Philip Kaplan

Skytrain Philip Kaplan,2018-07-31 The legendary Douglas DC-3 airliner was a technological breakthrough that changed the course of both civilian and military aviation. In the 1930s, passenger air travel was expensive, uncomfortable, and frequently unreliable. That began to change with the appearance of the handsome, thoroughly modern DC-3, the twenty-one-passenger twin-engine propeller-driven creation of Donald Douglas and his young California company. The first production models were sold to airlines for \$90,000. The price climbed to \$115,000 just before the United States entered the Second World War in December 1941. The new plane quickly became a favorite of passengers the world over, and it became the first truly profitable plane for the industry. The threat posed by the coming war made the US Army realize that a military version could handle the vital troop and cargo transport capability soon to be needed. The C-47 Skytrain was born and evolved into specialized versions with many nicknames: Gooney Bird, Dakota, and Puff the Magic Dragon. In WWII, General Dwight Eisenhower was so impressed he referenced it in his famous comment: "The four pieces of equipment the most vital to Allied success in Africa and Europe were the bulldozer, the jeep, the two-and-a-half-ton truck, and the Douglas C-47." Skytrain celebrates the long and distinguished career of this great plane.

C-47 Skytrain David Doyle,2024-03-28 The Douglas C-47 Skytrain and its near twin, the C-53 Skytrooper, formed the backbone of American airborne transport during WWII. In addition to hauling cargo, these aircraft also delivered paratroopers to the front, including the Normandy invasion. The aircraft also towed troop-laden gliders during these operations and incredibly could also snatch gliders from the ground while the C-47 was in flight. Derived from the Douglas DC-3, the C-47 saw service with US and Allied militaries in Korea and even Vietnam, including notably the heavily armed AC-47D gunship. This volume explores the development and use of the aircraft, as well as details of its construction.

Wingless Flight R. Dale Reed,Darlene Lister,2021-10-21 Most lifting bodies, or flying bathtubs as they were called, were so ugly only an engineer could love them, and yet, what an elegant way to keep wings from burning off in supersonic flight between earth and orbit. Working in their spare time (because they couldn't initially get official permission), Dale Reed and his team of engineers demonstrated the potential of the design that led to the Space Shuttle. *Wingless Flight* takes us behind the scenes with just the right blend of technical information and fascinating detail (the crash of M2-F2 found new life as the opening credit for TV's *The Six Million Dollar Man*). The flying bathtub, itself, is finding new life as the proposed escape-pod for the Space Station.

Douglas R4D-8/C-117D Super Gooney Steve Ginter,Norm Taylor,Angelo Romano,2013 This aircraft was used as a transport, VIP carrier, station hack, a trainer with VT-29, and its usage in Antarctica with VX-6 from 1952 into the 1980s. The DC-3S was a Douglas venture to add capability and life to the post-war fleet of surplus DC-3s, C-47s and R4Ds. It was an remanufactured aircraft with a stretched fuselage, new taller and wider tail group, new square tip outer wings, larger engines and fully enclosed main gear housings. It did not find favor with the airlines which instead turned to Convairs and Martins, but found a home in the Navy and Marines. 96 aircraft were eventually re-manufactured as R4D-8s and 4 as R4D-8Zs.

The Story of American Aviation Jim Ray,2019-11-29 This book traces the history of aviation in America, from its early days to post-World War II. The book covers a range of topics, including the first transatlantic flight, the birth of precision bombing, the development of the first aircraft carrier, and the growth of commercial air travel. It also provides a detailed account of key events and innovations in American aviation and the impact of aviation on modern society.

Attu John Haile Cloe,United States. National Park Service,2017 The Battle of Attu, which took place from 11-30 May 1943, was a battle fought between forces of the United States, aided by Canadian reconnaissance and fighter-bomber support, and the Empire of Japan on Attu Island off the coast of the Territory of Alaska as part of the Aleutian Islands Campaign during the American Theater and the Pacific Theater and was the only land battle of World War II fought on incorporated territory of the United States. It is also the only land battle in which Japanese and American forces fought in Arctic conditions. The more than two-week battle ended when most of the Japanese defenders were killed in brutal hand-to-hand combat after a final banzai charge broke through American lines. Ancient Battle Formations Justin Swanton,2022-03 Justin Swanton examines the principal battle-winning formations of the Ancient world, determining their composition, function and efficacy. An introductory chapter looks at the fundamental components of the principal battle formations of heavy and light infantry, cavalry, elephants and chariots, showing how they bolstered the individual soldier's willingness to fight. The rest of the book focuses on massed infantry that reigned supreme in this era: the heavily armored Greek hoplite phalanx that was immune to the weaponry of its non-Greek opponents; the Macedonian pike phalanx that was unbeatable against frontal attacks so long as it kept order; the Roman triplex acies which, contrary to popular opinion, consisted of continuous lines in open order, with file spaces wide enough to allow embattled infantry to fall back after which those files closed up instantly against the enemy. A careful study of the Greek and Latin of the sources sheds fresh light on how these formations were organized and worked, re-evaluating many conventional notions and leading to some surprising conclusions.

Fighting with the Filthy Thirteen Jack Womer,2012-05-18 In 2004 the world was first introduced to *The Filthy Thirteen*, a book describing the most notorious squad of fighting men in the 101st Airborne Division (and the inspiration for the movie "The Dirty Dozen"). In this long awaited work one of the squad's integral members—and probably its best soldier—reveals his own inside account of fighting as a spearhead of the Screaming Eagles in Normandy, Market Garden, and the Battle of the Bulge. Jack Womer was originally a member of the 29th Infantry Division and was selected to be part of its elite Ranger battalion. But after a year of grueling training under the eyes of British Commando instructors, the 29th Rangers were suddenly dissolved. Bitterly disappointed, Womer asked for transfer to another elite unit, the Screaming Eagles, where room was found for him among the division's most miscreant squad of brawlers, drunkards, and goof-offs. Beginning on June 6, 1944, however, the Filthy Thirteen began proving themselves more a menace to the German Army than they had been to their own officers and the good people of England, embarking on a year-of ferocious combat at the very tip of the Allied advance in Europe. In this work, with the help of Stephen DeVito, Jack provides an amazingly frank look at close-quarters combat in Europe, as well as the almost surreal experience of GI's entering country after country in their grapple with the Wehrmacht, finally ending up in Hitler's mountaintop lair in Germany itself. Throughout his fights, Jack Womer credited his Ranger/Commando training for helping him to survive, even though most of the rest of the Filthy Thirteen did not. And in the end he found the reward he had most coveted all along: being able to return to his fiancée Theresa back in the States.

Jungle Ace John R. Bruning,2011 Flying P-38s, Jerry Johnson shot down 24 aircraft in 265 combat missions in the Pacific theater. At the age of only twenty-four, he commanded the highest-scoring fighter group in the Pacific. Tragically, though Johnson had survived three combat tours, which included a mid-air collision with a Japanese aircraft and being shot down by friendly fire, the new father disappeared without a trace while flying a

courier mission one month after the war's end.

Armored Strike Force Charles C. Roberts Jr.,2016-07-01 The U.S. 70th Tank Battalion boasts one of the most impressive combat records of any American armored unit in World War II. It landed in North Africa as part of Operation Torch and participated in the invasion of Sicily, D-Day, the Normandy campaign, the Battle of the Bulge, and the final drive into Germany. It remains in service today as the 70th Armor Regiment, the U.S. Army's most decorated armor unit.

P-38 Lightning Aces of the 82nd Fighter Group Steve Blake,2012-07-20 When the 82nd Fighter Group was organized in March 1942, most of its initial pilot cadre was comprised of newly graduated staff sergeant pilots of Class 42-C – enlisted men! They learned to fly the P-38 at Muroc, in California's Mojave Desert, and then moved to the Los Angeles area to continue their training and to serve as part of its air defence. In September 1942 the group was transported to the East Coast, from where it shipped out to Ireland on the Queen Mary. By this time all its remaining sergeant pilots had been commissioned. As of VE-Day the 82nd Fighter Group's score of confirmed aerial victories stood at 548 aircraft shot down, plus a huge amount of enemy materiel – including aircraft – destroyed on the ground and the sea. It had been awarded three Distinguished Unit Citations. The cost of this success was high, however, for around 250 of the group's pilots had either been killed in action or captured.

The Supreme Commander Stephen E. Ambrose,2012-01-17 In this classic portrait of Dwight D. Eisenhower the soldier, bestselling historian Stephen E. Ambrose examines the Allied commander's leadership during World War II. Ambrose brings Eisenhower's experience of the Second World War to life, showing in vivid detail how the general's skill as a diplomat and a military strategist contributed to Allied successes in North Africa and in Europe, and established him as one of the greatest military leaders in the world. Ambrose, then the Associate Editor of the General's official papers, analyzes Eisenhower's difficult military decisions and his often complicated relationships with powerful personalities like Churchill, de Gaulle, Roosevelt, and Patton. This is the definitive account of Eisenhower's evolution as a military leader—from its dramatic beginnings through his time at the top post of Allied command.

Jack & Helen Frye Story Randall D Reynolds,2015-04-07 From the shadows of beyond the words pour forth like summer rain.... The Jack and Helen Frye Story is much more than the chronology of two people's lives, it's a spiritual quest, a yearning from the heart of soul-mates Helen and Jack who desire their story to be told, their priceless paths not be erased! Time has a way of forgetting who was, and what was, but the written word lays it all at our feet. From a small town in West Virginia, to the gold-paved streets of Fifth Avenue, Helen Varner knew she was born to walk a path; a path that would lead her far and away from her origins. Her talents as a hat-maker and seamstress, writer, sculptor, and artist, opened doors to a gilded and rose-hued horizon. Within these pages, unfolds the sojourn of a woman who knows what she wants and goes after it. Voluptuous and beautiful, the world's most powerful men fall at her feet. In 1935, 26-year-old Helen Varner marries 36-year-old playboy Cornelius Vanderbilt IV. Later, after a separation, she moves to mystical Shanghai and Hollywood. By 1938, Helen meets the love of her life, aviation-legend Jack Frye. As President of TWA, Frye trail-blazes the dawning of aviation and tames Helen's heart with his fleet of sleek airliners and big western charm. Jack and Helen marry by January 1941, and embark on the wings of an American Love Story, as only soul mates can share. In flights over the Western United States in their private plane, Jack and Helen settle on the Red Rock Country of Sedona Arizona to build a new life together. With a grand act of chivalry, Jack buys a massive ranch adjoining Oak Creek and hands the deed to Helen. Frye and Howard Hughes develop the Lockheed Constellation during W.W. II and Frye loans his planes to the U.S. Government, culminating in a wartime partnership with the White House. Meanwhile, Helen secures a grand colonial mansion on the shores of the Potomac, as a political power-center for TWA, and a home. By war's end, in 1946, TWA has gained enough experience flying war personnel overseas, for Jack to secure the world's commercial air routes. Jack's dream of the first transatlantic commercial air service and round-the-world passenger travel is realized and the 'Camelot Years of TWA' have unfolded! By 1950, after Helen and Jack divorce, Helen remains at their Sedona Ranch. Soon though, she is engaged to Tyrone Power. Later still, she plans a re-marriage to Frye. Tragically, though, Frye is killed by a drunk driver, returning home from a secret meeting with Howard Hughes at Tucson. Sinking into the depths of despair, Helen becomes fodder for a notorious new-age cult called Eckankar. By 1979, she dies of cancer, but not before the group fleeces her of most her assets. Helen's Will is burned by an ex-cult member con artist who had craftily befriended Helen before her death with his youthful charm ending her saga with a sensational estate trial. Is this really the end of Helen's story? Thankfully, no, Helen saw to that! Reaching across the sands of time, she engaged the services of a kindred spirit, a member of her soul-family, a writer with the passion and dedication to insure that she and Jack; their 'telling' was not forgotten. Welcome to the World of Jack and Helen Frye! Note: (The Jack & Helen Frye Story – The Camelot Years of TWA is a Biography, however, it is written in a Novel format. This to reflect a movie script style for future development.) Cover photo by Randall Reynolds- Helen Frye's Wings of the Wind House- View of Cathedral Rock to the North.

Frozen in Time Mitchell Zuckoff,2013-04-23 NEW YORK TIMES BESTSELLER A gripping true story of survival, bravery, and honor in the vast Arctic wilderness during World War II, from Mitchell Zuckoff, the author of New York Times bestseller Lost in Shangri-La On November 5, 1942, a US cargo plane slammed into the Greenland Ice Cap. Four days later, the B-17 assigned to the search-and-rescue mission became lost in a blinding storm and also crashed. Miraculously, all nine men on board survived, and the US military launched a daring rescue operation. But after picking up one man, the Grumman Duck amphibious plane flew into a severe storm and vanished. Frozen in Time tells the story of these crashes and the fate of the survivors, bringing vividly to life their battle to endure 148 days of the brutal Arctic winter, until an expedition headed by famed Arctic explorer Bernt Balchen brought them to safety. Mitchell Zuckoff takes the reader deep into the most hostile environment on earth, through hurricane-force winds, vicious blizzards, and subzero temperatures. Moving forward to today, he recounts the efforts of the Coast Guard and North South Polar Inc.—led by indefatigable dreamer Lou Sapienza—who worked for years to solve the mystery of the Duck's last flight and recover the remains of its crew. A breathtaking blend of mystery and adventure Mitchell Zuckoff's Frozen in Time: An Epic Story of Survival and a Modern Quest for Lost Heroes of World War II is also a poignant reminder of the sacrifices of our military personnel and a tribute to the everyday heroism of the US Coast Guard.
