*Tom Tjaarda* Gautam Sen,2021-08 A comprehensive, richly illustrated appraisal of the life of this automotive design giant. Few automotive designers have as impressive a resume as Tom Tjaarda. Among automotive enthusiasts, his name is synonymous with the De Tomaso, Ferrari, Fiat, Ford, Innocenti, and Lancia marques, but he also is responsible for the successful workaday Ford Fiesta. Raised in Detroit when the American Dream was beating out its rock 'n' roll rhythm, Tjaarda moved to Europe, where he had a ringside seat at the heart of automotive styling activities in the Mecca of vehicle design, Turin, in its heyday. The lessons he learned there helped make him one of the most influential and important designers of the second half of the twentieth century. *Tom Tjaarda: Master of Proportions* is a comprehensive, richly illustrated appraisal of the life of this design giant, featuring all his designs, both automotive and in other fields.

**Leading, Managing, Caring: Understanding Leadership and Management in Health and Social Care** Sara MacKian,Joan Simons,2021-02-27 Effective leadership and management in health and social care are built on good practice, strong relationships and a critical understanding of the wider context in which care takes place. *Leading, Managing, Caring* illustrates how leadership and management work in everyday settings, providing invaluable support to those practising or studying in the area. The book introduces the four core building blocks of the caring manager or leader: personal awareness, team awareness, goal awareness and contextual awareness. Together these form a firm foundation for understanding and practice. Drawing on up-to-date case studies, the authors explore how critical theoretical understanding can support practical attempts to work through complex situations with a diverse range of people. Also included is a toolkit containing carefully selected and practical tools for leading and managing change. This comprehensive textbook is suitable for existing and aspiring managers and leaders in a range of health and social care professions, or anyone interested in understanding more about the complex landscape in which care services are managed and delivered in the UK.

**The Effects of Air Pollution on the Built Environment** Peter Brimblecombe,2003-04-08 Air pollution damages materials, but it has changed dramatically in the past century, with a reduction in the concentration of corrosive primary pollutants in urban atmospheres. At the same time, architectural styles and types of materials have changed, as we have moved to more organically rich, photochemically active atmospheres. Contemporary air pollutants have the potential to degrade organic coatings and polymers, which are of great importance to modern structures, while increasing amounts of fine diesel soot spoil the simple lines and smooth areas characteristic of many modern buildings. This book examines a range of materials, discussing the ways in which they are likely to be damaged by air pollutants. It should be of interest to scientists and policymakers dealing with the effects of urban air pollution. Contents: Long Term Damage to the Built Environment (P Brimblecombe & D Camuffo)Background Controls on Urban Stone Decay: Lessons from Natural Rock Weathering (B J Smith)Mechanisms of Air Pollution Damage to Stone (C Sabbioni)Mechanisms of Air Pollution Damage to Brick, Concrete and Mortar (T Yates)Salts and Crusts (M Steiger)Organic Pollutants in the Built Environment and Their Effect on the Microorganisms (C Saiz-Jimenez)Air Pollution Damage to Metals (J Tidblad & V Kucera)The Effect of Air Pollution on Glass (J Leissner)The Effects of Ozone on Materials — Experimental Evaluation of the Susceptibility of Polymeric Materials to Ozone (D S Lee et al.)The Soiling of Buildings by Air Pollution (J Watt & R Hamilton)Changes in Soiling Patterns Over Time on the Cathedral of Learning (W Tang et al.)Exposure of Buildings to Pollutants in Urban Areas: A Review of the Contributions from Different Sources (D J Hall et al.)The Whole

Building and Patterns of Degradation (R Inkpen) Readership: Air pollution policymakers, environmental scientists, architects and conservators.

Keywords: Weathering; Biodeterioration; Soiling; Air Pollution Damage to: Stone, Brick, Salts, Crusts, Metal, Glass, Polymers Reviews: "Overall, this volume succeeds well in its aim to examine a range of materials and discuss the ways in which they are likely to be damaged by air pollutants. There is a wealth of useful information, and the wide scope means that it is of broad interest ... the book is amazingly good value for a hardback specialized volume." Environmental Conservation

*The Cambridge History of Communism* Norman Naimark, Silvio Pons, Sophie Quinn-Judge, 2017-09-21 The second volume of *The Cambridge History of Communism* explores the rise of Communist states and movements after World War II. Leading experts analyze archival sources from formerly Communist states to re-examine the limits to Moscow's control of its satellites; the de-Stalinization of 1956; Communist reform movements; the rise and fall of the Sino-Soviet alliance; the growth of Communism in Asia, Africa and Latin America; and the effects of the Sino-Soviet split on world Communism. Chapters explore the cultures of Communism in the United States, Western Europe and China, and the conflicts engendered by nationalism and the continued need for support from Moscow. With the danger of a new Cold War developing between former and current Communist states and the West, this account of the roots, development and dissolution of the socialist bloc is essential reading.

Information Warfare and Security Dorothy Elizabeth Robling Denning, 1999 What individuals, corporations, and governments need to know about information-related attacks and defenses! Every day, we hear reports of hackers who have penetrated computer networks, vandalized Web pages, and accessed sensitive information. We hear how they have tampered with medical records, disrupted emergency 911 systems, and siphoned money from bank accounts. Could information terrorists, using nothing more than a personal computer, cause planes to crash, widespread power blackouts, or financial chaos? Such real and imaginary scenarios, and our defense against them, are the stuff of information warfare—operations that target or exploit information media to win some objective over an adversary. Dorothy E. Denning, a pioneer in computer security, provides in this book a framework for understanding and dealing with information-based threats: computer break-ins, fraud, sabotage, espionage, piracy, identity theft, invasions of privacy, and electronic warfare. She describes these attacks with astonishing, real examples, as in her analysis of information warfare operations during the Gulf War. Then, offering sound advice for security practices and policies, she explains countermeasures that are both possible and necessary. You will find in this book: A comprehensive and coherent treatment of offensive and defensive information warfare, identifying the key actors, targets, methods, technologies, outcomes, policies, and laws; A theory of information warfare that explains and integrates within a single framework operations involving diverse actors and media; An accurate picture of the threats, illuminated by actual incidents; A description of information warfare technologies and their limitations, particularly the limitations of defensive technologies. Whatever your interest or role in the emerging field of information warfare, this book will give you the background you need to make informed judgments about potential threats and our defenses against them. 0201433036B04062001

*Fearless Genius* Doug Menuez, 2014-06-03 An award-winning documentary photographer delivers a stunning visual history of the Silicon Valley technology boom, in which he was witness to key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world. An eye-opening chronicle of the Silicon Valley technology boom, capturing key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world In the spring of 1985, a technological revolution was under way in Silicon Valley, and documentary photographer Doug Menuez was there in search of a story—something big. At the same time, Steve Jobs was being forced out of his beloved Apple and starting over with a new company, NeXT Computer. His goal was to build a supercomputer with the power to transform education. Menuez had found his story: he proposed to photograph Jobs and his extraordinary team as they built this new computer, from conception to product launch. In an amazing

act of trust, Jobs granted Menuez unlimited access to the company, and, for the next three years, Menuez was able to get on film the spirit and substance of innovation through the day-to-day actions of the world's top technology guru. From there, the project expanded to include the most trailblazing companies in Silicon Valley, all of which granted Menuez the same complete access that Jobs had. Menuez photographed behind the scenes with John Warnock at Adobe, John Sculley at Apple, Bill Gates at Microsoft, John Doerr at Kleiner Perkins, Bill Joy at Sun Microsystems, Gordon Moore and Andy Grove at Intel, Marc Andreessen at Netscape, and more than seventy other leading companies and innovators. It would be fifteen years before Menuez stopped taking pictures, just as the dotcom bubble burst. An extraordinary era was coming to its close. With his singular behind-the-scenes access to these notoriously insular companies, Menuez was present for moments of heartbreaking failure and unexpected success, moments that made history, and moments that revealed the everyday lives of the individuals who made it happen. This period of rapid, radical change would affect almost every aspect of our culture and our lives in ways both large and small and would also create more jobs and wealth than any other time in human history. And Doug Menuez was there, a witness to a revolution. In more than a hundred photographs and accompanying commentary, Fearless Genius captures the human face of innovation and shows what it takes to transform powerful ideas into reality.

Adrian Frutiger – Typefaces Heidrun Osterer, Philipp Stamm, Swiss Foundation Type and Typography, 2012-11-05 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. For the first time, all of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

**Low Carbon Energy Technologies in Sustainable Energy Systems** Grigorios L. Kyriakopoulos, 2021-01-08 Low Carbon Energy Technologies for Sustainable Energy Systems examines, investigates, and integrates current research aimed at operationalizing low carbon technologies within complex transitioning energy economies. Scholarly research has traditionally focused on the technical aspects of exploitation, R&D, operation, infrastructure, and decommissioning, while approaches which can realistically inform their reception and scale-up across real societies and real markets are piecemeal and isolated in separate literatures. Addressing both the technical foundations of each technology together with the sociotechnical ways in which they are spread in markets and societies, this work integrates the technoeconomic assessment of low carbon technologies with direct discussion on legislative and regulatory policies in energy markets. Chapters address issues, such as social acceptance, consumer awareness, environmental valuation systems, and the circular economy, as low carbon technologies expand into energy systems sustainability, sensitivity, and stability. This collective research work is relevant to both researchers and practitioners working in sustainable energy systems. The combination of these features makes it a timely book that is useful and attractive to university students,

researchers, academia, and public or private energy policy makers. Combines socio-cultural perspectives, environmental sustainability, and economic feasibility in the analysis of low carbon energy technologies Assesses regulatory governance impacting the environmental protection and the social cohesion of environmentally-directed energy markets Reviews the carbon trade exchange, attributing economic value to carbon and enabling its trading perspectives by people, companies or countries invested in low carbon technologies

**Cy Twombly** Thierry Greub,2018 The artworks of the US artist Cy Twombly (1928-2011) are considered to be hermetic and inaccessible. Pencil scribbles, explosions of paint, tumbling lines, overlapping layers of color, and inscriptions, geometrical figures, numerals, rows of numbers, words, fragments of quotations, and enigmatic work-titles present very special challenges to both researchers and viewers. While art historians together with scholars of Egyptology, Archaeology, German, Greek, English, Japanese, and the Romance languages inquire into the relation between title, work, and inscribed quotations, leading representatives of research on Twombly focus on the visual language and scriptural-imagistic quality of Cy Twombly's work. Through comprehensive interpretations of famous single works and groups in all the artistic media employed by Twombly, the volume's cross-disciplinary view opens up a route into the associative-referential visual language of Cy Twombly.

*Licht - Raum* Wolfgang Rang,Christian Bartenbach,2014 The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which one can move about and light choreographies that move barely noticeably, creating still lifes in motion. The discourse in this book starts with essays introducing aspects of light spaces and concludes with documents on light spaces by Wolfgang Rang collected over a period of 30 years showing how these light spaces were regarded in the writings of contemporaries.
