Seafood Proteins Z. Sikorski, 2012-12-06 Fish and marine invertebrates are important sources of nutrients for the world's population, and many species have exceptionally high market value because of their exquisite sensory properties. Both the utilization of the available catch in different forms and the market price are affected by the quality of the fish. Proteins and nonprotein nitrogenous compounds play a crucial role in the nutritional value and sensory quality of seafoods as well as in the suitability of different species to various forms of processing, preservation, and use in other branches of the food industry. This role of proteins results from their basic chemical and biochemical properties and functions in different tissues. A presentation of the actual state of knowledge on seafood nitrogenous compounds in one volume may contribute to a better understanding of the involvement of these components in all stages of handling and processing fish. It has been possible to prepare this text thanks to the cooperative effort of an international group of specialists. The editors of the book are greatly indebted to all colleagues who have willingly contributed to this volume, sharing their knowledge and experience, as well as to all persons who have granted permission to use their previously published materials. viii Preface ix A large part of the book has been prepared during my sabbatical in the Department of Marine Food Science, National Taiwan Ocean University (NTOU) in Keelung, Taiwan.

Good Taste, Bad Taste, & Christian Taste Frank Burch Brown, 2003 Christians frequently come into conflict with themselves and others over such matters as music, popular culture, and worship style. Yet they usually lack any theology of art or taste adequate to deal with aesthetic disputes. In this provocative book, Frank Burch Brown offers a constructive,

ecumenical approach to artistic taste and aesthetic judgment--a non-elitist but discriminating theological aesthetics that has teeth but no fangs. While grounded in history and theory, this book takes up such practical questions as: How can one religious community accommodate a variety of artistic tastes? What good or harm can be done by importing music that is worldly in origin into a house of worship? How can the exercise of taste in the making of art be a viable (and sometimes advanced) spiritual discipline? In exploring the complex relation between taste, religious imagination, and faith, Brown offers a new perspective on what it means to be spiritual, religious, and indeed Christian.

The Dhvanyāloka of Ānandavardhana with the Locana of Abhinavagupta Ānandavardhana,1990 For nearly a thousand years the brilliant analysis of aesthetic experience set forth in the Locana of Abhinavagupta, India's founding literary critic, has dominated traditional Indian theory on poetics and aesthetics. The Locana, presented here in English translation for the first time, is a commentary on the ninth-century Dhvanyaloka of Anandavardhana, which is itself the pivotal work in the history of Indian poetics. The Dhvanyaloka revolutionized Sanskrit literary theory by proposing that the main goal of good poetry is the evocation of a mood or flavor (rasa) and that this process can be explained only by recognizing a semantic power beyond denotation and metaphor, namely, the power of suggestion. On the basis of this analysis the Locana develops a theory of the psychology of aesthetic response. This edition is the first to make the two most influential works of traditional Sanskrit literary and aesthetic theory fully accessible to readers who want to know more about Sanskrit literature. The editorial annotations furnish the most complete exposition available of the history and content of these works. In addition, the verses presented as examples by both authors (offered here in verse translation) form an anthology of some of the finest Sanskrit and Prakrit poetry.
