Where Is My Flying Car? J. Storrs Hall,2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

Driving Ambition Doug Nye,Ron Dennis,Gordon Murray,1999 This history of the McLaren F1 explains how the McLaren Cars' team pursued their quest for perfection to create the fastest road car in the world - setting the record at 240.1mph in 1998. The book has been created with the full support and involvement of McLaren Cars.

Mary and Lou and Rhoda and Ted Jennifer Keishin Armstrong,2013-10-29 The behind-the-scenes story of the making of the classic television series offers insight into how the influential show reflected changing American perspectives and was a first situation comedy to employ numerous women as writers and producers. TV tie-in.

The Rolls-Royce Armoured Car David Fletcher,2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

The Circle Dave Eggers,2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Deep Maneuver Jack D Kern Editor,Jack Kern,2018-10-12 Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future *Deep Maneuver*.

Drawdown Paul Hawken,2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to

educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

One of Ours Willa Cather,2022-01-04 Claude Wheeler is a young man who was born after the American frontier has vanished. The son of a successful farmer and an intensely pious mother, Wheeler is guaranteed a comfortable livelihood. Nevertheless, Wheeler views himself as a victim of his father's success and his own inexplicable malaise.Thus, devoid of parental and spousal love, Wheeler finds a new purpose to his life in France, a faraway country that only existed for him in maps before the First World War. Will Wheeler ever succeed in his new goal? The novel is inspired from real-life events and also won the Pulitzer Prize in 1923.

Henry Ford Hourly History,2017-06-21 Henry Ford Henry Ford once announced to a young schoolboy that it was he who had invented the modern age. Born on a farm in rural Michigan three weeks after the battle of Gettysburg, Ford hated everything about farming as soon as he could understand what it was about. So he turned his attention to the farm machinery that made the family farm run, and never looked back. It was his love of machines, then engines, and finally automobiles that Henry Ford is best known for. He designed and manufactured cars which would transform not just his family's little farm, and not just the city of Detroit. The automobile would change the world; ushering in a whole new way of living one's life. A modern life, to be sure. Beneath this diligent tycoon, lay a man of many contradictions. He worked hard to give the average American an affordable car and believed that mass consumerism was the key to keeping the world safe from war. Yet he opposed labor unions, supposedly sired a son with another woman, and was an enthusiastic anti-Semite. Inside you will read about... ✓ Henry Ford's Early Years ✓ Ford's Love for Engines ✓ The Ford Motor Company and the Model T ✓ Disdain of Labor Unions ✓ The Anti-Semite Problem ✓ Later Years and Death And much more! Follow along as you come to know Henry Ford, the man responsible for putting America and the world behind the wheels of their own cars. Was this man a genius or a dominator? Did he want those around him to live free lives with the things he invented or was he only satisfied when people read his newspaper and obeyed his advice? Read on, and form your own conclusion.
