Battlestar Galactica: Designing Spaceships Paul Ruditis, Mark Wright, 2021-11-16 This new book goes behind the scenes on the award-winning TV series Battlestar Galactica to discover the concepts behind the designs of dozens of spaceships! Battlestar Galactica debuted on TV in 1978 and acquired a phenomenal following, breaking new ground for TV drama and winning several awards. It returned to TV screens in 2003 in a critically acclaimed reimagined series, with Time Magazine naming it one of the 100 Best TV Shows of All Time. This behind-the-scenes guide looks at the creation of the ships in both the original and the reimagined series, including vessels of the ragtag fleet and those of the Cylon enemy. Featuring artwork from the groundbreaking first series and the 2004 reimagined series, this volume explores the art of ship creation from the first sketches to the finished designs of the modelmakers. Covering 18 key ships from the two shows, including the Galactica itself, the Vipers and the Cylon Raiders, the pages are packed with original concept art from designers Eric Chu, Andrew Probert and legendary artist Ralph McQuarrie.

Hardware: The Definitive SF Works of Chris Foss Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career.

"Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." — Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." — Alejandro Jodorowsky

SAT Wars Joseph A. Soares, 2015-04-17 What can a college admissions officer safely predict about the future of a 17-year-old? Are the best and the brightest students the ones who can check off the most correct boxes on a multiple-choice exam? Or are there better ways of measuring ability and promise? In this penetrating and revealing look at high-stakes standardized admissions tests, Joseph Soares demonstrates the far-reaching and mostly negative impact of the tests on American life and calls for nothing less than a national policy change. *SAT Wars* presents a roadmap for rethinking college admissions that moves us past the statistically weak and socially divisive SAT/ACT. The author advocates for evaluation tools with a greater focus on what youth actually accomplish in high school as a more reliable indicator of qualities that really matter in one's life and to one's ability to contribute to society. This up-to-date book features contributions by well-known experts, including a piece from Daniel Golden, who won a Pulitzer Prize for his reporting in the *Wall Street Journal* on admissions, and a chapter on alternative tests from Robert Sternberg, who is the world's most-cited living authority on educational research. As we continue to debate the use and misuse of standardized testing, *SAT Wars* will be important reading for a wide audience, including college administrators and

faculty, high school guidance counselors, education journalists, and parents.
