Strategic CSR Communication Mette Morsing, Suzanne C. Beckmann, 2006 Increasingly critical and sophisticated stakeholders request companies to engage in Corporate Social Responsibility (CSR) activities and to communicate about such efforts. Driven by such an energetic demand, CSR communication seems like a straightforward task: to inform stakeholders better about corporate CSR activities. Yet, strategic CSR communication is anything but a straightforward endeavor. Communicating an organization as a socially responsible entity implies not only better information but also that organizational members develop a concurrent sensitivity towards the changing expectations among a variety of stakeholders who voice their concerns with different intensity and on different topics. This book raises the key issues, the challenges, and the complexity that face managers as they engage themselves and their organizations in a stakeholder dialogue about on communicating their CSR efforts.

**The Civil Corporation** Simon Zadek, 2012-05-04 The Civil Corporation is an award-winning classic, well recognized as the most insightful exploration of contemporary developments in responsible business practices and their implications for business strategy and public policy. This revised second edition adds a significant new section describing and reflecting on developments since the book's first publication in 2001. This new material draws on the author's practical experience over the last five years working as Chief Executive of Account Ability with some of the world's leading businesses and public bodies on policies and practices that advance the emerging shift in businesses' role in society. This book is top drawer reading for business professionals, management students and academics, and activists and public servants. It goes to the heart of the issue of business in society, cutting through the rhetoric of campaigners and business-speak alike in framing the tough questions in balanced and yet provocative terms. Crucially, it connects an insightful vista of the broader landscape with a set of practical 'dos' for businesses and their stakeholders that have stood the test of time. The accolade of winning the prestigious Academy of Management Award in 2006 confirms that Zadek has achieved what every author aspires to: a book that is both timely and timeless in its application. This revised edition builds on this success by providing new information and insights for practitioners, academics and students

Grand Prix Cars Denis Jenkinson,2015-10-02 “ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II

as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties — such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes — the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)

**Man Bac** Marc F. Oxenham, Hirofumi Matsumura, Nguyen Kim Dung, 2011-05-01 The site of Man Bac in the Red River Delta of Vietnam, one of the most meticulously excavated and carefully analysed of Southeast Asian archaeological sites in the past few years, is emerging as a key site in the region. This book carefully analyses the human and animal remains and puts them into context. The authors describe in detail the health status, the unusual demographic profile and the interestingly divergent affinities of the cemetery population, and discuss their meaning, particularly in association with evidence for the use of marine and terrestrial animal resources; they argue convincingly that the site documents a time when the face of the region's population was undergoing a fundamental shift, associated with a changing economic subsistence base. Physical anthropologists and archaeologists have argued for years over the timeline, the manner and the very nature of Southeast Asian population history, and this book is essential reading in this

debate. Two supporting appendices describe the individual remains in detail.

**Violence and Mental Health** Jutta Lindert, Itzhak Levav, 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

The importance of the link between business process organization and strategic management is stressed. circle approach—from the organizational design of business processes to IT implementation. With an emphasis on SAP R/3, real-world examples of standard software solutions illustrate these business process frameworks.

Different settings like multi-level one-person decision problems, multi-person antagonistic planning, and leadership situations are covered. Numerous examples and real-life planning cases illustrate the concepts. The new edition has been considerably expanded by additional chapters on supply chain management, service operations and multi-agent systems.
