**Original Grin** Ron English, 2019-07-16 Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term POPaganda to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie *Supersize Me*; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on *The Simpsons* secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street art, and agit-pop. Additionally, it contains a lengthy and comprehensive interview with the artist conducted exclusively for this publication.

**How Artifacts Afford** Jenny L. Davis, 2020-08-11 A conceptual update of affordance theory that introduces the mechanisms and conditions framework, providing a vocabulary and critical perspective. Technological affordances mediate between the features of a technology and the outcomes of engagement with that technology. The concept of affordances, which migrated from psychology to design with Donald Norman's influential 1988 book, *The Design of Everyday Things*, offers a useful analytical tool in technology studies—but, Jenny Davis argues in *How Artifacts Afford*, it is in need of a conceptual update. Davis provides just such an update, introducing the mechanisms and conditions framework, which offers

both a vocabulary and necessary critical perspective for affordance analyses. The mechanisms and conditions framework shifts the question from what objects afford to how objects afford, for whom, and under what circumstances. Davis shows that through this framework, analyses can account for the power and politics of technological artifacts. She situates the framework within a critical approach that views technology as materialized action. She explains how request, demand, encourage, discourage, refuse, and allow are mechanisms of affordance, and shows how these mechanisms take shape through variable conditions—perception, dexterity, and cultural and institutional legitimacy. Putting the framework into action, Davis identifies existing methodological approaches that complement it, including critical technocultural discourse analysis (CTDA), app feature analysis, and adversarial design. In today's rapidly changing sociotechnical landscape, the stakes of affordance analyses are high. Davis's mechanisms and conditions framework offers a timely theoretical reboot, providing tools for the crucial tasks of both analysis and design.

Icons Unmasked Alex Solis, 2016-02-14 Ever wonder if the characters you see on TV, in movies and in comic books are hiding something behind their masks? That perhaps they're really someone -- or something -- else? When pop culture is such a huge part of our lives, we're bombarded with these characters everywhere we turn. Each time we see a new character in a movie, video game or commercial, we feel a sudden sense *deja vu*. There's something about their goofy grin, that creepy laugh, or those boogly eyes that feels eerily familiar...This got me thinking. Is anything we see ever 100% original? Or is everything we experience really just our minds piecing together past experiences to create something that

feels unique and new? In *Icons Unmasked*, I'm trying to bring a new sense of discovery to characters everyone has seen hundreds of times. I wanted to recreate the experience of what it might be like to see one iconic character from your childhood for the first time as an adult. Proceed at your own caution and keep in mind the following illustrations cannot be unseen. Your childhood might possibly be destroyed forever

**Junta from Brisvegas** Josiah Navarro, 2021-10 Josiah Navarro's Junta artwork including contributions from 130+ artists from all over the world.

*Defuturing* Tony Fry, 2020-08-20 “Once one understands the nature and magnitude of defuturing as the negation of world futures, how one has to account for the history and making of the material world – including design - dramatically changes. Defuturing as our condition forces the generation of a new philosophy of design.” With these thoughts this book presents a radically new understanding of the history, context and futures of designing. First published in 1999, now reissued with a new preface by the author, *Defuturing: A New Design Philosophy* is a prescient and powerful account of what it means to comprehend that we live in world that is taking away futures for ourselves and non-human others. Arguing that designing is doubly implicated in this process, first in its roles in helping to create the unsustainable, but second, re-thought through the lens of defuturing, as a mode of acting in the world that can help contest the negation of the world, *Defuturing* transforms our comprehension of designing and of how futures can be constituted. Working not through abstract theorizing but through the analysis of concrete examples, the book uses historical material on design to expose the archaeology of defuturing.

Shattering the illusion that the future simply “is”, Defuturing confronts designing with the challenge of remaking while offering the elements of a new practical reasoning of design acting.

**Rigorous State-Based Methods** Alexander Raschke, Dominique Méry, 2021-05-22 This book constitutes the proceedings of the 8th International Conference on Rigorous State-Based Methods, ABZ 2021, which was planned to take place in Ulm, Germany, during June 6-11, 2021. The conference changed to an online format due to the COVID-19 pandemic. The 6 full and 8 short papers included in this volume were carefully reviewed and selected from 18 submissions. The proceedings also include 3 PhD symposium contributions. They deal with state-based and machine-based formal methods, mainly Abstract State Machines (ASM), Alloy, B, TLA+, VDM, and Z.

Before the Animation Begins John Canemaker, 1996-11-15 Born from daydreams, meditations on color, character and form, and sheer inventiveness, Disney's pioneering animated films begin in the imagination of the inspired sketch artist. Now, for the first time ever, noted animation historian John Canemaker chronicles the lives and work of these artists, from the 1930s to the present, situating them in the history of modern art and analyzing their influence on the form. 300 illustrations.
