Deus Ex James Swallow, 2011 IT'S NOT THE END OF THE WORLD. BUT YOU CAN SEE IT FROM HERE. In the near future, with physical augmentation gaining ground and nano-cybernetics only years away, the dawn of limitless human evolution is just beyond the horizon, and a secret corporate cabal of ruthless men intends to make sure that humankind stays under its control. But two people on opposite sides of the world are starting to ask questions that could get them killed. Secret Service agent Anna Kelso has been suspended for investigating the shooting that claimed her partner's life. Anna suspects that the head of a bio-augmentation firm was the real target, and against orders she's turned up a few leads concerning a covert paramilitary force and a cadre of underground hackers. But the cover-up runs deep, and now there's a target on her back. Meanwhile, Ben Saxon, former SAS officer turned mercenary, joins a shadowy special ops outfit. They say they're a force for good, but Saxon quickly learns that the truth is not so clear-cut. So begins

a dangerous quest to uncover a deadly secret that will take him from Moscow to London, D.C. to Geneva, and to the dark truth--if he lives that long. The year is 2027; in a world consumed by chaos and conspiracy, two people are set on a collision course with the most powerful and dangerous organization in history--and the fate of humanity hangs in the balance.

Architectonics of Game Spaces Andri Gerber,Ulrich Götz,2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

Paratextualizing Games Benjamin Beil,Gundolf S. Freyermuth,Hanns Christian Schmidt,2021-11-30 Gaming no longer only takes place as a »closed interactive experience« in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services

has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

Untitled Rothfuss 3 Of 3 Patrick Rothfuss, 2012-04-01 The third in 'The Kingkiller Chronicle' series of fantasy novels by Patrick Rothfuss.

The Arctic and World Order Kristina Spohr, Daniel S. Hamilton, Jason C. Moyer, 2021-01-26 The Arctic, long described as the world's last frontier, is quickly becoming our first frontier—the front line in a world of more diffuse power, sharper geopolitical competition, and deepening interdependencies between people and nature. A space of often-bitter cold, the Arctic is the fastest-warming place on earth. It is humanity's canary in the coal mine—an early warning sign of the world's climate crisis. The Arctic "regime" has pioneered many innovative means of governance among often-contentious state and non-state actors. Instead of being the "last white dot on the map," the Arctic is where the contours of our rapidly evolving world may first be glimpsed. In this book, scholars and practitioners—from Anchorage to Moscow, from Nuuk to Hong Kong—explore the huge political, legal, social, economic,

geostrategic and environmental challenges confronting the Arctic regime, and what this means for the future of world order.

Social Contract, Free Ride Anthony De Jasay, 2008 This book provides a novel account of the public goods dilemma. The author shows how the social contract, in its quest for fairness, actually helps to breed the parasitic 'free riding' it is meant to suppress. He also shows how, in the absence of taxation, many public goods would be provided by spontaneous group co-

operation. This would, however, imply some degree of free riding. Unwilling to tolerate such unfairness, co-operating groups would eventually drift from voluntary to compulsory solutions, heedless of the fact that this must bring back free riding with a vengeance. The author argues that the perverse incentives created by the attempt to render public provision assured and fair are a principal cause of the poor functioning of organised society.

Deus Ex: Black Light (Deus Ex: Mankind Divided prequel) James Swallow, 2016-08-23 ILLUMINATE THE SHADOWS The year is 2029, and the shining promise of a new age of human augmentation is in ruins in the wake of the devastating 'Aug Incident' – a horrific catastrophe triggered by a cabal of shadowy power brokers, where millions of cybernetically-enhanced people suffered a forced psychotic break. Awakening in the aftermath of a changed world, with gaps in his memories and suspicion on all sides, augmented ex-cop and former security operative Adam Jensen struggles to piece his life back together, in a new reality where 'Augs' have become the targets of hatred, fear and violent discrimination. Now the dark forces behind the Incident are gathering once again, reaching out to manipulate the course of global events through terror and intimidation. To find the answers that he seeks and the people who destroyed everything he knew, Jensen must return to the ashes of the past, reconnect with old allies, and risk all to expose a deadly conspiracy – but in a world shattered by secrets, can the truth be brought into the light? Interactive Digital Narrative Hartmut Koenitz,Gabriele Ferri,Mads Haahr,Diğdem Sezen,Tonguç İbrahim Sezen,2015-04-10 The book is concerned with narrative in digital media that changes according to user input–Interactive Digital Narrative (IDN). It provides a broad overview of current issues and future directions in this multi-disciplinary field that includes humanities-based and computational perspectives. It assembles the voices of leading researchers and practitioners like Janet Murray, Marie-Laure Ryan, Scott

Rettberg and Martin Rieser. In three sections, it covers history, theoretical perspectives and varieties of practice including narrative game design, with a special focus on changes in the power relationship between audience and author enabled by interactivity. After discussing the historical development of diverse forms, the book presents theoretical standpoints including a semiotic perspective, a proposal for a specific theoretical framework and an inquiry into the role of artificial intelligence. Finally, it analyses varieties of current practice from digital poetry to location-based applications, artistic experiments and expanded remakes of older narrative game titles.

Athanasius Kircher Paula Findlen, 2004-08-02 First published in 2004. Athanasius Kircher (1602-1680) -- German Jesuit, occultist, polymath -- was one of most curious figures in the history of science. He dabbled in all the mysteries of his time: the heavenly bodies, sound amplification, museology, botany, Asian languages, the pyramids of Egypt -- almost anything incompletely understood. Kircher coined the term electromagnetism, printed Sanskrit for the first time in a Western book, and built a famous museum collection. His wild, beautifully illustrated books are sometimes visionary, frequently wrong, and yet compelling documents in the history of ideas. They are being rediscovered in our own time. This volume contains new essays on Kircher and his world by leading historians and historians of science, including Stephen Jay Gould, Ingrid Rowland, Anthony Grafton, Daniel

Stoltzenberg, Paula Findlen, and Barbara Stafford.-

The 12th Planet Zecharia Sitchin, 1991-05-01 Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, *The 12th Planet* is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. *The 12th Planet* brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

Archaeology of the Communist Era Ludomir R Lozny, 2016-12-06 This book contributes to better recognition and comprehension of the interconnection

between archaeology and political pressure, especially imposed by the totalitarian communist regimes. It explains why, under such political conditions, some archaeological reasoning and practices were resilient, while new ideas leisurely penetrated the local scenes. It attempts to critically evaluate the political context and its impact on archaeology during the communist era world wide and contributes to better perception of the relationship between science and politics in general. This book analyzes the pressures inflicted on archaeologists by the overwhelmingly potent political environment, which stimulates archaeological thought and controls the conditions for professional engagement. Included are discussions about the perception of archaeology and its findings by the public. □

Big Farms Make Big Flu Rob Wallace, 2016-06-30 The first collection to explore infectious disease, agriculture, economics, and the nature of science together Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly

pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them *Campylobacter*, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. “That is,” writes evolutionary biologist Rob Wallace, “it pays to produce a pathogen that could kill a billion people.” In *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought-provoking, Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise and radical wit, the latest in the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the

nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to bloggging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.

Theory from the South Jean Comaroff, John L. Comaroff, 2015-11-17 As nation-states in the Northern Hemisphere experience economic crisis, political corruption and racial tension, it seems as though they might be 'evolving'

into the kind of societies normally associated with the 'Global South'. Anthropologists Jean and John Comaroff draw on their long experience of living in Africa to address a range of familiar themes - democracy, national borders, labour and capital and multiculturalism. They consider how we might understand these issues by using theory developed in the Global South. Challenging our ideas about 'developed' and 'developing' nations, Theory from the South provides new insights into key problems of our time.

The Neotropical Polymorphic Earless Praying Mantises Julio Rivera, Gavin J. Svenson, 2020-05-18 Recent phylogenetic studies on evolutionary relationships within the Acanthopoidea, known as “polymorphic earless praying mantises,” revealed numerous issues with the taxonomic status and morphological boundaries of many genera and species within this superfamily. The authors of this monograph present a thorough morphological assessment based on museum specimens and reexamination of type material, aimed toward redefining the morphological delineation of all Acanthopoidea genera, verifying the generic identity of all nominal species within the superfamily, and establishing taxonomic and nomenclatural foundations for future revisionary studies of acanthopoid genera. Their work resulted in numerous modifications in the taxonomy of this lineage, including the description of a new genus.
