Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Making of Men Dr. Arne Rubinstein,2013-05-12 As parents, we all want our boys to grow up to be happy, healthy and successful. For this to happen, it's vital we understand their world, their challenges, and how our relationship with them must change as they become young men. Using real-life examples, parenting expert Dr Arne Rubinstein clearly explains the risks teenagers face today, including drugs, alcohol, technology and peer group pressure. He then shows how you can equip your son to make safe and sensible choices. Whether you're a single mum of a happy-go-lucky eight-year old, or the parent of a troubled teen, *The Making of Men* is a practical, commonsense guide to helping your son transition from a boy to a young man who is motivated and inspired. 'Funny, encouraging, gritty and real.' Steve Biddulph, bestselling author of *Manhood* and *Raising Boys*

Conquer the Crash Robert R. Prechter, Jr.,2009-11-20 Today's financial and economic tribulations were a long time in the making. Many people ask, Why didn't someone see it coming? A New York Times bestselling book did see it coming. Over 100,000 people read it in time to protect their wealth. The book foresaw and explained the collapse in home prices, plunge in stocks, subprime debacle, liquidity crisis, the demise of Fannie and Freddie, the Federal Reserve's failure to turn the trend, and lots more. The book was Robert Prechter's *Conquer the Crash*, published in early 2002, when the Dow was above 10,000 and the financial world was partying around-the-clock. Fast forward to today: the average U.S. homeowner has suffered a decline of 30% to 40% in property value. Stocks and commodities had their biggest fall since 1929-1932. Fannie Mae is a zombie corporation under the government's protection. The Fed has pushed every button at its disposal (and then some), to no avail. If Prechter thought a whole new book would help, he'd have written one. But *Conquer the Crash* is a book-length forecast that's still coming true -- only some of the future has caught up with the specific predictions he published back then. There is much more to come. That means more danger, but also great opportunity. *Conquer the Crash*, 2nd edition offers you 188 new pages of vital information (480 pages total) plus all the original forecasts and recommendations that make the book more compelling and relevant than the day it published. In every disaster, only a very few people prepare themselves beforehand. Think about investor enthusiasm in 2005-2008, and you'll realize it's true. Even fewer people will be ready for the soon-approaching, next leg down of the unfolding depression. In this 2nd edition, Prechter gives a warning he's never had to include in 30 years of publishing -- namely, that the doors to financial safety are closing all over the world. In other words, prudent people need to act while they can. *Conquer the Crash*, 2nd Edition readers will receive exclusive online access to the *Conquer the Crash* Readers Page, where Prechter continually updates the book's recommended services and institutions.

Notes from the Hyena's Belly Nega Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

The Da Vinci Globe Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds: a distinct globe with mysterious images, such as old ships, sailors, a volcano, a hybrid monster, pentimenti, waving patterns, conic individualised mountains, curving rivers, vigorous coastal lines, chiaroscuro and an unresolved triangular anagram, which remains an enigma. The globe is hand-engraved in great detail on ostrich egg shells from Pavia by a left-handed Renaissance genius of unquestionable quality. It shows secret knowledge of the map world from the time of Columbus, Cabral, Amerigo Vespucci and Leonardo da Vinci. Central and North America are covered by a vast ocean. The da Vinci globe originates from Florence and dates from 1504. It marks the first time

ever that the names of countries such as Brazil, Germania, Arabia and Judea have appeared on a globe. A Leonardo drawing for this globe, showing the coast of the New World and Africa has been discovered in the British Library. This book brings the reader through a fabulous journey of scholars, maps, riddles, rebuses, iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe. It details 500 years of mystery, fine scholarship and expert forensic testing at numerous material science laboratories the world over. The da Vinci globe now takes its rightful place, surpassing the Lenox globe, its copper-cast identical twin, as the most mysterious globe of our time. As such, this monograph is an essential text in Leonardo studies and in the history of cartography.

Studies in the History of Medieval Italian Painting Edward B. Garrison,1993 The four volumes of Edward Garrison's Studies, published between 1953 and 1962, represented a landmark in the study of medieval Italian painting. They made available for the first time photographs of all miniatures of the region and period concerned - principally the former Papal States and Tuscany in the twelfth century - which the author was able to track down, along with a generous selection of ornamental initials from almost every decorated manuscript he examined. The contemporary wall-paintings and panels from these regions are also illustrated and discussed. They represent one of the most valuable sources of information about twelfth-century painting in existence, and everyone interested in European art of that period has at some time found himself gratefully using them. A serious attempt has been made to get all this material into order, and the general lines of development have been set out. Together with the author's two volumes already published in our Selected Studies Series (Early Italian Painting: Selected Studies, Vols. I & II) these four volumes make available the complete corpus of Edward Garrison's work on medieval Italian painting. The two principal studies are concerned with 'Twelfth-Century Initial Styles of Central Italy' (serialized here in eleven sections) and 'Twelfth-Century Umbro-Roman painting' (serialized in six sections). Most of the non-serialized items are studies of individual manuscripts, but one should note the presence here of Supplements IV-VI to Garrison's Italian Romanesque Panel-painting: an index (Nos. I-III are available in Early Italian Painting: Selected Studies. Vol. I). The reprinting of these four volumes should be particularly welcome to art-historians, since they were originally issued in fascicule form, and many art-historical libraries lack copies. The Naming of America Martin Waldseemüller,2008 This new book features a facsimile of the 1507 World Map by Martin Waldseemüller - the first map ever to display the name America - and tells the fascinating story behind its creation in 16th-century France and rediscovery 300 years later in the library of Wolfegg Castle, Germany, in 1901. It also includes a completely new translation and commentary to Martin Waldseemüller and Matthias Ringmann's seminal cartographic text, the Cosmographiae Introductio, which originally accompanied the World Map. John Hessler considers answers to some of the key questions raised by the map's representation of the New World, including How was it possible for a small group of cartographers to have produced a view of the world so radical for its time and so close to the one we recognize today?; and What evidence did they possess to show the existence of the Pacific Ocean when neither Vasco Nunez de Balboa nor Ferdinand Magellan had yet reached it'. There are no easy answers, and yet, as this fascinating book reveals, this group of unknowns created some of the most important maps in the history of cartography, and afford us a glimpse into an age when accepted scientific and geographic principles fell away, spawning the birth of modernity.
