transmissions. About 40% of the second edition's content is new or revised with new data.

Faster, Higher, Farther: How One of the World's Largest Automakers Committed a Massive and Stunning Fraud Jack Ewing, 2017-05-23 "A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic." —Bethany McLean, New York Times Book Review *Faster, Higher, Farther* chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install "defeat devices" in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. *Faster, Higher, Farther* is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.

Glossary of Automotive Terms Society of Automotive Engineers, 1988 This comprehensive glossary brings together in one handy volume over 10,500 current automotive terms. From "A-pillar" to "Zones of Reach" the Glossary provides you with over 500 pages of alphabetically listed definitions collected from the SAE Handbook. For further research each definition references the SAE standard or specification from which it was taken. The new Glossary of Automotive Terms is an essential reference for anyone in the industry.

Car Tourism Waldemar Cudny, 2017-07-05 This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes

the role played by experiences and experience societies formed in the 20th c. in the development of contemporary tourism, including tourism related to cars. The book explores the influence of experiencing unusual events, such as car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various short articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Audi Forums, Porsche Museum, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space, highlighting the main tourism spaces in which car tourism develops. It presents multifunctional spaces (factories, adventure centres - Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs. The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of the tourism space theory.

Twelve Years a Slave Solomon Northup, 2024-01-04

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having

spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807- c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Diatoms Joseph Seckbach, Richard Gordon, 2019-07-01 The aim of this new book series (*Diatoms: Biology and Applications*) is to provide a comprehensive and reliable source of information on diatom biology and applications. The first book of the series, *Diatoms Fundamentals & Applications*, is wide ranging, starting with the contributions of amateurs and the beauty of diatoms, to details of how their shells are made, how they bend light to their advantage and ours, and major aspects of their biochemistry (photosynthesis and iron metabolism). The book then delves into the ecology of diatoms living in a wide range of habitats, and look

at those few that can kill or harm us. The book concludes with a wide range of applications of diatoms, in forensics, manufacturing, medicine, biofuel and agriculture. The contributors are leading international experts on diatoms. This book is for a wide audience researchers, academics, students, and teachers of biology and related disciplines, written to both act as an introduction to diatoms and to present some of the most advanced research on them.

Biodiversity Conservation in Transboundary Protected Areas National Research Council, Policy and Global Affairs, Office of International Affairs, Office of Central Europe and Eurasia, 1996-09-27 Recognizing the increasing rate of species loss on a global scale and that neither pollution nor ecosystems respects political boundaries, cooperation on many different levels is required to conserve biodiversity. This volume uses four protected areas that Poland shares with its neighbors as case studies to explore opportunities to integrate science and management in transboundary protected areas in Central Europe for the conservation of biodiversity. Specific topics include biodiversity conservation theories and strategies, problems of wildlife management, and impacts of tourism and recreational use on protected areas.

Global Forest Resources Assessment 2005 Food and Agriculture Organization of the United Nations, 2006 Since 1946, FAO regularly monitors the world's forests through Global Forest Resources Assessments. The mandate to carry out these assessments stems both from the basic statutes of FAO and the Committee on Forestry (COFO). Divided into nine chapters, the publication covers the following topics: the extent of forest resources; biological diversity; forest health and vitality; productive functions of forest resources; protective functions of forest resources; socio-economic functions; progress towards sustainable forest management.

Soil and Water Pollution Monitoring, Protection and Remediation Irena Twardowska, Sebastian Stefaniak, Herbert E. Allen, Max M. Häggblom, 2007-04-30 This book details the state-of-the art in early warning monitoring of anthropogenic pollution of soil and water. It is unique with regard to its complex, multidisciplinary, mechanistic approach. Top scientists establish links and strengthen weak connections between specific fields in biology, microbiology, chemistry, biochemistry, toxicology, sensoristics, soil science and hydrogeology.

Faster, Higher, Farther Jack Ewing, 2018 A shocking expose of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In *Faster, Higher, Farther*, Jack Ewing rips the lid off the scandal. He describes VW's rise from the people's car during the Nazi era to one of Germany's most prestigious and important global brands, touted for being green. He paints vivid portraits of Volkswagen chairman Ferdinand Piech and chief executive Martin Winterkorn, arguing that their unrelenting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, *Faster, Higher, Farther* reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud-with potentially devastating consequences. As the future of one of the world's biggest

companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.

The Classic Car Book DK,2023-04-06 From the Chevrolet Bel Air to the Ferrari Testarossa, this stunning book showcases the most iconic and important classic cars from every decade since the 1940s. Few things ignite such reverence as a classic car. With more than 250 iconic models from the 1940s to the early 1990s, photographed from every angle, this title is a glorious celebration of the stars in the classic car firmament. The Classic Car Book brings you the story of more than 20 great marques, including household names Bentley, Mercedes, Ferrari, Cadillac and Aston Martin. Its lavish photography reveals every detail in close-up of models that range from the 1940s giant two-ton Daimler DE36, which ferried royals about in style, through to sleek Ferraris from the 1980s capable of smashing the 200mph barrier. It puts you in the driving seat of such icons as the Chevrolet Corvette, the Ford Thunderbird, and the Mercedes 300SL, and brings you the designers of these amazing machines and the story of their manufacturers. This ultimate guide to classic cars further features: - A comprehensive catalogue that draw out the key features of each important model, with detailed profiles and specification. - Feature pages broaden the scope of the book, covering everything from the designers and manufacturers who created them to their evolution over the decades. - Stunningly shot DPS images add an extra layer of colour and flavour to the book. - Written by award-winning author and expert on all aspects of motoring, Giles Chapman, Editor-in-Chief of DK's The Car Book, which has sold over 550,000 copies worldwide to date. - Updates will include the key models that have grown in popularity since the last edition. Whether you dream of owning one of these super-cool cars, or you are a collector already, The Classic Car Book is set to become a treasured favourite.

Mountain Weather Research and Forecasting Fotini K.

Chow,Stephan F.J. De Wekker,Bradley J. Snyder,2012-08-30 This book provides readers with a broad understanding of the fundamental principles driving atmospheric flow over complex terrain and provides historical context for recent developments and future direction for researchers and forecasters. The topics in this book are expanded from those presented at the Mountain Weather Workshop, which took place in Whistler, British Columbia, Canada, August 5-8, 2008. The inspiration for the workshop came from the American Meteorological Society (AMS) Mountain Meteorology Committee and was designed to bridge the gap between the research and forecasting communities by providing a forum for extended discussion and joint education. For academic researchers, this book provides some insight into issues important to the forecasting community. For the forecasting community, this book provides training on fundamentals of atmospheric processes over mountainous regions, which are notoriously difficult to predict. The book also helps to provide a better understanding of current research and forecast challenges, including the latest contributions and advancements to the field. The book begins with an overview of mountain weather and forecasting challenges specific to complex terrain, followed by chapters that focus on diurnal mountain/valley flows that develop under calm conditions and dynamically-driven winds under strong forcing. The focus then shifts to other phenomena specific to mountain regions: Alpine foehn, boundary layer and air quality issues, orographic precipitation processes, and microphysics parameterizations. Having covered the major physical processes, the book shifts to observation and modelling techniques used in mountain regions, including model configuration and parameterizations such as turbulence, and model applications in operational forecasting. The book concludes with a discussion of the current state of research and forecasting in complex terrain, including a vision of how to bridge the gap in the future.

The Enemy at the Gate Andrew Wheatcroft, 2009-11-10 In 1683, two empires - the Ottoman, based in Constantinople, and the Habsburg dynasty in Vienna - came face to face in the culmination of a 250-year power struggle: the Great Siege of Vienna. Within the city walls the choice of resistance over surrender to the largest army ever assembled by the Turks created an all-or-nothing scenario: every last survivor would be enslaved or ruthlessly slaughtered. The Turks had set their sights on taking Vienna, the city they had long called 'The Golden Apple' since their first siege of the city in 1529. Both sides remained resolute, sustained by hatred of their age-old enemy, certain that their victory would be won by the grace of God. Eastern invaders had always threatened the West: Huns, Mongols, Goths, Visigoths, Vandals and many others. The Western fears of the East were vivid and powerful and, in their new eyes, the Turks always appeared the sole aggressors. Andrew Wheatcroft's extraordinary book shows that this belief is a grievous oversimplification: during the 400 year struggle for domination, the West took the offensive just as often as the East. As modern Turkey seeks to re-orient its relationship with Europe, a new generation of politicians is exploiting the residual fears and tensions between East and West to hamper this change. *The Enemy at the Gate* provides a timely and masterful account of this most complex and epic of conflicts.

Spatial Data Quality Rodolphe Devillers, Helen Goodchild, 2017-05-24 Producing maps that depict the real world accurately has been a major concern of cartographers for centuries. This is especially true today as escalating access to geospatial data and the subsequent increase in user-generated content provided by Web 2.0 have significantly altered the typical processes used to produce, distribute, and use geospatial data. Focusing on users and decisions as well as the data, *Spatial Data Quality: From Process to Decisions* provides an up-to-date overview of scientific progress in this core sub-discipline of the

Geographic Information Sciences. Presenting results from a number of current research projects in spatial data quality (SDQ) -- from the assessment of data accuracy to legal aspects relating to the quality of geographic information -- this reference reflects the changes in practice in response to the rapid technological developments over the past decade. An impressive panel of internationally recognized expert contributors focuses on the relationship between the quality of geographic data and the quality of decisions based on such data. Structured for easy reference, the first section of the book discusses conceptual approaches to SDQ, the second presents a number of applications of spatial data quality methods, the third looks at SDQ issues for remote sensing data, and the final section presents papers that consider the interface between the law and SDQ. In addition to the main chapters presented in each section, a number of shorter notes present on-going and recent research projects investigating various aspects of spatial data quality.

roger scruton the philosopher
on dover beach apr 15 2021
roger scruton is one of the
outstanding british
philosophers of the post war
years why then is he at best
ignored and at worst reviled
part of the reason is that he is
an unapologetic conservative in
the tradition of edmund burke
