Crusader and Covenant Cruiser Tanks 1939-45 David Fletcher, 2012-05-20 The Covenant (which never saw active service) and Crusader Cruiser tanks were developed between 1939 and 1940. The Crusader first saw action in the North African desert in June 1941: its speed and sleek design made it a hard target to hit, and the tank was well-respected by the Afrikakorps for its velocity in combat. But its hurried development prior to World War II also made it prone to mechanical failure. This book examines the Covenant and the many variants of the Crusader tank, detailing the designs, developments and disappointments of these infamous World War II tanks.

A15 Cruiser Mk.VI Crusader Tank A Technical History P. M. Knight, 2015-05-17 There can be few tanks that have proved as controversial in their deployment as the Crusader, a tank that was invested with high hopes on its entry into service in 1941. This book investigates in unprecedented detail the issues that impinged on its service life. Drawing extensively on original archive sources, a new perspective is drawn on both the employment of the tank itself, and on British tank development of the era. The complex story that unfolds encompasses many interwoven and sometimes contradictory threads, allowing the author to reach both perceptive and surprising conclusions.

Bringing Columbia Home Michael D. Leinbach, Jonathan H. Ward, 2018-01-23 Voted the Best Space Book of 2018 by the Space Hipsters The dramatic inside story of the epic search and recovery operation after the Columbia space shuttle disaster. On February 1, 2003, Columbia disintegrated on reentry before the nation's eyes, and all seven astronauts aboard were lost. Author Mike Leinbach, Launch Director of the space shuttle program at NASA's John F. Kennedy Space Center was a key leader in the search and recovery effort as NASA, FEMA, the FBI, the US Forest Service, and dozens more federal, state, and local agencies combed an area of rural east Texas the size of Rhode Island for every piece of the shuttle and her crew they could find. Assisted by hundreds of volunteers, it would become the largest ground search operation in US history. This comprehensive account is told in four parts: Parallel Confusion Courage, Compassion, and Commitment Picking Up the Pieces A Bittersweet Victory For the first time, here is the definitive inside story of the Columbia disaster and recovery and the inspiring message it ultimately holds. In the aftermath of tragedy, people and communities came together to help bring home the remains of the crew and nearly 40 percent of shuttle, an effort that was instrumental in piecing together what happened so the shuttle program could return to flight and complete the International Space Station. *Bringing Columbia Home* shares the deeply personal stories that emerged as NASA employees looked for lost colleagues and searchers overcame immense physical, logistical, and emotional challenges and worked together to accomplish the impossible. Featuring a foreword and epilogue by astronauts Robert Crippen and Eileen Collins, and dedicated to the astronauts and recovery search persons who lost their lives, this is an incredible, compelling narrative about the best of humanity in the darkest of times and about how a failure at the pinnacle of human achievement became a story of cooperation and hope.

Armored Thunderbolt Steve Zaloga, 2008 • Hundreds of photos, including many never published before with riveting accounts of armored warfare in World War II • Compares the Sherman to other tanks, including the Panther and Tiger • Author is a world-renowned expert on the Sherman tank and American armor Some tank crews referred to the American M4 Sherman tank as a death trap. Others, like Gen. George Patton, believed that the Sherman helped win World War II. So which was it: death trap or war winner? Armor expert Steven Zaloga answers that question by recounting the Sherman's combat history. Focusing on Northwest Europe (but also including a chapter on the Pacific), Zaloga follows the Sherman into action on D-Day, among the Normandy hedgerows, during Patton's race across France, in the great tank battle at Arracourt in September 1944, at the Battle of the Bulge, across the Rhine, and in the Ruhr pocket in 1945.

The Battleship Bismarck Waldemar Góralski, 2014 Even if they failed to encounter the enemy, every one of their sorties amounted to a brush with death. There were many dangers for Luftwaffe night fighters to contend with; hazardous weather conditions, fog rolling out of nowhere, return fire from the British bombers, enemy night fighters at work over German airfields and simple fatigue could all lead to tragedy. One of the men who survived all of this was Ofw. Kurt Bundrock. Born on 2nd February 1917 in Berlin, Bundrock flew as Bordfunker (radio operator) with NJG 1's ace Hptm. Reinhold Knacke (44 night victories).

The Mushroom at the End of the World Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world--and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Voyage of Mercy Stephen Puleo, 2020-03-03 "Puleo has found a new way to tell the story with this well-researched and splendidly written chronicle of the Jamestown, its captain, and an Irish priest who ministered to the starving in Cork city...Puleo's tale, despite the hardship to come, surely is a tribute to the better angels of America's

nature, and in that sense, it couldn't be more timely." -The Wall Street Journal The remarkable story of the mission that inspired a nation to donate massive relief to Ireland during the potato famine and began America's tradition of providing humanitarian aid around the world More than 5,000 ships left Ireland during the great potato famine in the late 1840s, transporting the starving and the destitute away from their stricken homeland. The first vessel to sail in the other direction, to help the millions unable to escape, was the USS Jamestown, a converted warship, which left Boston in March 1847 loaded with precious food for Ireland. In an unprecedented move by Congress, the warship had been placed in civilian hands, stripped of its guns, and committed to the peaceful delivery of food, clothing, and supplies in a mission that would launch America's first full-blown humanitarian relief effort. Captain Robert Bennet Forbes and the crew of the USS Jamestown embarked on a voyage that began a massive eighteen-month demonstration of soaring goodwill against the backdrop of unfathomable despair—one nation's struggle to survive, and another's effort to provide a lifeline. The Jamestown mission captured hearts and minds on both sides of the Atlantic, of the wealthy and the hardscrabble poor, of poets and politicians. Forbes' undertaking inspired a nationwide outpouring of relief that was unprecedented in size and scope, the first instance of an entire nation extending a hand to a foreign neighbor for purely humanitarian reasons. It showed the world that national generosity and brotherhood were not signs of weakness, but displays of quiet strength and moral certitude. In *Voyage of Mercy*, Stephen Puleo tells the incredible story of the famine, the Jamestown voyage, and the commitment of thousands of ordinary Americans to offer relief to Ireland, a groundswell that provided the collaborative blueprint for future relief efforts, and established the United States as the leader in international aid. The USS Jamestown's heroic voyage showed how the ramifications of a single decision can be measured not in days, but in decades.

Deep Maneuver Jack D Kern Editor, Jack Kern, 2018-10-12 Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

British Battle Tanks David Fletcher, 2017-08-24 Plagued by unreliable vehicles and poorly thought-out doctrine, the early years of World War II were years of struggle for Britain's tank corps. Relying on tanks built in the late 1930s, and those designed and built with limited resources in the opening years of the war, they battled valiantly against an opponent well versed in the arts of armoured warfare. This book is the second of a multi-volume history of British tanks by renowned British armour expert David Fletcher MBE. It covers the development and use of the Matilda, Crusader, and Valentine tanks that pushed back the Axis in North Africa, the much-improved Churchill that fought with distinction from North Africa to Normandy, and the excellent Cromwell tank of 1944-45. It also looks at Britain's super-heavy tank projects, the TOG1 and TOG2, and the Tortoise heavy assault tank, designed to smash through the toughest of battlefield conditions, but never put into production.

Mary McGrory John Norris, 2015 A wildly entertaining biography of the trailblazing Washington columnist and the first woman to win the Pulitzer Prize for commentary Before there was Maureen Dowd or Gail Collins or Molly Ivins, there was Mary McGrory. She was a trailblazing columnist who achieved national syndication and reported from the front lines of American politics for five decades. From her first assignment reporting on the Army-McCarthy

hearings to her Pulitzer-winning coverage of Watergate and controversial observations of President Bush after September 11, McGrory humanized the players on the great national stage while establishing herself as a uniquely influential voice. Behind the scenes she flirted, drank, cajoled, and jostled with the most important figures in American life, breaking all the rules in the journalism textbook. Her writing was admired and feared by such notables as Lyndon Johnson (who also tried to seduce her) and her friend Bobby Kennedy who observed, Mary is so gentle--until she gets behind a typewriter. Her soirees, filled with Supreme Court justices, senators, interns, and copy boys alike, were legendary. Writing about Donald Trump's first divorce in 1990, she said, Watching the Trumps, Washington thinks of itself as wholesome.' As the red-hot center of the Beltway in a time when the newsrooms were dominated by men, McGrory makes for a powerfully engrossing subject. Laced with juicy gossip and McGrory's own acerbic wit, John Norris's colorful biography reads like an insider's view of latter-day American history--and one of its most enduring characters.

The Light of Truth Ida B. Wells, 2014-11-25 The broadest and most comprehensive collection of writings available by an early civil and women's rights pioneer Seventy-one years before Rosa Parks's courageous act of resistance, police dragged a young black journalist named Ida B. Wells off a train for refusing to give up her seat. The experience shaped Wells's career, and when hate crimes touched her life personally--she mounted what was to become her life's work: an anti-lynching crusade that captured international attention. This volume covers the entire scope of Wells's remarkable career, collecting her early writings, articles exposing the horrors of lynching, essays from her travels abroad, and her later journalism. The Light of Truth is both an invaluable resource for study and a testament to Wells's long career as a civil rights activist. Catwoman: Lonely City (2021-) #1 Cliff Chiang, 2021-10-19 Ten years ago, the massacre known as Fools' Night claimed the lives of Batman, The Joker, Nightwing, and Commissioner Gordon...and sent Selina Kyle, the Catwoman, to prison. A decade later, Gotham has grown up--it's put away costumed heroism and villainy as childish things. The new Gotham is cleaner, safer...and a lot less free, under the watchful eye of Mayor Harvey Dent and his Batcops. It's into this new city that Selina Kyle returns, a changed woman...with her mind on that one last big score: the secrets hidden inside the Batcave! She doesn't need the money--she just needs to know...who is "Orpheus"? Visionary creator Cliff Chiang (Wonder Woman, Paper Girls) writes, draws, colors, and letters the story of a world without Batman, where one woman's wounds threaten to tear apart an entire city! It's an unmissable artistic statement that will change the way you see Gotham's heroes and villains forever!

Into the Vally Dick Taylor, 2012-02-23 The Valentine was unusual, as unlike most British tanks to see service during WW2 it began life as a private venture. That is, it was not designed to a General Staff (GS) specification, but came off the drawing-board with the intention of exciting enough interest within the military establishment to secure an order. The Valentine had the highest production numbers of any wartime British tank, and arguably the most variations. A total of 8000+ Valentines were produced in no fewer than 11 variants. The Valentine tank received its baptism of fire with the British 8th Army in Operation Crusader in North Africa during July 1941, representing just the beginning of a long career, as they would eventually take part in combat in both the European and Pacific Theaters. After the war, Valentines served in several armies as late as 1960. Valentines also

saw action with the armed forces of Canada, the Soviet Union, Poland, Australia, and New Zealand. Book contents: Development, Technical Description, Marks Descriptions, Operational Use, Colors and Markings, Variants, Survivors. Author Dick Taylor is a serving British Army officer with wide experience of tank operations, and a history degree. He has written many popular books on British tanks, and has drawn on official and private sources to produce this comprehensive book.

Blue Moon over Cuba William B Ecker USN (ret.), Kenneth V. Jack, Michael Dobbs, 2012-08-21 New Book "Blue Moon Over Cuba" Unearths Crucial Evidence That Helped Kennedy Gather Intelligence on the Cuban Missile Crisis in October 1962 Insider's perspective on the aerial reconnaissance missions arrives just in time for the 50th anniversary of the Cuban Missile Crisis October 16-28, 2012 will mark the 50th anniversary of the Cuban Missile Crisis. One of the forgotten yet crucial details of the crisis are the low-level reconnaissance missions-designated as Operation Blue Moon---flown by US Naval, Marine Corps and Air Force pilots that proved to Kennedy that the Russians had moved missiles onto Cuba. Blue Moon Over Cuba (Osprey, August 2012) began as the unfinished memoirs of the commander of the naval squadron that flew the top-secret missions, Captain William B. Ecker. Ecker was the lead aviator on the first mission and went on to play a leading role in the reconnaissance flights throughout the crisis. The book was completed by historian Ken Jack. In the book, Capt. Ecker tells the story of how on October 19, 1962, American military planners quietly ordered his squadron and their state-of-the art RF-8A Crusader jets to a remote airbase in Key West, Florida. (John Glenn had previously set a speed record in a Crusader.) Once there, the pilots and crews waited as CIA analysts made their case to President Kennedy. Ecker and his team got their orders on October 23rd. Their mission was to enter Cuban airspace at treetop level at a fraction below the speed of sound and photograph suspected missile sites with their suite of high-speed cameras. They flew width-wise across the narrow island and then to Naval Air Station Jacksonville, where the Navy's main photographic lab was located. As soon as the photos were developed and interpreted, they were delivered to the White House. On October 25th, Adlai Stevenson, the U.S. ambassador to the United Nations, exhibited prints of Capt. Ecker's photographs to his Russian counterpart and demanded an answer from him. From October 23rd-November 15th, 168 Blue Moon sorties were flown across Cuba by naval, marine and air force reconnaissance pilots-often under intense enemy fire. Those missions occurring after October 28th were used by Kennedy to verify the dismantling of the missile sites. For their role, the pilots and crews were presented with a Navy Unit Commendation by President Kennedy in November 1962, who said in his remarks, "The reconnaissance flights which enabled us to determine with precision the offensive build-up in Cuba contributed directly to the security of the United States in the most important and significant way."
