MP 38 and MP 40 Submachine Guns Alejandro de Quesada,2014-07-20 Nazi Germany's MP 38 and MP 40 submachine guns are among World War II's most recognizable weapons. Portable and with folding stocks, both were widely issued to airborne troops and became the hallmark of Germany's infantry section and platoon

leaders. A million were produced during the conflict – and many found their ways into the hands of paramilitary and irregular forces from Israel to Vietnam after the war. Featuring specially commissioned full-color artwork and period and close-up photographs, this is the story of the origins, combat use, and lasting influence of two of World War II's most famous firearms.

The AK-47 Gordon L. Rottman, 2011-05-03 A detailed, fully illustrated study of the most recognizable assault rifle ever produced. The Kalashnikov AK-47 is the most ubiquitous assault rifle in the world, with more AK-47s and its variants in use than any other individual small arm. Created by Senior Sergeant Mikhail Kalashnikov, and first adopted by the USSR soon after World War II, its production continues to this day, with an estimated 75 million produced worldwide. Supported by photographs and original artwork, this book takes a look at the complete history of the weapon, discussing its design, development, and usage, taking its story from the great armies of the Soviet Union to the insurgents and criminal gangs that often employ the weapon today.

Russia's Warplanes Piotr Butowski, 2016-12-31 Following the success of the first offering in the series, Harpia Publishing presents the second volume of Russia's Warplanes, completing what has become a standard reference work on the subject. Once again researched and written by the acknowledged expert in the field, the book draws upon the author's unrivaled connections within the Russian aerospace industry to conclude this comprehensive directory of the country's latest military aviation hardware. The result forms an essential companion to Volume 1, which detailed tactical combat aircraft, attack and transport helicopters, reconnaissance and surveillance aircraft, and special mission aircraft including airborne command posts and relay aircraft. Between them, the two works present in full detail the fixed-wing aircraft and helicopters that equip the various Russian air arms, as well as those developed for and operated by foreign states in the post-Soviet era. Alongside technical descriptions for each military aircraft – and every significant sub-variant – currently available from Russia's aerospace industry, or otherwise in large-scale service, Piotr Butowski provides historical background and accurate data relating to production and operators around the world. Full coverage is extended to upgrades, as well as the new avionics and advanced weapons that these introduce. The second volume in the series is dedicated to long-range bombers – including the Tu-95MS and Tu-160 that recently made their combat debuts over Syria – maritime patrol and antisubmarine warfare aircraft, strategic transport and tanker aircraft, theater transports, and trainers. The work provides authoritative accounts of Russia's current and future strategic bomber programs, as well as other fascinating types including the world's largest military transport, the An-124, and the new-generation Yak-130 advanced trainer and light attack aircraft. In common with previous Harpia titles, the book contains a wealth of high-quality photographs, many of which have never previously been published.

In Final Defense of the Reich Stephen M Rusiecki,2010-10-15 In April 1945, the American 71st Infantry Division exacted the final vestiges of life from the Reich's 6th SS Mountain Division in central Germany. This analysis of the battle demonstrates that the Wehrmacht's last gasp on the Western Front was anything but a whimper as some historians charge. Instead, Stephen Rusiecki argues, the Nazis fought to exact every last bit of pain possible. The book follows the histories of both the German and American divisions from their inceptions until their fateful confrontation and serves as a testament to the human experience in war, from the perspective of the soldiers and the civilians who suffered the brunt of the fighting.

German Automatic Rifles 1941-45 Chris McNab,2013-03-19 This book explores the origins, development, combat use and lasting influence of Nazi Germany's automatic rifles, focusing on the Gew 41(W), Gew 43/Kar 43, FG 42 and MP 43/StG 44. The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1,000m for which most contemporary rifles were designed. In addition, current bolt-action rifles could not provide the rate of fire required for such engagements. From 1941 Germany's arms designers took note and produced a new series of infantry firearms that not only transformed squad firepower, but also laid the foundations for postwar assault rifle design. The Gew 43/Kar 43, fitted with a telescopic-sight rail as standard, was one of history's first semi-auto sniper rifles. The FG 42, designed specifically for airborne soldiers, had a landmark straight-in-line design and other features frequently seen in subsequent small arms, notably the US M60 machine gun. Most influential was the MP 43/StG 44, arguably the world's first true assault rifle, which delivered formidable full-auto fire from a shortened 7.92mm round. This weapon also went on to influence the design of the greatest assault rifle of all time - the AK-47. This study not only provides a detailed technical description of each weapon, but also explores how the firearms performed on the battlefields of World War II. The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen-SS soldiers on both the Eastern and Western Fronts. Postwar service is also studied, such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War. Setting each firearm in its tactical and historical context, and employing striking photographs and full-colour artwork, firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons.

The Gun that Changed the World Mikhail Kalashnikov,2006-10-27 The Russian word that is most frequently spoken throughout the world isn't Lenin, gulag or perestroika, it's 'Kalashnikov'. The reason for this is simple: there are 80 million Kalashnikovs in circulation on five continents. Once invented, the AK-47 assault rifle became the most widely used weapon in the world: from Vietnam to Palestine, from Cuba to Iraq, it was at the heart of conflicts and struggles everywhere. It is the only firearm that has ever been depicted on a national flag - that of Mozambique, where it symbolizes liberation. Mikhail Kalashnikov himself, who was born in 1919, here tells his life story, with the help of Elena

Joly, for the first time: his deportation to Siberia with his family while still a child; his time as a soldier in a tank regiment; his invention of the world's most famous weapon and his turbulent life under Stalin, Khrushchev, Brezhnev, Gorbachev and Yeltsin. This is a remarkable portrait of a man of ingenuity and vitality in the context of the often frightening and terribly unforgiving Russia of the twentieth century.

Oskar and the Things Andrus Kivirähk, 2022-09-15 One summer, when both his parents are away for work, Oskar is sent to the countryside to live with his grandma. A dreary prospect turns into disaster when Oskar realises he left his mobile phone back at home. What will he do all summer now? Lonely and bored, Oskar crafts a phone out of a block of wood he finds in the shed and uses it to pretend to call things. To his surprise, the things reply! He speaks to a tough-talking iron, a poetising bin, a bloodthirsty wardrobe, a red balloon that gets tangled in the crown of a birch tree, and many more. Oskar finds himself in high demand, helping the things solve their problems and achieve their dreams. **Oskar and the Things** is a charming book about the power of the imagination and friendship, by Estonia's leading children's writer, Andrus Kivirähk. With a lively translation by Adam Cullen, and the original illustrations by Anne Pikkov, it is the perfect gift for an introverted child with a rich inner life.
