Sumner-Gearing-class Destroyers Robert F. Sumrall,1995 The US Navy's Sumner-Gearing-class destroyers served as a standard for post-WWII destroyer design and development. In this outstandingly illustrated work (bandw throughout with a 16-page color center-spread) Sumrall traces the origins and evolution of these destroyers over nearly forty years and through three wars, showing the advances made in ordnance, fire control, and steam engineering. The Tools of Owatsumi Desmond Ball,Richard Tanter,2015-01-21 Japan is quintessentially by geography a maritime country. Maritime surveillance capabilities – underwater, shore-based and airborne – are critical to its national defence posture. This book describes and assesses these capabilities, with particular respect to the underwater segment, about which there is little strategic analysis in publicly available literature. Since the end of the Cold War, Chinese oceanographic and navy vessels have intruded into Japanese waters with increasing frequency, not counting their activities in disputed waters such as around the Senkaku (Diaoyu) Islands and Okinotorishima where China and Japan have overlapping territorial claims. These intrusions have increasingly involved warships, including submarines, sometimes acting quite aggressively. Japan maintains an extraordinary network of undersea hydrophone arrays, connected to shore-stations which are typically equipped with electronic intelligence (ELINT) systems, for monitoring, identifying and tracking submarine and surface traffic in its internal straits and surrounding seas. Some parts of this network are operated jointly with, and are of crucial importance to, the US Navy. Japan's superlative submarine detection capabilities would be of decisive advantage in any submarine engagement. But the relevant facilities are relatively vulnerable, which makes them very lucrative targets in any conflict. This introduces compelling escalatory dynamics, including the involvement of US forces and possible employment of nuclear options.

*Jane's Fighting Ships of World War II* Francis Edwin McMurtrie,1946 Describes the ships used by the British, French, German, Italian, Japanese, Russian, and American navies during World War II

*Japan's Arduous Rejuvenation as a Global Power* Victor Teo,2019-04-08 This open access book assesses the profound impact of Japan's aspirations to become a great power on Japanese security, democracy and foreign relations. Rather than viewing the process of normalization and rejuvenation as two decades of remilitarization in face of rapidly changing strategic environment and domestic political circumstances, this volume contextualizes Japan's contemporary international relations against the longer grain of Japanese historical interactions. It demonstrates that policies and statecraft in the Prime Minister Shinzo Abe's era are a continuation of a long, unbroken and arduous effort by successive generations of leaders to preserve Japanese autonomy, enhance security and advance Japanese national interests. Arguing against the notion that Japan cannot work with China as long as the US-Japan alliance is in place, the book suggests that Tokyo could forge constructive relations with Beijing by engaging China in joint projects in and outside of the Asia-Pacific in issue areas such as infrastructure development or in the provision of international public goods. It also submits that an improvement in Japan-China relations would enhance rather than detract Japan-US relations and that Tokyo will find that her new found autonomy in the US-Japan alliance would not only accord her more political respect and strategic latitude, but also allow her to ameliorate the excesses of American foreign policy adventurism, paving for her to become a truly normal great power.

*Unflown Wings* Dmitriy Komissarov,Sergey Komissarov,Yefim Gordon,2013 This book surveys all the Soviet/Russian aircraft that either remained "paper projects" (the work progressed no further than the design documents or even merely a design proposal) or were abandoned at the prototype construction stage. Over many years, the authors have unearthed a mass of unpublished material on these aircraft projects including the

Isayev/Shevchenko bi-monoplane fighters with retractable lower wings developed in the 1930s, early Soviet jet fighter projects of the Second World War period, and the twin-boom fighters and attack aircraft developed by Semyon M. Alekseyev in the late 1940s. Wherever possible, images of the aircraft are shown, including pictures of models, and line and cutaway drawings from the project documents, giving the readers the maximum available information on Soviet aircraft projects developed over a large time scale. The book is richly illustrated with numerous photos, drawings, and diagrams, as well as color side views of the unbuilt aircraft, which will be of interest not only to the numerous Soviet/Russian aviation enthusiasts but also to scale modelers.

*The Battle for Khe Sanh* Moyers S. Shore, 2019-11-25 The Battle for Khe Sanh is a book by Moyers S. Shore. During the Vietnam War a battle was conducted in the Khe Sanh area of northwestern Vietnam, and this work presents equipment and tactics of US forces and how they fought VC forces.

**The Imperial Japanese Navy in the Pacific War** Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

**The Last Warrior** Andrew F Krepinevich, Barry D Watts, 2015-01-06 Andrew Marshall is a Pentagon legend. For more than four decades he has served as Director of the Office of Net Assessment, the Pentagon's internal think tank, under twelve defense secretaries and eight administrations. Yet Marshall has been on the cutting edge of strategic thinking even longer than that. At the RAND Corporation during its golden age in the 1950s and early 1960s, Marshall helped formulate bedrock concepts of US nuclear strategy that endure to this day; later, at the Pentagon, he pioneered the development of net assessment -- a new analytic framework for understanding the long-term military competition between the United States and the Soviet Union. Following the Cold War, Marshall successfully used net assessment to anticipate emerging disruptive shifts in military affairs, including the revolution in precision warfare and the rise of China as a major strategic rival of the United States. In *The Last Warrior*, Andrew Krepinevich and Barry Watts -- both former members of Marshall's staff -- trace Marshall's intellectual development from his upbringing in Detroit during the Great Depression to his decades in Washington as an influential behind-the-scenes advisor on American defense strategy. The result is a unique insider's perspective on the changes in US strategy from the dawn of the Cold War to the present day. Covering some of the most pivotal episodes of the last half-century and peopled with some of the era's most influential figures, *The Last Warrior* tells Marshall's story for the first time, in the process providing an unparalleled history of the evolution of the American defense establishment.

*Look East, Cross Black Waters* Jonah Blank, Jennifer D. P. Moroney, Angel Rabasa, Bonny Lin, 2015-10-13 India's core goals for Southeast Asia are in basic harmony with those of the United States, including regional stability, peaceful settlement of territorial disputes, and containment of radicalism. Still, America should not expect India to enter any sort of alliance, nor join any coalition to balance against China, but should demonstrate strategic

patience and willingness to cultivate a long-term relationship.

*Freax* Tamás, Polgár, 2016-04-17 *FREAX* – the biggest book ever written about the history of the computer demoscene. The book tells the complete history of the Commodore 64 and the Amiga, both about the machines and about the underground subcultures around them, from the cracker- and warez-scene to the demoscene, from hacking and phreaking to the ASCII art scene. Interviews with scene celebrities, former key persons of the computer industry, citations from contemporary magazines and fanzines make the narrative history of the big adventure complete. The book contains 350 pages and is illustrated with 480 color photos and screenshots. This is the comprehensive guide to the golden era of home computers.

*Critical Risks of Different Economic Sectors* Dmitry Chernov, Didier Sornette, 2019-12-03 This book explores the major differences between the kinds of risk encountered in different sectors of industry - production (including agriculture) and services - and identifies the main features of accidents within different industries. Because of these differences, unique risk-mitigation measures will need to be implemented in one industry that cannot be implemented in another, leading to large managerial differences between these broad economic sectors. Based on the analysis of more than 500 disasters, accidents and incidents - around 230 cases from the production sector and around 280 cases from the service sector - the authors compare the risk response actions appropriate within different sectors, and establish when and how it is possible to generalize the experience of dealing with risks in any given industry to a wider field of economic activity. This book is mainly intended for executives, strategists, senior risk managers of enterprise-wide organizations and risk management experts engaged in academic or consulting work. By setting out clearly the sector differences in risk management, the authors aim to improve the practice of general risk assessment with regard to identifying and prioritizing risks, and of risk control with regard to planning appropriate mitigation measures.

*Trouble Triangle* Travis Casey, 2012-12-18 Tyler Chambers finds that his luck has run out...almost. After several brushes with the law, he avoids jail by enlisting in the Navy. When Tyler gets stationed in Pearl Harbor all his troubles look to be behind him. Life keeps getting better when smooth-talking Tyler lands a date with the base's hottest chick, Holly Knight, but things sour quickly when he discovers how controlling and annoying she is. As he is about to dump her, a revelation from his past comes back to haunt him and Holly is the only person who can save his Navy career and keep him out of prison. But what does she want in return? He should be grateful, but is besotted with another girl. Debbie Meyers is sexually confused and has her own ideas for Tyler. She beds him easily enough and uses him in a vendetta against Holly. Tyler finds himself in a TROUBLE TRIANGLE when both women want him for their own needs. A story of lust, love and blackmail. But who's doing what to whom?

**Innovation in Carrier Aviation (Naval War College Newport Papers, Number 37)** Thomas C. Hone, Norman Friedman, Mark D. Mandeles, 2011-10 Published by the Naval War College Press. This study is about innovations in carrier aviation and the spread of those innovations from one navy to the navy of a close ally. The innovations are the angled flight deck; the steam catapult

**Dragon's Fury - World War Against America and the West** Jeff Head, 2006-10 The collector's edition of the bestselling Dragon's Fury Series includes all five volumes and tells the entire story of the exciting saga that projects a future arising out of current events where implacable enemies of America develop their own surprising and very lethal high-technology military capabilities.

**Dark State** Charles Stross, 2018-01-11 *Dark State* is the second book in a thrilling series - set in the same world as Charles Stross' Merchant Princes series. This book follows *Empire Games*. The time for peace is ending . . . In the near future, one America is experiencing its first technological revolution - whilst in a parallel world, the United States is a hi-tech police state. But both timelines are poised for conflict. Miriam Burgeson's America is heading for civil war. However, a high profile defection might avert this crisis, if only Miriam and her agents can arrange it in time. And Rita Douglas, rival US spy, arrives during this turmoil. Rita's world is rocked when she realizes Miriam is her birth mother, changing her own mission irrevocably. Then

her United States discovers yet another parallel earth, and the remains of an advanced society. Something destroyed that civilization, Rita's people are about to rouse it – and two worlds will face the consequences.

**Last Stand on Zombie Island** Christopher Eger,2012-05-01 WELCOME TO THE END OF THE WORLD! Disease-K has decimated the world leaving its victims shambling homicidal maniacs. And nestled along the warm Gulf waters sits Gulf Shores...the last outpost of civilization. With looters and thieves preying on the shocked survivors, it's up to the retirees and bank tellers, phone repairmen and charterboat captains to put the town back together. THE SHADOWS ARE GATHERING OUTSIDE OF TOWN! There, in the sands and marshes of the Gulf of Mexico, the citizens of Gulf Shores along with scattered military units, a downed Air Force pilot, and a lone Coast Guard cutter form the last line of defense against the amassing horde of the infected marching its way toward the sea destroying what's left of humanity along the way. As summer gives way to the fall and the cold winds blow off the sea, Gulf Shores draws the line and prepares to make the... THE LAST STAND ON ZOMBIE ISLAND!

**Military and Security Developments Involving the People's Republic of China 2020 Annual Report to Congress** Department of Defense,2021-07-09 For 20 years, the Department of Defense (DoD) has provided Congress with an annual report on military and security developments involving the People's Republic of China (PRC). These reports have assessed the contours of China's national strategy, its approach to security and military affairs, and potential changes in the PRC's armed forces over the next 20 years, among other matters. 2020 marks an important year for the People's Liberation Army (PLA) as it works to achieve important modernization milestones ahead of the Chinese Communist Party's (CCP) broader goal to transform China into a moderately prosperous society by the CCP's centenary in 2021. As the United States continues to respond to the growing strategic challenges posed by the PRC, 2020 offers a unique opportunity to assess both the continuity and changes that have taken place in the PRC's strategy and armed forces over the past two decades.
