Sun of Suns Karl Schroeder,2007-07-31 In Karl Schroeder's sci-fi thriller, Hayden Griffin has come to the city of Rush with one thing in mind: to take murderous revenge for his parents' deaths. It is the distant future. The world known as Virga is a fullerene balloon three thousand kilometers in diameter, filled with air, water, and aimlessly floating chunks of rock. The humans who live in this vast environment must build their own fusion suns and towns that are in the shape of enormous wood and rope wheels that are spun for gravity. Young, fit, bitter, and friendless, Hayden Griffin is a very dangerous man. He's come to the city of Rush in the nation of Slipstream with one thing in mind: to take murderous revenge for the deaths of his parents six years ago. His target is Admiral Chaison Fanning, head of the fleet of Slipstream, which conquered Hayden's nation of Aerie years ago. And the fact that Hayden's spent his adolescence living with pirates doesn't bode well for Fanning's chances . . . Attack of the 50 Foot Blockchain David Gerard,2017-07-24 An experimental new Internet-based form of money is created that anyone can generate at home; people build frightening firetrap computers full of video cards, putting out so much heat that one operator is hospitalised with heatstroke and brain damage. A young physics student starts a revolutionary new marketplace immune to State coercion; he ends up ordering hits on people because they might threaten his great experiment, and is jailed for life without parole. Fully automated contractual systems are proposed to make business and the law work better; the contracts people actually write are unregulated penny stock offerings whose fine print literally states that you are buying nothing of any value. The biggest crowdfunding in history attracts \$150 million on the promise that it will embody “the steadfast iron will of unstoppable code”; upon release it is immediately hacked, and \$50 million is stolen. How did we get here? David Gerard covers the origins and history of Bitcoin to the present day, the other cryptocurrencies it spawned including Ethereum, the ICO craze and the 2017 crypto bubble, and the attempts to apply blockchains and smart contracts to business. Plus a case study on blockchains in the music industry. Bitcoin and blockchains are not a technology story, but a psychology story. Remember: if it sounds too good to be true, it almost certainly is. “A sober riposte to all the upbeat forecasts about cryptocurrency” — New York Review of Books “A very convincing takedown of the whole phenomenon” — BBC News

Warlocks and Warpdrive Kurt Lancaster,1999-01-01 This book offers ten chapters examining contemporary fantasy entertainment forms that use virtual environments to amuse the participant. Called virtual fantasies by the author (as opposed to virtual realities), these entertainment forms are categorized into three main groupings. All include performance and imaginary environments as essential elements--participants are often simultaneously performers and audience. Many involve computer technology such as multimedia, digitized video, and online chatting. Part I covers imaginative fantasy entertainments, where the participants are required to use their imaginations to see the virtual environment. These include paper and pencil role-playing games (Dungeons and Dragons), live-action roleplaying games (International Fantasy Gaming Society rules), and collectible card games (Magic: The Gathering). Part II covers physical fantasy entertainments, where the participants need little imagination to see the virtual environment. These include computer games (Star Trek: Klingon), theme park rides (Disneyland's Star Tours), and immersive museums (National Museum of the American Indian). Part III covers social fantasy entertainments, where participants have built communities based upon the virtual environment (Star Trek fandom, Star Wars influencing Ronald Reagan's Pax Americana).
