**Enemy at the Gates** Justo Miranda,2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia,

Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.

**Artificial Hells** Claire Bishop, 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Hitler's Flying Saucers Henry Stevens, 2012-11-29

WWII expert Stevens shows us the incredible and suppressed technology of the Third Reich and their desire to create highly advanced “wingless” aircraft-yes, flying saucers! Learn why the Schriever-Habermohl project was actually two projects and read the written statement of a German test pilot who actually flew one of these saucers; about the Leduc engine, the key to Dr. Miethes saucer designs; how US government officials kept the truth about foo-fighters hidden for almost sixty years and how they were finally forced to come clean about the German origin of foo fighters. Learn of the Peenemuende saucer project and how it was slated to go atomic. Read the testimony of a German eyewitness who saw magnetic discs. Read the U.S. governments own reports on German field propulsion saucers. Read how the post-war German KM-2 field propulsion rocket worked. Learn details of the work of Karl Schappeller and Viktor Schauberger. Learn how their ideas figure in the quest to build field propulsion flying discs. Find out what happened to this technology after the war. Find out how the Canadians got saucer technology directly from the SS. Find out about the surviving Third Power of former Nazis. Learn of the US government’s methods of UFO deception and how they used the German Sonderbueroll as the model for Project Blue Book.

Project Cancelled Derek Wood,1986 Om de mange projekter - hvoraf adskillige lovende - der måtte opgives som følge af en række efter forfatterens mening højest tvilsomme politiske og kommercielle beslutninger, der efter 2. verdenskrig har kostet England dyrt.

*Westland Aircraft Since 1915* Derek N. James,1991  
This text describes all the military and civil aircraft built by Westland since the N.1B single-seat seaplane. The

helicopters, built now in close collaboration with Sikorsky, and used by armed forces throughout the world, are described in detail.

British Secret Projects 3 Tony Buttler, 2018-10-31 The British Secret Projects series covers the design and development of UK military aircraft since the mid-1930s with strong emphasis on designs that were never built, particularly those types generated by various design competitions. The original Volume Three (Fighters and Bombers 1935 to 1950) has now been split into separate volumes with this book covering fighters and a new Volume Four in preparation solely devoted to bomber designs. This split has allowed space for the inclusion of much new information and many new photographs. This book describes the design and development of the British fighter from the end of the biplane fighter to the start of the jet era. The projects and programmes which feature in its pages begin with those prepared in the mid-1930s in the knowledge that war was coming and go through to some which appeared after the war had ended. During this period the art of fighter design took some big and important steps forward and here can be found fixed-gun fighters and turret fighters, in both single and twin-engine form, plus the first generation of jet fighters. Types designed to meet the requirements of both the Royal Air Force and the Fleet Air Arm are included. Drawings new to this volume include the Folland Fo.118 and the Westland P.13. As with the companion volumes, the author has undertaken extensive research and made full use of primary source material. Three-view drawings plus photographs of models or original artist's impressions combine to show how these unbuilt designs would have appeared. Data and appendices summarise the projects, contracts and specifications and provide a detailed insight

into many fascinating aircraft.

**Aircraft at Work** United States. Civil Aeronautics Administration, 1952

**British Secret Projects** Tony Buttler, 2000 A large number of fighter projects have been drawn by British companies over the last fifty years, but very few have turned into hardware, and very little has been published about these fascinating might-have-beens. This book makes extensive use of previously unpublished, primary-source material-much recently declassified. It gives an insight into a secret world where the public has had little idea of what was going on, while at the same time presenting a coherent nationwide picture of fighter development and evolution. Particular emphasis is placed on tender design competitions and some of the events that led to certain aircraft either being canceled or produced. Some of the many and varied types included are the Hawker P.1103/P.1136/P.1121 series, and the Fairey Delta III. The book includes many illustrations, plus specially commissioned renditions of might-have-been types in contemporary markings.

Also includes photos of the details in B&W and color and 4-view color profiles of the Hawker Hurricane IIc flown by Sgt Antoni Beda.

Constitution of Finland Government of Finland, 2021-04-11 The Constitution of Finland is the

supreme source of national law of Finland. It defines the basis, structures and organization of government, the relationship between the different constitutional organs, and lays out the fundamental rights of Finnish citizens, and individuals in general. The original Constitution Act was enacted in 1919, soon after Finland declared its independence in 1917. The current draft of the Constitution came into force on 1 March 2000.

*Force Benedict* Eric Carter,Anthony Loveless,2014-04-10 Second World War fighter pilot Eric Carter is one of only four surviving members of a secret mission, code-named 'Force Benedict'. Sanctioned by Winston Churchill in 1941 Force Benedict was dispatched to defend Murmansk, the USSR's only port not under Nazi occupation. If Murmansk fell, Soviet resistance against the Nazis would be hard to sustain and Hitler would be able to turn all his forces on Britain... Force Benedict was under the command of New Zealand-born RAF Wing Commander Henry Neville Gynes Ramsbottom-Isherwood, who led two squadrons of Hurricane fighters, pilots and ground crew which were shipped to Russia in total secrecy on the first ever Arctic Convoy. They were told to defend Murmansk against the Germans 'at all costs'. 'We all reckoned the government thought we'd never survive' - but Eric Carter did, and was threatened with Court Martial if he talked about where he'd been or what he'd done. Now he reveals his experiences of seventy years ago in the hell on earth that was Murmansk, the largest city north of the Arctic Circle. It will also include previously unseen photos and documents, as well as exploring - for the first time - other intriguing aspects of Force Benedict.
