IS-2 Heavy Tank 1944–73 Steven J. Zaloga,2011-10-20 The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.

German Self-Propelled Artillery Guns of the Second World War Craig Moore,2019-03-19 • One of the few books that explores the design and deployment of German artillery self-propelled guns (SPGs) to support tanks and infantry during the Second World War • A great reference book for military modellers, historians and tank wargamers interested in German SPGs • A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time, including previously unpublished information on the little-known Hummel-Wespe proving that at least twelve units were built • Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men. During the Second World War, German engineers mounted an artillery gun on top of a tank chassis; this new technology reduced the amount of valuable war resources as self-propelled guns only required a four- or five-man crew. They could also be made ready to fire more rapidly. German Self-Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945. One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war. The 'Desert Fox' (Ewin Rommel) demanded artillery guns that could keep up with his panzers in North Africa. He was sent 15-cm howitzers mounted on top of Panzer II tank chassis' and captured French Army Lorraine 37L-tracked armoured supply vehicles. Rommel's forces in northern France were equipped with a variety of new self-propelled guns, which were used against the Allies on the beaches of Normandy during D-Day in 1944. • Includes 81 colour photographs

Panzer III Bob Carruthers,2013-05-17 The Panzer III was designed to be the backbone of the Panzer force and was deployed on every front. However, due to its deficient armament and poor armour, and despite its outstanding reliability, it was obsolete by 1942.This comprehensive overview of the Panzer III in action was compiled by Emmy Award winning historian Bob Carruthers. It draws heavily on war-time intelligence reports to produce a fascinating insight into the development and combat history of the Panzer III at the tactical and operational level.Also featured are rare developments such as the flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study, from an array of primary sources, of the world of the Panzer III and its crews, which conveys to the modern reader a vivid sense of how they were viewed at the time.

Designing the T-34 Peter Samsonov,2019-12-27 When the German army launched Operation Barbarossa – the invasion of the Soviet Union – on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it "the finest tank in the world". Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war's most revolutionary tank design.

Sherman Tanks of the Red Army Peter Samsonov,2020-12-21 More than 4000 examples of the famous diesel-fueled M4A2 Sherman tank were sent to the Soviet Union during the Second World War under the Lead-Lease program. These American-built vehicles were operated by Red Army crews against the Germans during some of the bitterest fighting on the Eastern Front - yet despite serving with distinction and being well-liked by their crews, relatively little has been written about these vehicles until now. Tank expert Peter Samsonov looks at the origins of the M4A2 in Soviet service and the machines that were received from the US as well as providing a

detailed assessment of how they fared in combat on the front line.

Pershing vs Tiger Steven J. Zaloga, 2017-09-21 During the final battles on World War II's Western Front, the legendary German Tiger I heavy tank clashed with the brand-new M26 Pershing fielded by the United States. The Tiger I had earned a formidable reputation by the end of 1944, although its non-sloped armour and poor mobility meant it was being superseded by the Tiger II or 'King Tiger'. While the Tiger I had been in the front lines since 1942, the US Pershing first entered combat in late February 1945, and more than 20 Pershings would see action before war's end. This book examines the dramatic Tiger/Pershing duel at Elsdorf in Germany, and also assesses the clashes between German armour and the sole 'Super Pershing' deployed to Europe. Featuring full-colour artwork, carefully chosen photographs and specially commissioned maps, this is the story of the first US heavy tanks in combat with the fearsome Tiger I during the last months of World War II in Europe.

King Tiger vs IS-2 David R. Higgins, 2011-09-20 This book examines the technology and strategy that defined the outcome of the battles between the King Tiger and the IS-2. The Soviets had been quick to develop tanks that could fight the Tiger on an equal footing, but these were developed as part of a completely different strategy than that employed by the Germans. The King Tiger was a modern marvel, and remained unmatched in one-on-one combat. Technologically superior, with greater firepower and better armour than the Soviet IS-2, the King Tiger was a formidable opponent. However, the IS-2 was lighter, more manoeuvrable and most importantly, far more numerous. With overwhelming numerical superiority the Soviets were able to simply overwhelm their opponents, negating the technical superiority of the King Tiger

Kingtiger Heavy Tank 1942-45 Tom Jentz, Hilary Doyle, 1993-01-28 As World War II entered its later stages and Germany was forced increasingly onto the defensive, the need for fast-moving mobile forces lessened and the Wehrmacht required better protected and more powerfully armed tanks. After debacles against the T-34, Hitler and the Panzerwaffe were determined not to be unprepared again. The result of this determination was the production of the heaviest and largest tank to see combat during World War II, the Tiger II or Konigstiger (Kingtiger). This title examines this formidable weapon, covering the problems and controversies surrounding its design and production as well as a detailed listing of every unit that was equipped with the Tiger II.
