**The Lithuanian Metrica** Artūras Dubonis, Darius Antanavičius, Raimonda Ragauskienė, Ramunė Šmigelskytė-Stukienė, 2021-01-26 This volume analyzes the history of the Lithuanian Metrica—the chancellery books of the Lithuanian grand duke—from the formation of its books in the mid-fifteenth century until now. It reveals how the first Metrica books emerged in the second half of the fifteenth century, discussing the titles given to them in different periods in history, and explains why the Lithuanian Metrica should be considered the state archive of early Lithuania. Material hitherto unknown in academic literature about the fate of the Lithuanian Metrica at the end of the eighteenth century, in the last years of the existence of the joint Polish-Lithuanian state, is also revealed in this account. The book dedicates a great deal of attention to the history of the publication and research of the documents and books of the Lithuanian Metrica, which are now kept in Moscow, Russia, as a historical source.

**The Economics of the Frontier** Ronald Findlay, Mats Lundahl, 2016-11-16 This book deals with the economics of establishing a frontier by conquest or by peaceful settlement, the costs involved, and the optimum extension of the territory. The opening chapters discuss the most relevant literature about frontiers – conceptual, theoretical and empirical – and introduce the fundamental theoretical model for extending frontiers which is drawn on throughout the book. The authors use this theoretical apparatus by applying it to a number of historical cases. These include the division of the European territory between the Byzantine Empire, Islam and Western Europe, the creation and expansion of the Mongol Empire, the impact of the Black Death, the European discovery of the New World,

the staples trade from 1870–1914, and the rise and fall of banditry in Brazil. The Economics of the Frontier brings together a collection of essays which explore how economically optimal frontiers were founded from sixth-century Europe through to twentieth-century Brazil.

**Language Documentation** Lenore A. Grenoble, N. Louanna Furbie, 2010-11-25  
Language documentation, also often called documentary linguistics, is a relatively new subfield in linguistics which has emerged in part as a response to the pressing need for collecting, describing, and archiving material on the increasing number of endangered languages. The present book details the most recent developments in this rapidly developing field with papers written by linguists primarily based in academic institutions in North America, although many conduct their fieldwork elsewhere. The articles in this volume — position papers and case studies — focus on some of the most critical issues in the field. These include (1) the nature of contributions to linguistic theory and method provided by documentary linguistics, including the content appropriate for documentation; (2) the impact and demands of technology in documentation; (3) matters of practice in collaborations among linguists and communities, and in the necessary training of students and community members to conduct documentation activities; and (4) the ethical issues involved in documentary linguistics.

Trees and Wood in Dendrochronology Fritz H. Schweingruber, 2012-12-06 The science of dendrochronology has grown significantly in the past 20 years. In the 1950s and 1960s, interest in the subject was limited to only a handful of scientists who perceived in dendrochronology *l'art pour l'art*. Today, however, specialists from many different fields recognize and are pursuing the problems of dendrochronology. Tree-ring research has acquired a permanent role in the various sciences of archeology, history, geology, ecology, and climatology. The founders of dendrochronology themselves were of varied scientific backgrounds and interests. For example, A. E. Douglass in the United States was an astronomer, B. Huber in Germany a forest-biologist, and F. N. Shvedov in Russia a climatologist. Today the spectrum is even broader. Many dendrochronologists are authorities in mathematics, archeology, history, forestry, botany, wood technology, ecology geography, geology, etc. It is, therefore, understandable that it has become almost impossible for one individual to encompass the entire field. Bitvinskas (1974), Fritts (1976), Schweingruber (1983), and Mitsutani (1990) have attempted, each guided by his own interests, to provide at least an overview of the field. Recently, individual aspects have been presented by groups of authors in books edited by Fletscher (1978), Hughes et al. (1982), Jacoby and Hornbeck (1987) and Bradley and Jones (1992). It is very likely that in the future summaries covering each branch of dendrochronology will be published.

**Archaeology for the People** John Cherry, Felipe Rojas, 2016-02-29 In 2014, the Joukowsky Institute for Archaeology and the Ancient World organized an international writing competition calling for accessible and engaging essays about any aspect of archaeology. Nearly 150 submissions from over two dozen countries were received.

Archaeology for the People gathers the best of those entries. Their diverse topics—from the destruction of historic, urban gardens in contemporary Istanbul to the fall of the ancient Maya city— offer a taste of the global reach and relevance of archaeology. Their main common trait, however, is that they prove that archaeology can offer much more to a general audience than Indiana Jones or aliens building pyramids. All of the articles collected in this book combine sophisticated analysis of an exciting archeological problem with prose geared at a non-specialized audience. This book also offers a series of reflections on how and why to engage in dialogues about archaeology with people who are not specialists. These include a stunning photo-essay that captures the challenges of life at an archaeological site in northern Sudan, interviews with a number of leading archaeologists who have successfully written about archaeology for a broad public or who are actively engaged in practicing archaeology beyond academia, and a discussion of the experience of teaching a Massive Open Online Course (MOOC) about archaeology to over 40,000 students. This book should be of interest to anyone who has wondered how and why to write about archaeology for people other than archaeologists.

**DISKO (Second Edition)** Andrew Miksys, 2015-05-15 The second edition of DISKO, a photography book about Lithuanian village discos by Andrew Miksys. The discos of Lithuania were once Soviet offices, detention centers, weapons storage, rare Lithuanian mushroom-packing plants... who knows? ...Andrew's photographs capture a generation born to bewilderment: the disko kids still carry the past in their eyes and hard-to-maintain

indifference, but they are the creatures of a very brief moment in time, one that will never ever exist again except in these pictures. Miksys has caught a fleeting world that emanates death and hope in the pulses of ephemeral disco lights. - Andrei Codrescu For ten years Andrew Miksys traveled the back roads of Lithuania photographing teenagers in village discos (2000-2010). Most of these discos are located in Soviet-era culture houses where Miksys would sometimes find discarded Lenin paintings, old Soviet movie posters, gas masks, and other remnants of the Soviet Union. He became fascinated by all this debris of a dead empire and the teenagers who visited the clubs. It seemed like a perfect backdrop to make a series of photographs about young people in Lithuania, a crumbling past, and the uncertain future of a new generation all together in one room.

**Patrons, Brokers, and Clients in Seventeenth-century France** Sharon

Kettering, 1986 A bold new study of politics and power in 17th-century France, this book argues that the French Crown extended its control over the provinces and laid the foundations for a centralized state by removing patronage power from the provincial governors and putting it instead in the hands of newly-created provincial power brokers--regional notables who cooperated with the Paris ministers in exchange for their patronage.

Feingold, 2020-12-10 This book contains twenty essays by expert scholars of higher learning in the early modern period. Together they discuss topics that historians of universities have largely ignored: notably the extensive collaboration, and occasional conflicts, between university scholars, instructors, and administrators on the one hand, and students at academies, independent and dependent colleges, gymnasia, and Latin schools on the other. The contributions also cover a wide geographical range, covering universities, schools, academies, and the history of the book, in many European states, and Latin America--
