Origami Creature Zhen Ming Huang, 2017-09-23 Origami itself was usually being used for praying and blessing, but it gradually develops into different styles in our life. From living to science, origami artists and scientists have led it to another level, which enables it to communicate with people across cultures and countries. Somehow origami has become part of our life. Origami has accompanied me since my childhood. I broadened my mind and made amazing friends with origami. It encourages me to explore possibilities that I never experienced. After years, I started establishing my own style of origami, turning abstract thoughts into papers with a shape. This is a compilation of all my works from 2014-2017, focusing mainly on the animals and fantasies. Some models are my own version of others' classics, some of

them are symbols of my country. Origami is now a language across ages and cultures, which groups us together. Here, I share my passion with you and hope you join us and have fun in the lovely world of paper creatures. This year is the second year of Origami Association of Taiwan. We hold exhibitions on the street and in the museums. We enjoy every moment and priceless memories with each other and with origami. In the end of the book, we will also share those memories with you.
