second to Mansell on six occasions. To complete the stunning statistics, Mansell either won or finished second in all the races he finished that season, and he took pole position for all but two of the season's 16 races.

Formula One John Smailes, 2021-11-02 Since 1950, fifteen Australians and nine New Zealanders have raced in world championship Formula One, the pinnacle of motor racing. So few drivers make it to Formula One. Ever fewer succeed in the fastest and most challenging four-wheeled sport of all. Now John Smailes, author of the bestselling *Climbing the Mountain*, *Race Across the World*, *Mount Panorama* and *Speed Kings*, gives us the definitive story of our involvement with Formula One, from the pioneer days in the aftermath of World War II, to the championship glory of Brabham, Hulme and Jones, the grit and determination of Mark Webber, and Australia's current Formula One star, the irrepressible Daniel Ricciardo, all the way to potential champions of the future like Oscar Piastri. With over 150 stunning photographs, and interviews with drivers past and present, as well as the engineers, managers and team owners behind the scenes, this is the must-have book for every Australian and New Zealand fan of Formula One.

Senna Versus Prost Malcolm Folley, 2009-05-07 In the late eighties and early nineties, Formula One was at its most explosive, with thrilling races, charismatic drivers, nail-biting climaxes - and the most deadly rivalry ever witnessed in sport. Two of Formula One's most honoured champions and iconic figures drove together for McLaren for two seasons, and their acrimonious and hostile relationship extended even after one of them had left the team. ALAIN PROST, France's only F1 world champion, the intelligent, smooth driver with the epithet 'Le Professeur'. AYRTON SENNA, the mercurial kid from a privileged background in Sao Paulo who would become the most intense and ruthless racing driver the world has ever seen. It was a story that would have a tragic ending. As the great rivals raced to victory, their relationship deteriorated badly, beginning with the breaking of a gentleman's agreement, and public spats followed, culminating in Prost accusing Senna of deliberately trying to ride him off the circuit, and fearful that the Brazilian would get someone killed with his daring overtaking feats. And the final, sad act of this drama happened at the San Marino Grand prix at Imola in May 1994, when Senna was killed. Featuring a rare interview with Prost, and insight from Martin Brundle, Damon Hill, Sir Frank Williams, Bernie

Ecclestone, Derek Warrick, Johnny Herbert, Gerhard Berger, plus McLaren insiders and other F1 figures, Malcolm Folley provides us with a breath-taking account of one of the all-time classic sporting rivalries.

The Science of Formula 1 Design David Tremayne, 2009 Leading F1 journalist David Tremayne unravels the mysteries of modern Grand Prix car design. The authoritative, extensively illustrated text explains just how an F1 car works, and this revised and updated third edition includes new material about the rules changes introduced for the 2009 season. The philosophy and technology behind the chassis, engine, transmission, electronics, steering, suspension, brakes, tires and aerodynamics are analyzed, and the important question of how these parts and systems interact is explored. This is an absorbing insight into the secretive and technology-driven world of racing car design at its highest level.

Grand Prix Automobile de Monaco Posters William W. Crouse, 2010 Presented for the first time, is the entire collection of Grand Prix de Monaco posters ever published from 1929-2009. This complete collection of posters offers insight into the race's history and also the history of the 20th century as changes in artistic style and automobile design changed over the decades. The Grand Prix de Monaco poster are some of the most iconic images from the Art Deco and Art Nouveau eras.

A Different Kind of Life Virginia Williams, 2017-07-28 In 1986, racing car constructor Frank Williams' life was turned upside down when a crash left him

quadriplegic. For his wife, Ginny, the accident meant becoming head of the household while also struggling to overcome grief and anger. In this memoir, she tells her story with honesty and humor, set against the backdrop of Formula One racing.

The Mechanic Marc 'Elvis' Priestley, 2017-11-02 Meet Marc 'Elvis' Priestley: the former number-one McLaren mechanic, and the brains behind some of Formula One's greatest ever drivers. Revealing the most outrageous secrets and fiercest rivalries, *The Mechanic* follows Priestley as he travels the world working in the high-octane atmosphere of the F1 pit lane. While the spotlight is most often on the superstar drivers, the mechanics are the guys who make every World Champion, and any mistakes can have critical consequences. However, these highly skilled engineers don't just fine-tune machinery and crunch data through high-spec computers. These boys can seriously let their hair down. Whether it's partying on luxury yachts or gravity-defying photos aboard aeroplanes, this is a world which thrills on and off the track. This is Formula One, but not like you've seen it before.

Pharmaceutical Residues in the Environment Jolanta Kumirska, 2020-11-18

Pharmaceuticals, due to their pseudo-persistence and biological activity as well as their extensive use in human and veterinary medicine, are a class of environmental contaminants that is of emerging concern. In contrast to some conventional pollutants, they are continuously delivered at low levels, which might give rise to toxicity even without high persistence rates. These chemicals are designed to have a specific physiological mode of action and to resist frequently inactivation before exerting their intended therapeutic effect. These features, among others, result in the bioaccumulation of pharmaceuticals which are responsible for toxic effects in aquatic and terrestrial ecosystems. It is extremely important to know how to remove them from the environment and/or how to implement procedures or treatments resulting in their biological inactivation. Although great advances have been made in their detection in aquatic matrices, there remains limited analytical methodologies available for the trace analysis of target and non-target pharmaceuticals in matrices such as soils, sediments, or biota. There are still many gaps in the data on their fate and behavior in the environment as well as on their threats to ecological and human health. This book has included nine current research and three review articles in this field.

Scalextric Roger Gillham, 2009-02-15 First published in 1981, this book has long been recognized as the 'bible of Scalextric', providing a complete catalogue of the cars and equipment produced. As well as extra detail about earlier periods, there is full coverage of all the new Scalextric products launched in the four years that have elapsed since the previous edition. Now containing nearly 1,000 photographs, this book has become an extraordinarily detailed summary of everything in the world of Scalextric, written by an author who has been captivated by the subject for nearly 50 years.

Formula 1 in Camera 1980-89 Quentin Spurring, 2014-09-15 The 1980s was a momentous decade in Formula 1 and this all-colour book, featuring magnificent images by the renowned German photographer Rainer Schlegelmilch, captures the extraordinary drama of that period. Alain Prost, Ayrton Senna and Nigel Mansell all made their debuts in this decade and became, with Nelson Piquet, the stars of the era - they were arch rivals equipped, at one stage, with the most powerful racing engines of all time. McLaren and Williams first established themselves as regular winners in this period, and these teams, with Ferrari, remain big players today. This was a decade when Formula 1 was transformed by political upheaval, technical innovation and extended TV coverage, all of which laid the foundations for today's globally popular sport. - Visually lavish year-by-year coverage of ten Formula 1 seasons, presenting photographs, factual information and statistics for each year. -

Rainer Schlegelmilch, who first photographed Formula 1 in 1962 and remains active today, is one of the best motor racing photographers ever. - All images are in color, with the emphasis on photographs that enthusiasts will not have seen before, the more obscure cars and drivers sharing space with the familiar and famous. - The story of each race is told through photographs and an accompanying commentary. - Data for each year comprises team/car/driver details, plus complete World Championship rankings for drivers and constructors. - The whole work is smartly designed and presented. - In series with titles covering the 1950s, 1960s and 1970s, as well as sister books on sports car racing in the same period.
