Yvain Chretien de Troyes,Chrétien (de Troyes),1987-09-10 A twelfth-century poem by the creator of the Arthurian romance describes the courageous exploits and triumphs of a brave lord who tries to win back his deserted wife's love

Economic and Ecological Significance of Arthropods in Diversified Ecosystems Akshay Kumar Chakravarthy,Shakunthala Sridhara,2016-10-20 Arthropods are invertebrates that constitute over 90% of the animal kingdom, and their bio-ecology is closely linked with global functioning and survival. Arthropods play an important role in maintaining the health of ecosystems, provide livelihoods and nutrition to human communities, and are important indicators of environmental change. Yet the population trends of several arthropods species show them to be in decline. Arthropods constitute a dominant group with 1.2 million species influencing earth's biodiversity. Among arthropods, insects are predominant, with ca. 1 million species and having evolved some 350 million years ago. Arthropods are closely associated with living and non-living entities alike, making the ecosystem services they provide crucially important. In order to be effective, plans for the conservation of arthropods and ecosystems should include a mixture of strategies like protecting key habitats and genomic studies to formulate relevant policies for in situ and ex situ conservation. This two-volume book focuses on capturing the essentials of arthropod inventories, biology, and conservation. Further, it seeks to identify the mechanisms by which arthropod populations can be sustained in terrestrial and aquatic ecosystems, and by means of which certain problematic species be managed without producing harmful environmental side-effects. This edited compilation includes chapters contributed by over 80 biologists on a wide range of topics embracing the diversity, distribution, utility and conservation of arthropods and select groups of insect taxa. More importantly, it describes in detail the mechanisms of sustaining arthropod ecosystems, services and populations. It addresses the contribution of modern biological tools such as molecular and genetic techniques regulating gene expression, as well as conventional, indigenous practices in arthropod conservation. The contributors reiterate the importance of documenting and understanding the biology of arthropods from a holistic perspective before addressing conservation issues at large. This book offers a valuable resource for all zoologists, entomologists, ecologists, conservation biologists, policy makers, teachers and students interested in the conservation of biological resources.

Remapping Cold War Media Alice Lovejoy,Mari Pajala,2022-06-21 Why were Hollywood producers eager to film on the other side of the Iron Curtain? How did Western computer games become popular in socialist Czechoslovakia's youth paramilitary clubs? What did Finnish commercial television hope to gain from broadcasting Soviet drama? Cold War media cultures are typically remembered in terms of an East-West binary, emphasizing conflict and propaganda. Remapping Cold War Media, however, offers a different perspective on the period, illuminating the extensive connections between media industries and cultures in Europe's Cold War East and their counterparts in the West and Global South. These connections were forged by pragmatic, technological, economic, political, and aesthetic forces; they had multiple, at times conflicting, functions and meanings. And they helped shape the ways in which media circulates today—from film festivals, to satellite networks, to coproductions. Considering film, literature, radio, photography, computer games, and television, Remapping Cold War Media offers a transnational history of postwar media that spans Eastern and Western Europe, the Nordic countries, Cuba, the United States, and beyond. Contributors draw on extensive archival research to reveal how media traveled across geopolitical boundaries; the processes of translation, interpretation, and reception on which these travels depended; and the significance of media form, content, industries, and infrastructures then and now.

Sikhism W. H. McLeod,1997 At the heart of Sikhism are the ten Gurus, who transferred authority from individual leaders to the scriptures and the community itself. Sikhism explores how their distinctive beliefs emerged from the Hindu background of the times, how a number of separate sects split off, and how far the ideas of sexual equality have been observed in practice. British Aircraft Carriers David Hobbs,2014-09-30 This book is a meticulously detailed history of British aircraft-carrying ships from the earliest experimental vessels to the Queen Elizabeth class, currently under construction and the largest ships ever built for the Royal Navy. Individual chapters cover the design and construction of each class, with full technical details, and there are extensive summaries of every ship's career. Apart from the obvious large-deck carriers, the book also includes seaplane carriers, escort carriers and MAC ships, the maintenance ships built on carrier hulls, unbuilt projects, and the modern LPH. It concludes with a look at the future of naval aviation, while numerous appendices summarise related subjects like naval aircraft, recognition markings and the circumstances surrounding the loss of every British carrier. As befits such an important reference work, it is heavily illustrated with a magnificent gallery of photos and plans, including the first publication of original plans in full colour, one on a magnificent gatefold.??Written by the leading historian of British carrier aviation, himself a retired Fleet Air Arm pilot, it displays the authority of a lifetime's research combined with a practical understanding of the issues surrounding the design and operation of

aircraft carriers. As such British Aircraft Carriers is certain to become the standard work on the subject.

Kumba Africa Sampson Ejike Odum,2020-11-03 ‘KUMBA AFRICA’, is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven’t tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.
