Universal Access in Human-Computer Interaction. Context Diversity Constantine

Stephanidis,2011-06-24 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 47 revised papers included in the third volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: universal access in the mobile context; ambient assisted living and smart environments; driving and interaction; interactive technologies in the physical and built environment.

Making Wicked Problems Governable? Ewan Ferlie,Louise Fitzgerald,Gerry McGivern,Sue

Dopson,Chris Bennett,2013-03-28 The book analyses the developments of inter-organizational networks in the UK National Health Service during the New Labour period, combining empirical case studies from various policy arenas (clinical genetics, cancer networks, sexual health networks, and long term care) with a theoretically informed analysis.

All Over Coffee Paul Madonna,2007-04-29 A new voice and vision for art as comics and comics as art -- and poetry.

The Traditional and National Music of Scotland Francis Collinson,2023-08-31 Originally published in 1966, this was the first book on this subject to be published for over a hundred years. It covers all facets including little-known types of Gaelic song, the bagpipes and their music, including the esoteric subject of pibroch, the Ceol Mor or 'Great Music' of the pipes. It gives a comprehensive review of the fiddle composers and their music, and of the Clarsach and its revival, with an example of all-but-extinct Scottish harp music. A chapter is devoted to the music of Orkney and Shetland and the book contains over 100 examples of music many of which were from the author's own collection and published here for the first time.

Marketing Discourse Per Skålén,Martin Fougère,Markus Fellelsson,2007-12-14

The marketing discipline has been dominated by managerial research that has never really been counterbalanced by a systematic critical analysis which is problematic given the assumed legitimization of the managerialism that has ensued. This book is an attempt to rest the balance, articulating a social critique and evaluation of marketing. The book offers a critical survey of the most important contributions to managerial marketing discourse from the earliest twentieth century onwards, covering

traditions of research such as scientific selling, marketing management and service marketing and drawing from Michel Foucault's understanding of power and Ernesto Laclau and Chantal Mouffe's Discourse Theory. The analysis reveals that managerial marketing discourse has promoted a government of organizations that is centred around the customer and that the shifts and turning points in this rationality through time signify more fundamental shifts in emphasis in the type of power promoted by marketing discourse and the subject positions it ascribes to people.

Managerial Lives Stefan Sveningsson, Mats Alvesson, 2016-06-09 This book examines the relationship between experience, situation and identity in the managerial life.

Desperate Passage Ethan Rarick, 2008-02-04 In late October 1846, the last wagon train of that year's westward migration stopped overnight before resuming its arduous climb over the Sierra Nevada Mountains, unaware that a fearsome storm was gathering force. After months of grueling travel, the 81 men, women and children would be trapped for a brutal winter with little food and only primitive shelter. The conclusion is known: by spring of the next year, the Donner Party was synonymous with the most harrowing extremes of human survival. But until now, the full story of what happened, what it tells us about human nature and about America's westward expansion, remained shrouded in myth. Drawing on fresh archaeological evidence, recent research on topics ranging from survival rates to snowfall totals, and heartbreaking letters and diaries made public by descendants a century-and-a-half after the tragedy, Ethan Rarick offers an intimate portrait of the Donner party and their unimaginable ordeal: a mother who must divide her family, a little girl who shines with courage, a devoted wife who refuses to abandon her husband, a man who risks his life merely to keep his word. But Rarick resists both the gruesomely sensationalist accounts of the Donner party as well as later attempts to turn the survivors into archetypal pioneer heroes. The Donner Party, Rarick writes, is a story of hard decisions that were neither heroic nor villainous. Often, the emigrants displayed a more realistic and typically human mixture of generosity and selfishness, an alloy born of necessity. A fast-paced, heart-wrenching, clear-eyed narrative history, *A Desperate Hope* casts new light on one of America's most horrific encounters between the dream of a better life and the harsh realities such dreams so often must confront.

Transcultural History Madeleine Herren, Martin Rüesch, Christiane Sibille, 2012-06-19 For the 21st century, the often-quoted citation 'past is prologue' reads the other way around: The global present lacks a historical narrative for the global past. Focussing on a transcultural history, this book questions the territoriality of historical concepts and offers a narrative, which aims to overcome cultural essentialism by focussing on crossing borders of all kinds. *Transcultural History* reflects critically on the

way history is constructed, asking who formed history in the past and who succeeded in shaping what we call the master narrative. Although trained European historians, the authors aim to present a useful approach to global history, showing first of all how a Eurocentric but universal historiography removed or essentialised certain topics in Asian history. As an empirical discipline, history is based on source material, analysed according to rules resulting from a strong methodological background. This book accesses the global past after World War I, looking at the well known stage of the Paris Peace Conferences, observing the multiplication of new borders and the variety of transgressing institutions, concepts, actors, men and women inventing themselves as global subjects, but sharing a bitter experience with almost all local societies at this time, namely the awareness of having relatives buried in far distant places due to globalised wars.

The Metaphysics of Virtual Reality Michael Heim, 1994-10-27 Computers have dramatically altered life in the late twentieth century. Today we can draw on worldwide computer links, speeding up communications by radio, newspapers, and television. Ideas fly back and forth and circle the globe at the speed of electricity. And just around the corner lurks full-blown virtual reality, in which we will be able to immerse ourselves in a computer simulation not only of the actual physical world, but of any imagined world. As we begin to move in and out of a computer-generated world, Michael Heim asks, how will the way we perceive our world change? In *The Metaphysics of Virtual Reality*, Heim considers this and other philosophical issues of the Information Age. With an eye for the dark as well as the bright side of computer technology, he explores the logical and historical origins of our computer-generated world and speculates about the future direction of our computerized lives. He discusses such topics as the effect of word-processing on the English language (while word-processors have led to increased productivity, they have also led to physical hazards such as repetitive motion syndrome, which causes inflamed hand and arm tendons). Heim looks into the new kind of literacy promised by Hypertext (technology which allows the user to link audio and video elements, the disadvantages including disorientation and cognitive overload). And he also probes the notion of virtual reality, cyberspace--the computer-simulated environments that have captured the popular imagination and may ultimately change the way we define reality itself. Just as the definition of interface itself has evolved from the actual adapter plug used to connect electronic circuits into human entry into a self-contained cyberspace, so too will the notion of reality change with the current technological drive. Like the introduction of the automobile, the advent of virtual reality will change the whole context in which our knowledge and awareness of life are rooted. And along the way, Heim covers such intriguing

topics as how computers have altered our thought habits, how we will be able to distinguish virtual from real reality, and the appearance of virtual reality in popular culture (as in Star Trek's holodeck, William Gibson's *Neuromancer*, and Stephen King's *Lawnmower Man*). Vividly and entertainingly written, *The Metaphysics of Virtual Reality* opens a window on a fascinating world that promises--or threatens--to become an integral part of everyday life in the 21st century. As Heim writes, not only do we face a breakthrough in the technology of computer interface, but we face the challenge of knowing ourselves and determining how the technology should develop and ultimately affect the society in which it grows.

Human-Computer Interaction: Interaction Modalities and Techniques Masaaki Kurosu, 2013-07-01

The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer interaction, addressing the following major topics: speech, natural language and auditory interfaces; gesture and eye-gaze based Interaction; touch-based interaction; haptic interaction; graphical user interfaces and visualisation.

Nonlinear Microwave Circuit Design Franco Giannini, Giorgio Leuzzi, 2004-06-07

Design techniques for nonlinear microwave circuits are much less developed than for linear microwave circuits. Until now there has been no up-to-date text available in this area. Current titles in this field are considered outdated and tend to focus on analysis, failing to adequately address design and measurement aspects. Giannini and Leuzzi provide the theoretical background to non-linear microwave circuits before going on to discuss the practical design and measurement of non-linear circuits and components. *Non-linear Microwave Circuit Design* reviews all of the established analysis and characterisation techniques available and provides detailed coverage of key modelling methods. Practical examples are used throughout the text to emphasise the design and application focus of the book. * Provides a unique, design-focused, coverage of non-linear microwave circuits * Covers the fundamental properties of nonlinear circuits and methods for device modelling * Outlines non-linear

measurement techniques and characterisation of active devices * Reviews available design methodologies for non-linear power amplifiers and details advanced software modelling tools * Provides the first detailed treatment of non-linear frequency multipliers, mixers and oscillators * Focuses on the application potential of non-linear components Practicing engineers and circuit designers working in microwave and communications engineering and designing new applications, as well as senior undergraduates, graduate students and researchers in microwave and communications engineering and their libraries will find this a highly rewarding read.

Transcending Tradition: Jewish Mathematicians in German Speaking Academic Culture Birgit Bergmann, 2012-10-22 A companion publication to the international exhibition Transcending Tradition: Jewish Mathematicians in German-Speaking Academic Culture, the catalogue explores the working lives and activities of Jewish mathematicians in German-speaking countries during the period between the legal and political emancipation of the Jews in the 19th century and their persecution in Nazi Germany. It highlights the important role Jewish mathematicians played in all areas of mathematical culture during the Wilhelmine Empire and the Weimar Republic, and recalls their emigration, flight or death after 1933.

The Projectification of the Public Sector Damian Hodgson, Mats Fred, Simon Bailey, Patrik Hall, 2019-03-20 In recent decades, we have witnessed an increasing use of projects and similar temporary modes of organising in the public sector of nations in Europe and around the world. While for some this is a welcome development which unlocks entrepreneurial zeal and renders public services more flexible and accountable, others argue that this seeks to depoliticise policy initiatives, rendering them increasingly technocratic, and that the project organisations formed in this process offer fragmented and unsustainable short-term solutions to long-term problems. This volume sets out to address public sector projectification by drawing together research from a range of academic fields to develop a critical and theoretically-informed understanding of the causes, nature, and consequences of the projectification of the public sector. This book includes 13 chapters and is organised into three

parts. The first part centres on the politics of projectification, specifically the role of projects in de-politicisation, often accomplished by rendering the political “technical”. The chapters in the second part all relate to the reframing of the relationship between the centre and periphery, or between policy making and implementation, and the role of temporality in reshaping this relation. The third and final part brings a focus upon the tools, techniques, and agents through which public sector projectification is assembled, constructed, and performed.

Weird Radio Charles River Editors,2019-05-16 *Includes pictures *Includes online resources and a bibliography for further reading For more than a century, radio has been a part of people's lives. No one alive today remembers a time when it hadn't always been there as a familiar, reliable source of information and entertainment. Today, it seems a bit mundane, overtaken by the Internet and satellite television. Even in the 1980s, the development of cable television (50 channels instead of five) and the start of MTV made radio seem quaint, and as many once claimed, Radio is dead. It wasn't, of course. Radio is still popular today, with as many stations as ever, and it remains a part of the world that is taken for granted. While not dead, its familiarity has made it seem a bit mundane, but people shouldn't think of it that way. In fact, the airwaves have always been a place of mystery, a battleground of

competing ideologies, and a source of anonymous voices. Radio has been used to support war efforts, topple governments, communicate secretly, and even attempt to communicate with the dead. **Weird Radio: A Collection of Spy Transmissions, Unidentified Stations, and other Mysteries of the Airwaves** includes strange stories that will make this familiar medium seem a bit less familiar and far more interesting. Along with pictures of important people, places, and events, you will learn about some of the world's strangest radio stories like never before.
