the Tiger I or later Tiger II (King Tiger), was the most feared tank of WWII. Despite production totaling fewer than 2,000 units, its heavy armor, its power, and perhaps the even more powerful Nazi propaganda machine ensured that the Tiger remains well known over seven decades after last being on the battlefield. Through more than 175 photos, this volume chronicles the design, development, and deployment of this famed German tank. Full-color photographs of rare surviving examples from around the globe augment carefully selected war-era photos in bringing this tank back to life. Comprehensive tables reveal the details of performance and technical specifications of each variant. A concise, easy-to-read text and detailed photographic captions expose the secrets of this iconic tank. Part of the Legends of Warfare series.

**Pz. Kpfw IV Family** Marek Jaszczolt, Jacek Pasieczny, 2013-01-17 \*Illustrated color reference guide to the Pz.Kpfw. VI Tiger Tiger I is the common name of a German heavy tank developed in 1942 and used in World War II. The final official German designation was Panzerkampfwagen Tiger Ausf. E, often shortened to Tiger. It was an answer to the unexpectedly formidable Soviet armor encountered in the initial months of the Axis invasion of the Soviet Union, particularly the T-34 and the KV-1. The Tiger I design gave the Wehrmacht its first tank mounting the 88 mm gun, in its initial armored fighting vehicle-dedicated version, which in its Flak version had previously demonstrated its effectiveness against both air and ground targets. During the course of the war, the Tiger I saw combat on all German battlefronts. It was usually deployed in independent tank battalions, which proved to be quite formidable. While the Tiger I was feared by many of its opponents, it was over-engineered, used expensive and labor intensive materials and production methods, and was time-consuming to produce. Only 1,347 were built between August 1942 and August 1944. The Tiger was prone to certain types of track failures and immobilizations, and limited in range by its huge fuel consumption. It was, however, generally mechanically reliable but expensive to maintain. It was also complicated to transport, and vulnerable to immobilization when mud, ice and snow froze between its overlapping and interleaved road wheels in winter weather conditions, often jamming them solid. In 1944, production was phased out in favor of the Tiger II. A big decal sheet with 1:72, 1:48 and 1:35 individual and national markings for 16 Pz.Kpfw. VI Tiger tanks. The decal sheet was printed by Cartograf. Each painting scheme is depicted on beautifully drawn color profile and described in the guidebook with English and Polish text.

**Tiger 1 On the Western Front** Jean Restayn, 2001-06-09 The heavily armored Tiger I became the most famous German tank of World War II. The Tigers were originally intended to counter the heavy tanks of the Russian Front, and were assigned to specially created tank battalions. In 1944 Tiger units were rushed to Normandy and fought in all the major battles of the Western Front. Although they were superior to all the tanks of the Western allies, Tigers in the West faced the added danger of attack from the greatly superior British and American air forces. Each Wehrmacht and Waffen-SS unit equipped with the Tiger I is covered in detail. Each unit's insignia and a representative vehicle with camouflage and markings is shown in color. The operational history of each unit, and in some cases individual vehicles, is described with the aid of 250 black and white photos, most of them never before published.

**Tiger!** David Fletcher, 2021

**Tiger I and Tiger II** Dennis Oliver, 2016-10-31 A guide blending the history behind the two World War II German tanks with resources for military vehicle modeling enthusiasts. In spite of the relatively small numbers produced, the Tiger I and Tiger II tanks are arguably the most famous armored fighting vehicles of the Second World War. This book, the first in the TankCraft series, uses archive photos and extensively researched color illustrations to examine the tanks and units of the German Army and Waffen-SS heavy panzer battalions that attempted to hold back the Red Army during 1944. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of the tanks that fought from the snow-covered fields of Byelorussia and the Ukraine, through the Baltic States, and into Poland and Hungary. "From a technical standpoint the book is a winner. Throw in all of the unit histories and then add the modelling, and it is a superb book on the Tiger I-II tanks. . . . The book is really a showcase of the [modelers] and their builds, and gives the rest of us a shot in the arm to up our game on our next Tiger tank." —A Wargamers Needful Things

**The Combat History of German Heavy Anti-Tank Unit 653 in World War II** Karlheinz Munch, 2005 Hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and Jagdtiger Color illustrations focus on unit markings, numbering, and camouflage Accompanying text chronicles the unit's combat operations plus there are personal accounts from the men who rode in these mechanical monsters German Heavy Anti-Tank Unit 653 was equipped with the heaviest tank destroying vehicles of the German armed forces. Initially activated as an assault gun battalion and redesignated

in April 1943, the 653 received its first Ferdinand heavy tank destroyers (later modified and renamed Elephants) in May 1943 and went into action on the Eastern Front a month later. In 1944, the unit converted to the even more massive Jagdtiger. The seventy-five-ton, heavily armored Jagdtiger was the behemoth of the battlefield and boasted a 128mm gun-as opposed to the Ferdinand's 88-with a range of more than thirteen miles, making it deadly despite its limited mobility. Outfitted with these lethal giants, the 653 saw service in Russia, Italy, Austria, and Germany.
