Roland Beamont

Canberra PR9 Roger Chesneau,2006 Covers the history of the English Electric Canberra PR Mk9 and includes concise technical information, details of the aircraft's developmental history, squadron service and colour schemes

The English Electric Canberra in British Service Martin Derry,Neil Robinson,2020-02-19 Developed by English Electric during the late 1940s - essentially as a successor to the wartime de Havilland Mosquito twin-engine, unarmed, fast bomber concept - the Canberra can lay claim to being the first British jet-powered medium bomber when it was introduced in to RAF service in May 1951. The Canberra became the first jet aircraft to make a non-stop transatlantic flight and amongst the performance requirements for the type was the demand for a high altitude bombing capability in addition to flying at high speeds, and in February 1951, and throughout most of the decade, the Canberra could fly at a higher altitude than any other bomber or even any other aircraft, establishing a world altitude record of 70,310ft in 1957. The Canberra proved to be a highly adaptable airframe, and following the entry of the Vickers Valiant, the first of the trio of V Bombers in to RAF service in 1955, (see Flight Craft 7 'Valiant, Victor and Vulcan') which were capable of carrying much heavier weapon loads (including nuclear weapons) over longer ranges, the Canberra continued to serve in a variety of varied roles including tactical nuclear strike, low-level strike and ground attack in its B(I).6 and B(I).8 variants, photographic and electronic reconnaissance platform in its PR variants, multi-task training aircraft and inevitably its invaluable service with specialized MoD Test and Evaluation units. Serving in all the RAF's Theatres of Operations including the UK, the Middle and Far East and RAF Germany, the RAF continued to operate the Canberra for 50 years from the Suez Crisis in November 1956 to its service in Afghanistan in June 2006. The Royal Navy's Fleet Air Arm also operated Canberras, initially as radio controlled target drones and later by the Fleet Requirements Unit. Although outside the scope of this particular title, it is of interest to note that the Canberra was a significant aircraft on the export market, being operated by the air forces of many nations and was license produced in Australia and the USA.

English Electric Canberra Bruce Barrymore Halpenny,2014-03-19 “A useful review of the development of a classic jet bomber that saw widespread service in the Royal Air Force and was exported to many overseas air forces.” —Aeromilitaria This amazing airplane first flew in 1949 and is still in front-line service with the RAF. It has served in a variety of roles including those of tactical bomber, photo-reconnaissance, navigational trainer, maritime strike, electronic countermeasures and target-towing. It was manufactured in the USA under license as the Martin B-57 and has been exported to Argentina, Chile, India, Peru, South Africa and other Commonwealth countries. This book looks at the development of the aircraft during the early days of jet power and especially at its Rolls-Royce Avon powerplant. Each of the many marks and variants are described and illustrated by many remarkable and rare photographs. The type’s record of service with RAF squadrons throughout its service life is given together with descriptions of the many experimental models that were used in the development of a variety of weapons and avionics systems. “For an aircraft that has been the subject of countless books, the author still found a remarkable wealth of previously unpublished material on Canberra operations. A classic aircraft given the proper coverage it so richly deserves.” —Airfix Model World “A wonderfully researched tribute to this remarkable achievement, with a plethora of excellent photographs . . . Essential reading for any aviation enthusiast.” —Pegasus Archive

Canberra: The Greatest Multi-Role Aircraft of the Cold War (Volume 1) Ken Delve,John Sheehan,2022-07-02 — The Canberra introduced the RAF to the era of jet bombers — It was adopted by air forces from South America, India, Australia, New Zealand and the US as the Martin B-57 — Beautifully illustrated with many rare and unpublished photographs — Of interest to aviation and military historians, modellers, gamers and flight simulator enthusiasts An aviation legend designed in the mid-1940s, the English Electric Canberra entered service in 1951 with RAF Bomber Command. It served in the conventional, interdictor and nuclear bomber role with the RAF, Germany, the Middle East and the Far East. Its performance and adaptability made it ideal as a reconnaissance aircraft and the final version, the Canberra PR.9, only finally retired in July 2006. The Canberra was used in many support roles, especially in signals/electronic warfare. The Canberra was adopted by air forces from South America to Africa and India as well as Australia and New Zealand and licence-built as the Martin B-57. It was involved in conflicts from the Suez Crisis and the Malayan Emergency, and various other hot spots with the RAF, to the Australian and USAF ops in Vietnam, and even the Indo-Pakistani War when both sides used Canberras, and the 1982 Falklands War. Used in trials and evaluation, the Canberra held various height and speed records, and NASA’s High Altitude Research Program WB-57s are still active. The Canberra is beloved by many dedicated enthusiasts and aircraft (or cockpits) still survive in museums, as well as some in flying condition.

English Electric Canberra and Martin B-57 Barry Jones,1999 The RAF's first jet bomber is examined from '51 through today.

Rebuilding the Royal Navy D. K. Brown,George Moore,2012-07-30 This design history of post-war British warship development, based on both declassified documentation and personal experience, is the fourth and final volume in the author’s masterly account of development of Royal Navy’s ships from the 1850s to the Falklands War. In this volume the author covers the period in which he himself worked as a Naval Constructor, while this personal knowledge is augmented by George Moore’s in-depth archival research on recently declassified material. The RN fleet in 1945 was old and worn out, while new threats and technologies, and post-war austerity called for new solutions. How designers responded to these unprecedented challenges is the central theme of this book. It covers the ambitious plans for the conversion or replacement of the bigger ships; looks at all the new construction, from aircraft carriers, through destroyers and frigates, to submarines (including nuclear and strategic), to minesweepers and small craft. The authors pay particular attention to the innovations introduced, and analyses the impact of the Falklands War. At the start of the twenty-first century the Royal Navy is still a powerful and potent force with new and a number of innovative classes, both surface and sub-surface, coming on stream. This book offers a fascinating insight into how the post-war fleet developed and adapted to the changing role of the Navy.

Pearl Harbor Homer N. Wallin,2001-09 Pearl Harbor will long stand out in mens minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The

Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it _ in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying Day of Infamy. His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navys victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career.

Conservation Biology for All Navjot S. Sodhi,Paul R. Ehrlich,2010-01-08 Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conversion and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Weapon of Choice Charles H. Briscoe,Richard L. Kiper,James A. Visual Global Politics Roland Bleiker,2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.
