Dagomar Degroot

The Frigid Golden Age Dagomar Degroot, 2018-02-08 Dagomar Degroot offers the first detailed analysis of how a society thrived amid the Little Ice Age, a period of climatic cooling that reached its chilliest point between the sixteenth and eighteenth centuries. The precocious economy, unusual environment, and dynamic intellectual culture of the Dutch Republic in its seventeenth-century Golden Age allowed it to thrive as neighboring societies unraveled in the face of extremes in temperature and precipitation. By tracing the occasionally counterintuitive manifestations of climate change from global to local scales, Degroot finds that the Little Ice Age presented not only challenges for Dutch citizens but also opportunities that they aggressively exploited in conducting commerce, waging war, and creating culture. The overall success of their Republic in coping with climate change offers lessons that we would be wise to heed today, as we confront the growing crisis of global warming.

History of Holland George Edmundson, 2013-06-13 This 1922 book presents an account of the development of the Netherlands, from the Burgundian period up until the reign of Queen Wilhelmina.

The Dutch Navy of the Seventeenth and Eighteenth Centuries Jaap R. Bruijn, 2017-10-18 This book is a reprint of Jaap R. Bruijn's 1993 book, *The Dutch Navy*, which offers an English-language overview of the history of the Dutch Navy in the seventeenth and eighteenth centuries. It is divided into three chronological periods: the 'old', 'new', and 'second-rate' navy. Rather than presenting a history of naval conflict, this volume approaches Dutch naval history from the following four angles: operations, administration, officer duties, and sailor duties. It consists of a series foreword, a new introduction detailing recent developments in naval historiography, the original introduction providing a history of Dutch maritime history from the middle ages to the beginning of the seventeenth century, a conclusion, and a bibliography and index. It explores the astounding amount of naval power belonging to such a sparsely populated nation, plus the rapid rates of success and decline. It confirms that the Dutch navy - with its logic, innovation, and missteps alike - provides an excellent case study of both the development of European bureaucracy and armed forces in the Early Modern period.

William, by the Grace of God Marjorie Bowen, 2022-09-15 Marjorie Bowen, an

author of William, by the Grace of God, was fascinated by the history of the House of Orange and the glory of its greatest representative William the Silent. In this book, she lets a reader look closer at William of Orange, considered today the father of Europe. Big attention is paid to Philip's religion. Being nominally a Roman Catholic, he attempts to help the persecuted Protestants and, in the process, marries the Protestant Princess Anne of Saxony. But will Anne truly be a helpmeet for her husband? When he is pressed to take up the sword against King Philip, he does not hesitate and changes the history of the world.

Holland Under Habsburg Rule, 1506-1566 James D. Tracy, 2018-10-23 Under what conditions were limited forms of self-government possible in medieval and early modern Europe? While many historians have sought an answer by investigating the development of parliamentary institutions in emerging national monarchies and the wider autonomy enjoyed by various city-states within their own borders, James D. Tracy concentrates instead on a relatively neglected phenomenon at an intermediate level of political organization—the self-governing province. Focusing on the province of Holland during the reigns of Charles V and Philip II (1506–1566), Tracy argues convincingly that Holland effectively underwent an apprenticeship in self-government. The seven provinces of the Dutch Republic—among which Holland was the richest and most populous—were the first in history to govern themselves by a consensus among their towns and nobles. The foundations for this internal cohesion were put in place long before the Dutch Revolt; first by medieval provincial dynasties, then by the dukes of Burgundy, and finally by the House of Habsburg. At the turn of the sixteenth century, Holland was urbanized to a surprising degree, with over forty percent of its population residing in some thirty small and mid-sized towns. Forced by external threats to rise above their economic rivalries, the towns joined together through the forum of the provincial parliament, or States of Holland, which came to assume a primary role in the management of public finances. While noting that the growing autonomy of Holland did not make the Dutch Revolt inevitable, Tracy points out that the revolt could hardly have succeeded without provinces that already had a tradition of managing their own affairs. In the broader context of European political institutions, the circumstances that permitted the provincial states to assume many of the functions of government illustrate not only the capacity for self-government but also the formation of genuine body politics. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Pieter Bruegel and the Art of Laughter Walter S. Gibson, 2006-02 In this delightfully engaging book, Walter S. Gibson takes a new look at Bruegel, arguing that the artist was no erudite philosopher, but a man very much in the world, and that a significant part of his art is best appreciated in the context of humour.

An Introduction to the History of the Principal Kingdoms and States of Europe Samuel Freiherr von Pufendorf, 2013 Samuel Pufendorf was a pivotal figure in the early German Enlightenment. His version of voluntarist natural law theory had a major influence both on the European continent and elsewhere in the English-speaking world, particularly Scotland and America. Pufendorf's *An Introduction to the History of the Principal Kingdoms and States of Europe* (1682) became one of his most famous and widely reprinted works. It went through multiple editions during the eighteenth century, but its impact has largely been forgotten. Pufendorf's histories exhibited the core notions of his natural law theory by describing the development and current, reciprocal relations of individual states as collective social agents engaged in securing their own and, thus, their members' interests, including self-preservation. Hence, they essentially functioned as vehicles for philosophical demonstration or justification. Moreover, by emphasizing empirical details and legitimating (in principle) a de facto politics of interest, the histories appealed strongly to the emerging nation-states of early modern Europe, which sought ratification of their external and internal actions, policies, and pedagogies. Pufendorf based his accounts on each country's own historians and took care to describe its position from its own current and historical perspectives. It was an appealing approach to political history, judging from the long and diverse publishing record of the work. This book will be of interest to anyone concerned with the history of international law and the development of historiography during the seventeenth and eighteenth centuries. It makes available to contemporary scholars and students a carefully edited, helpfully annotated, and historically situated English version of one of Pufendorf's most popular and influential works. Samuel Pufendorf (1632-1694) was one of the most important figures in early-modern political thought. An exact contemporary of Locke and Spinoza, he transformed the natural law theories of Grotius and Hobbes, developed striking ideas of toleration and of the relationship between church and state, and wrote extensive political histories and analyses of the constitution of the German empire. Jodocus Crull (d. 1713/14) was a German émigré to England, a medical man, and a translator and writer. Michael J. Seidler is Professor of Philosophy at Western Kentucky University. Knud Haakonssen is Professor of Intellectual History at the University of Sussex, England.

Women and Gender in the Early Modern Low Countries, 1500 - 1750 Sarah Joan Moran, Amanda C. Pipkin, 2019-05-07 *Women and Gender in the Early Modern Low Countries, 1500-1750* brings together research on women and gender across the Low Countries, a culturally contiguous region that was split by the Eighty Years' War into the Protestant Dutch Republic in the North and the Spanish-controlled, Catholic Hapsburg Netherlands in the South. The authors of this interdisciplinary volume highlight women's experiences of social class, as family members, before the law, and as authors, artists, and patrons, as well as the workings of gender in art and literature. In studies ranging from microhistories to surveys, the book reveals the Low Countries as a remarkable

historical laboratory for its topic and points to the opportunities the region holds for future scholarly investigations. Contributors: Martine van Elk, Martha Howell, Martha Moffitt Peacock, Sarah Joan Moran, Amanda Pipkin, Katlijne Van der Stighelen, Margit Thøfner, and Diane Wolfthal.
